When Writing for Catalog State which is Desired

CHICAGO PROJECTING CO.,

How to Make a Big Income From a Small Investment.

This book is published in the interest of not only the professional and semi-professional public exhibitor but also for the person who is ambitious and anxious to get on in the world, who desires to be independent, to throw off the day laborer's shackles, make a financial being of himself, a position among business men and to earn a title of being a self-made man.

Our establishment is well known to the professional and semi-professional classes, and our entertainment outfits in part, or in whole, are in the possession of most of the more successful exhibitors throughout the United States and foreign lands.

To the young man who is just finishing school, and more especially to those whose responsibilities by duty to parent or home compels him to leave school; to the young man or the middle-aged man who is tugging on the farm, working on the railroad, in the factory, shop or office; to the clerk behind the counter or to the country school teacher; to the great mass of brilliant, active, enterprising, ambitious deserving and would-be wealthy and prominent men of the land, but who by force of circumstances, are scarcely see a ray of hope of a chance of bettering their circumstances, a chance for earning more than two to five dollars per day, we address you with the greatest profit paying proposition, the finest, best and surest immediate money-making proposition, the most certain future-promising proposition ever known.

Thousands of men are looking for business opportunities, looking for an opening, a possible chance where they can through their own efforts acquire a fortune, but unfortunately there are so many unprincipled individuals and concerns who for personal gain would misguide the aspiring young man. The papers are full of offers of glowing opportunities to become rich. The papers are full of offers of glowing opportunities to employ men at big salaries, offering to send them large outfits with which to do business, etc., and many a man has answered these advertisements and has sent his money only to be disappointed. Hence, we are not at all surprised that young men, middle-aged men, elderly men and fathers and mothers would look with a marked degree of suspicion upon even a "home-made offer" which promises to any man but a small investment and no risk, an income which from the start should not be less than \$5.00 per day, and almost certainly with the proper amount of energy and application would bring an income of \$100.00 per year, and upwards of that amount in years immediately to follow.

Opportunities like this are indeed rare, and we are not surprised that on first thought one whose experience and opportunity for observation has been limited would be suspicious. Indeed, with all of our chances for observation we know of no other opportunity offered by any individual, firm or company in any town, city, or locality where there is a reasonable assurance, without previous experience, of at least \$5.00 per week from the start, and a possible \$100.00 per day or more as he becomes master of the situation.

It is easy to avoid deception, and if every one would first take the trouble to fore-sending money to thoroughly investigate the party who promises so much for so little, such dishonesty could not exist, and no man working for wages before them, and thousands of men who are who would place their existence would not be afraid to make a change. The merit of the opportunity which we offer, and so far as we know the only opportunity whereby a man with but little means can successfully start in a business with a promising future, the only opportunity

225 DEARBORN ST., CHICAGO, ILL.

city left where a man without previous experience may immediately cease to be a member of the masses and take his position among the classes; the only way whereby any man can immediately place himself in a position of comfort and plenty; the only one easy and quick way to meet the mortgage-holder with his money.

It is our desire if you take up this work you should do it with a feeling of confidence and security, for our success does not depend upon the first sale we make, as the profit on this class of goods is necessarily small by reason of the low prices at which we sell our outfits, consequently it is only the success of the exhibitor, his continued patronage and his influence to start others, which makes it worth our while to so earnestly recommend this line of work.

A well-selected stereopticon or motion picture outfit furnishes a form of amusement that is patronized and enjoyed by all classes, including the very best class of people in the land, and when properly managed, is sure to pay big profits. The Motion Picture and Stereopticon business is divided into three classes as follows: The Traveling Exhibition, the Nickelodeon or Nickel Theatre as it is sometimes called, and Street Advertising.

Most generally the traveling exhibition consists of a combination of motion pictures and stereopticon views that are shown from one to several nights in a place, in theatres, lodge halls, churches, school-houses, vacant stores, or in black motion picture tents which are constructed especially for the purpose. Some exhibitors, who have been able to save several thousand dollars each year, have shown mostly within a radius of fifty to seventy-five miles of their own home, seldom going more than one hundred miles. They go over and over almost the same circuit from year to year with increased patronage for each return of their re-entertainment.

Others prefer to travel over considerable distances, stopping in each successive town, while some visit only the larger cities and towns, and then there is quite a large class of others that combine the exhibition business with travelling for either health or for pleasure.

Some of the most successful confine their efforts to showing in churches and lodge halls, for which they are usually able to make arrangements on a percentage basis, giving a percentage of the receipts, ranging from twenty-five to forty per cent, for the use of the church or hall. Fraternal Societies and churches, especially the latter, are usually glad to arrange for an entertainment of this kind, as it not only furnishes an enjoyable and high class form of amusement, but is a very important feature, a what is even more necessary, viz., the replenishing of the usually depleted treasury. Very often it is possible to give from two to several exhibitions in the same town or city, depending upon the population. The fact is, some exhibitors have worked for many months and even some have shown continuously in some of the large cities.

Some exhibitors prefer to carry with them a black canvas tent, which is made especially for motion picture exhibitions. It is constructed entirely of black canvas and lined throughout, so as to shut out all outside light. By so doing they have little or no ground rent to pay, hence nearly all is profit.

When it is considered that there are more than 10,000 towns of over 500 inhabitants and more than 30,000 churches in the United States, one begins to get some idea of the endless possibilities, and the vast field there is to cover in this line.

New York City alone has 534 churches, Philadelphia 684, St. Louis 353, Pittsburgh 187, Buffalo 151, Minneapolis 126, Nashville 105, Indianapolis 96, Atlanta 81, New Haven 65 and Topeka 60.

In addition to opera houses, churches, and halls in the larger cities and towns, is the farming and mining districts outside of the towns and cities where the people see very little of up-to-date and high-class entertainment, and are easy to interest, and patronize liberally anything in this line. They also invite and are ready to assist in anything which promises to contribute to their church or social organization in any way.

CHICAGO PROJECTING CO.,

To Estimate the lesser possibilities we will take for example a country school house, church, or hall, which will hold but 150 people, the receipts for admission at only 10 cents each would amount to \$22.50, and as the expenses would be very light a reasonable estimate after allowing for the use of the hall, assistance, board, etc., would be about \$15.00 net, and at such an average would amount to 90.00 per week, 360.00 per month and \$4,320.00 per year net profit.

The receipts from larger churches, halls, and theatres in small towns of from 500 to a few thousand inhabitants, which would contain three or more exhibitions may be much greater. In such places a series of two traveling expenses, and as this class of churches and halls have a capacity of 500 to 1,000 or more the receipts may be from \$50.00 to \$100.00 per night.

These Estimates are based on the actual experience of hundreds of time and told of what they have done and from this we believe it is possible to figure that any one with a little ambition and energy who will secure one of these outfits and follow our instructions, should be able to make clear of expenses from \$1,500.00 to \$5,000.00 per year.

Among the best known successes in this line of work is that of John L. Stoddard, who gained a wide reputation about 1880. At that time motion pictures were not known. He showed a series of well-chosen stereoscopic sets, and gave memorized descriptions of the same. He visited only the larger cities. In Chicago he showed for many years at the Central Music Hall, which stood on the present site of the new Marshall Field retail building. The little Theatre seated 5200 people, and he was usually favored with a crowded house for each of his entire series of lectures. He continued in the work until 1895, after which he retired with a fortune of nearly \$100,000.

About 1892 Mr. Burton Holmes, having accumulated a large number of views of different parts of the world while travelling for his health, decided to take up the stereoscopic exhibition work, and began by exhibiting over practically the same circuit, as that shown to by time, and Mr. Holmes wisely added this valuable feature to his stereoscopic exhibitions. Mr. Holmes enjoys the distinction of having shown his entire series of five sets of views covering five successful weeks at the Auditorium Theatre Building to 3,500 people every evening, nearly every entertainment being repeated from two to three times.

The appreciation shown by the public and the excellent merits of Mr. Holmes' series of entertainments has been amply endorsed by flatterings "press comments" from all of the big newspapers of Chicago, New York and the other great cities of the country. Mr. Holmes' "Traveling" series, as he calls them, have also become very popular during the past two years in England.

Mr. Elmendorf has been for several years very popular in this line of work in and around New York, but last year he made his first appearance in Chicago and was favored with full houses for his entire series of the entertainments and the repetitions of the same.

The Outfit For The Traveling Exhibitor should contain a complete and suitable apparatus for the projection of a complete and motion picture views, together with a subject in which the public generally will be interested. The outfit should also include advertising posters, admission tickets, and a small printing outfit for filling in dates, name of subject of exhibition, etc. The "Instruction Book and Business Guide" also is a very important item, that is included with every one of our complete outfits. Owing to the superior merit of motion pictures, some prospective exhibitors get the impression that the exhibition should consist of nothing

225 DEARBORN ST., CHICAGO, ILL.

go else. Such a view is a mistaken impression, unless it should be the intention of operating a Nickelodeon or Five Cent Theatre in a tent or store room, giving thirty minute shows at intervals throughout the afternoon and evening, but in this case, it would not come under the heading of "Traveling Exhibitor's Outfit."

The traveling exhibitors who have been most successful in giving exhibitions in theatres, churches, judge halls, etc., give a full evening's entertainment, covering a period of about an hour and a half. The principal part of which consists of stereoscopic views, which are interspersed throughout with a good selection of motion picture views. The only way to show views where the beauty of the scenery, etc., is the important feature, is with the stereoscopic, while on the other hand, where there is much action in the scene, the use of the motion picture is almost imperative. The stereoscopic views are restful to the eyes, while the motion pictures are somewhat tiring, hence an exhibition covering a period of an hour and a half and consisting of only motion pictures would become tiresome, while a mixed entertainment would be thoroughly enjoyed all the way through. This fact is amply evidenced by the practice of the acknowledged leaders in this line.

Many traveling exhibitors use illustrated songs in combination with stereoscopic song views and motion pictures. The songs may be sung by someone connected with the exhibition, by local talent or by a talking machine.

Five and Ten Cent Theatres Pay Big Money.

The success of a Theatrical depends almost as much on the class of pictures shown as on the machine. With a good machine and good pictures, your success is assured. It is the quality of the pictures that brings continued patronage, and the more perfect they are the more they are appreciated, while poor pictures will quickly ruin a business.

We have for rent some of the finest films on the market, photographically perfect as to scenery and make-up, and so clearly printed that they show up every detail, which is a thing lacking in most rental films. We have, in conjunction with the rental films, a large stock of beautiful colored song slides of the latest and most popular songs. As we have a standing order with the largest song slide houses in the country for their latest productions, we are in a position to give you the best and most up-to-date service. A trial will convince you that we can and do increase your receipts. Our rental prices are very low in comparison with the class of service rendered.

Why not get in line and start out right? It will cost you no more to get a good machine and pictures, and then you will have the satisfaction of knowing that you have the finest outfit obtainable. If you wish to be successful in the moving picture business let us demonstrate to you that we can increase your receipts. We have made other people successful and can do the same for you.

We always have on hand a large stock of films and song slides and never duplicate. Our subjects comprise Religions, Pathetic, Humorous and Dramatic; morally clean, yet full of life and entirely up to date, and which will not offend the most critical. We also furnish with some of the subjects large advertising posters, which, when displayed in conspicuous places, are sure to draw a crowd.

WRITE FOR SPECIAL CATALOGUE of Machines and Supplies for Theatre Work.

The Illumination best adapted to the requirements of the traveling exhibitor is by means the calcium light. Electricity is a little stronger than calcium light and may be used to advantage where connections may be made, but the calcium light is more natural, lacks the dazzling whiteness of electricity, gives a more natural appearance to the pictures, and may be depended upon under all conditions, and the Enterprise. Portable Gas Outfit will be found to be the most satisfactory means of supplying the gases. The San River, Gasoline Vapor, Vapo Search Light, and Acetylene are extensively used by traveling exhibitors, but usually where only stereoscopic views are shown.

CHICAGO PROJECTING CO.

Another reason for the continued success of motion pictures is that for amusement the public demands something new all the time. The motion picture show is probably successful to a greater extent than any other class of public amusement in affording variety.

Another reason for the success of the motion picture is because of the exact interpretation of things true to life. Scenes are reproduced with an accuracy that cannot be approached by any kind of stage acting. They are simply true to the approach by any kind of stage acting. They are simply true to the approach by any kind of stage acting. This reason for the success is because of the low price at which entertainment of this class can be furnished. The expense of running a show of this kind being exceedingly small, the price of admission may be made correspondingly small and yet pay large profits. The promoter of the enterprise, in motion pictures, place the most entertaining kind of amusement within the reach of the masses, who have hitherto been unable to enjoy recreation for so little.

Some go so far as to say that the time is near at hand when the day will be depicted with a reality that cannot be approached by the papers and magazines. Such events as the San Francisco Disaster, the Coronation of King Edward, or the result of the races may be viewed with all the reality of the original within a few days after the event has taken place.

No Competition to Fear.

[illegible]

One of the Advantages to be gained through purchasing an outfit is the opportunity of **Large Advertising Posters** which to duplicate these we could not do alone, in some instances, cost twice the price and take a great deal of time. By producing these posters in and outside both a large out, but also a quantity of admission tickets and other necessities that are included with the outfit without additional charge.

New Goods and New Catalogue. All of the instruments, listed in this catalogue are of the very latest design, and supplies them having made their first appearance on the market with this issue of our catalogue. If the exhibitor is to make the best of his chosen

225 DEARBORN ST., CHICAGO, ILL.

profession, he must be equipped with good instruments and apparatus. While the opportunity for profitable investment in this line is usually small, one who would start in handi-capped is almost sure to fail. The quality of the equipment is important. For example, even though a good swimmer, one may be unable to swim a river with a stone tied to his back. We do not want to undertake to swim a river when we are aware of the fact that we cannot handle second hand equipment. The equipment must be new. We do not want to swim a river when we are aware of the fact that we cannot handle ninety-nine out of a hundred. The good equipment is usually sufficient to warrant the original outlay, and then by the prospective purchaser. We do not want to swim a river when we are aware of the fact that we cannot handle our patrons as we would like to. We do not want to swim a river when we are aware of the fact that we cannot handle the best quality of goods obtainable at the lowest cost and with the least margin of profit. We endeavor to be in the best of luck on such slides or films that are made to dispatch, and to order that there need be any delay.

The Business is Easy to Learn.

There is nothing mysterious or complicated about the operation of the instruments. On the contrary, they are very easy to learn and use. Any one of average intelligence, with the assistance of our "Instruction Book," easily can learn to operate them with perfect ease. We have done everything possible to simplify and make the operation of our line of instruments and apparatus, and have endeavored to leave nothing undone in the line of printed instruction and care for the instruments. These instructions have been supplemented by numerous diagrams and cuttings, and we would make plain that any one of ordinary intelligence can have no difficulty in successfully following them.

Discounts. While it was at one time customary to issue catalogues with prices advanced or reduced, the purpose of giving discounts, that practice has been almost entirely dispensed with except, with a few houses, where the purpose of getting more for a dollar's worth of goods, and the discounts themselves, that because the price is not a goal, the discount which may not be offered by the owner is a delusion. The same to compare prices and values. The discount is a delusion. The same discount is invariably applied to every applicant for prices, but the discount is invariably deducted it will be found by comparison that the price of the product is deducted it will be found by comparison that the price of the product is considerably in advance of ours. It's simply a way of fooling the people.

To us one man's money is as good as another's. We want no excessive profits. We have listed our goods at prices that will net us the percentage of profit on which we can afford to do business.

Our Special Outfits for traveling exhibitors are offered at a little less than individual articles, first, because we can handle a big order proportionately cheaper than we can handle a small one, and, second, because it is to our interest to get people started and, in view of their future patronage, we can afford to sacrifice a little on the same principle that a wholesale house will spend more money to get a customer started than they could afford to consum-

A careful comparison of our catalogue and our prices and values with those of other houses, should convince you that our prices are right, that we are offering you greater values than you can get elsewhere, and that you will get fair and just treatment if your orders are placed with us.

To those who expect to start as well as those who are already in the business, we earnestly solicit an opportunity to convince you that we can handle your orders in a way that will merit your future patronage. We are always willing and glad to answer questions, and whatever else you may wish to know, do not fail to write us.

Yours truly,

Yours truly,

CHICAGO PROJECTING CO.

CHICAGO PROJECTING CO.,

The Motion Picture Machine.

One of the greatest and most wonderful of recent achievements is that of producing pictures in motion. By the use of motion pictures it is possible to make a complete photographic record of every motion of any object that is before the camera, and with the aid of the motion picture machine and powerful condensed light, these same motions may be reproduced as many times as desired, the pictures being shown in large size and as natural as life. By this means records of events may be viewed by thousands of people, thus giving them a correct

idea of the entire performance as it originally occurred.

To illustrate more clearly, we will describe an incident as it would be shown in a theatre, church or hall. The house is darkened and, as the lens of the motion picture machine is uncovered, there seems to open before the audience a

huge window. Through this window they see a milk-kneading comedy of the Sunny South, full of laughter from start to finish. A typical Southern darkey is devouring a section of fried chicken. The play opens with an interior view of a genuine chicken coop, in which over a hundred chickens are seen on their roosts at night. Two chicken thieves creep into the coop and gather in a bagful of the plumpest fowls. When the theft is discovered, the farmer and his son set an immense bear trap on the side of the coop, preparatory to another visit by the thieves. Next scene shows a chicken dinner in a typical darkey cabin, faithful after another load, and the bear trap gets in its work. The succeeding scenes are limited to give the effect of moonlight. There is a wild pursuit of the chicken thieves through the woods and country roads by a posse of farmers, and the other with the bear trap still on his leg, arrives at his cabin while a dance is in progress and is concealed in the attic. The farmers burst in and search the place, and are about to leave when there is a terrific crash, and the chicken thief comes down through the ceiling amidst a shower of bath and plaster head first, hanging by one leg fastened in the bear trap which is caught to the rafters.

The picture described above is entitled "The Chicken Thief," which will be found in our regular list of motion picture films.

14

225 DEARBORN ST., CHICAGO, ILL.

The optical principle of the motion picture machine is the same as that of the stereopticon, only that the pictures for the motion picture machine appear on a transparent film, and pass before the lenses in rapid succession.

The film is a long transparent celluloid tape $\frac{1}{4}$ inches wide, (See introduction to Motion Picture Films) the length varying with the duration of the scene that is being illustrated. On the film is a series of photographs about $2\frac{1}{2} \times 1$ inch, taken at the rate of from fifteen to twenty per second, and to produce the animated movements, the films are moved past the projecting lenses at the same rate of speed, with a fractional stop between each picture. On a film one hundred feet in length there is a series of about 1,200 separate and distinct photographs, each one slightly different from the other. From the beginning to the end of the film all the movements will be recorded that have been exhibited before the camera at the time the picture was taken. For each subject that is to be illustrated, a separate film is necessary.

For the production of motion pictures, the indispensable elements are, a source of illumination, "A" condensing lenses, "B" for gathering and condensing the light rays, and passing them through the picture on the film "F" to the objective lenses, "E" of the motion picture machine, where it is magnified and projected on the screen "G" where the pictures are displayed. The machine must be provided with a mechanism for intermittently moving the film so that each successive picture in its turn appears before the objective lenses, and an automatic shutter to successively cut off the illumination while each picture is being moved to place. What is called "persistence of vision" is dependent upon for the blending of one picture with each succeeding one. The motion picture machine must also have a means of framing the picture, by which is meant bringing the picture to a position that will accurately register its margin with the edge of the light opening in the machine.

It must also be provided with satisfactory reeling mechanism for unwinding and winding up the film as it passes through the machine. Objective lenses of the highest standard of quality are an indispensable element to high grade motion picture work. Owing to the small size of the picture on the film, which measures only about $2\frac{1}{2} \times 1$ inch, great magnifying power is required to produce a picture of the required size on the screen, and as the detail of the picture on the film is very small, nothing but a first-class lens is necessary to the production of all of this and many other requirements.

In the new Model Optigraph No. 4 Model 1907 we have endeavored to provide every possible requirement in the way of adjustments and conveniences that will contribute to the highest grade of motion picture work, and to the comfort and satisfaction of the operator. We invite your most careful investigation of the New Optigraph, as we believe it to be the best motion picture machine to be had, and are pleased to recommend it as the best to all those who are considering this line of work.

Other lenses of
focus extra, see
list.

Optigraph No. 4 is the best motion picture machine to be had for anywhere near the price.

235 DEARBORN ST., CHICAGO, ILL.

FORTY REASONS **WHY** **The New Optigraph No. 4** **Is the Best Motion Picture Machine to be had** **for Anywhere Near the Price**

No. 1 New Framing Device is a most important feature and one which places the New Optigraph No. 4 a long distance in advance of other machines, in that the shutter does not change position with relation to the "optical axis" of the lens while framing the picture, as in other machines. The film may be placed in the machine without any consideration of the relation of the pictures to the "light opening" or "optical axis of the lens," and when started in motion the picture may be instantly framed with the greatest ease and exactness and without sacrificing the correct relationship of the shutter to the lens and light opening.

Note:—By "Framing" is meant the act of shifting the film to make the margin of the picture coincide with the margin of the light opening in the machine.

No. 2 The Optigraph No. 4 mechanism is a "Universal" machine in that it is equally adapted to use with a regular motion picture lamp, house, or with a single, double or triple dissolving stereopticon. The Optigraph possesses the distinction of being the first machine designed for such purpose.

No. 3 It has Universal Sprocket Wheels, adapted to use any and all makes of standard gauge film, and so designed and proportioned as to cause the least possible wear on the films, and thus prolongs their life to the maximum, with the result that where the machine is used a great deal it may save its cost from once to twice a year in saving on films. The width of standard gauge motion picture film is one and three-eighths inches.

No. 4 Steady Pictures is the one feature above all others that stands for superiority in a motion picture machine, and in this accomplishment we are proud to be able to say, "The Optigraph No. 4 is a wonder." Accurate workmanship, design and some special features of Optigraph construction are responsible for this most important advantage.

No. 5 Reversing the Film, or running it backward can be done safely with no machine other than the Optigraph, because, to run a film backward requires certain features of construction that are not found in other machines. By the judicious use of the backward movement of films, many ludicrous and very laughable effects may be produced, and many short films may be prolonged to more than twice their original length. Imagine horses going backward at full gallop, people diving, and many other things coming from the water feet first, alight on a running backward, articles or people jumping upward from the ground to the top of a wagon, divers coming from the water feet first, alight on a spring board and run backward and a thousand other ludicrous, unusual and very humorous happenings. To produce reverse effects with other machines it is necessary to have films made by "reverse printing" which unfits them for any use other than the reverse or backward movement.

No. 6 Absence of Noise is another great advantage in favor of the Optigraph. This important accomplishment is the result of a class of material and special arrangement of parts not to be found in other

CHICAGO PROJECTING CO.

machines. With the Optigraph it is not necessary to keep a piano, orchestra or other musical instruments going to cover the noise while showing the motion pictures.

No. 7 The Improved Automatic Take Up Attachment has geared connection (no chains), is smooth running and positive in its action; may be quickly attached and detached at will, and has a substantial support bar; detachable head, is well made of the best materials, is light in weight, yet durable and always dependable.

No. 8 A Detachable Spring Actuated Ball Crank Handle forms a part of no machine other than the Optigraph No. 4. By its use there is no danger of burning your film by reason of the handle accidentally coming off and allowing the machine to stop. The handle may be instantly detached for safety during transportation.

No. 9 The Framing Handle may be instantly folded to a place of entire safety without the use of screw driver or thumb screws, a feature which is a very great advantage when packing the machine for transportation. This feature is found in no other machine.

No. 10 The Compound Changeable Speed Rewind Reel Head belongs to the Optigraph and to no other machine. By its use films can be quickly re-wound and without fatigue. It has two speeds; a fast speed to be used while the roll of film is small, and a slow speed when the roll becomes large.

No. 11 It Has High Grade Lenses, without which no machine can project good pictures. A high grade lens must have large glasses to prevent loss of light, but large glasses require the greatest care and accuracy of workmanship in order to get a sharp and uniform picture. The lenses of the Optigraph No. 4 give the maximum of illumination with perfect definition. They were designed and are ground and finished by experts in optical projection lens work. We claim them to be far superior to other so-called high grade lenses.

No. 12 A Wide Range of Focal Without Excessive Cost is an important advantage to be enjoyed by the purchaser of a No. 4 Optigraph. Other makers usually furnish lenses which do not offer similar advantages. Our lens is included with every Optigraph No. 4 and the purchaser may add additional cells only to obtain other focal lengths.

No. 13 Interchangeable Lens Cells is responsible for a **Great Economy** in lens purchases. By their use only one lens body is required and that is the best that can be made. Different sizes of pictures may be projected without changing distance between machine and screen by simply changing the cells in the lens. The cells are all marked with numbers to avoid the possibility of mistakes in selection.

No. 14 A Wide Range in Size of Pictures may be accomplished by the use of the Optigraph interchangeable lens cells, which enables the projector to project his machine in any part of the hall that is most convenient, and yet project a picture of suitable size. By simply removing one part of cells from the lens body, and substituting those of another number a picture of a different size may be obtained.

Also, each cell is equipped and is furnished with each complete lens set of lens cells (except the 3 inch which requires none) to locate the mounting the proper distance away from the film to bring the lines into focus. A "Table of Sizes" showing the different sizes of pictures that may be projected with the different lenses at given distances and a complete description of the New Optigraph Motion Picture Lenses will be found under the heading "Motion Picture Lenses."

No. 15 The New Style Spiral Lens Body with triple bead knurled focusing and is absolutely unapproached for ease and accuracy in focusing, convenience, in other design and finish. The casing is finished in a rich yellow Egyptian bronze lacquer; the focusing hand is of solid plate and the cells are finished in black enamel. The different colors are thus combined to bring about the most artistic effect. This new style lens mount is a very marked improvement over the old style "rack and pinion" focusing movement, and further more it is not liable to injury in transportation.

No. 16 Improved Film Pressure Springs make it possible to apply a uniform pressure to the film, to keep it at all points in perfect

225 DEARBORN ST., CHICAGO, ILL.

focus and perform a function in the production of steady pictures that cannot be done with the ordinary springs in general use.

No. 17 The Universal Reels and Universal Clamp makes it convenient in cases where films are rented, to use the films from reels furnished by the rental companies instead of having to transfer the film to another reel. The reels are not subjected to inconvenience almost instantly, and the operator is not subjected to inconvenience and delay as experienced when changing reels on other machines.

No. 18 Improved Reel Clamps which clamp the reels securely on the reel spindles are a means of imparting positive and steady movement to the film reels and at the same time of preventing the reels from accidentally tearing the film or of slipping off the spindle.

No. 19 Fire Proof Film Magazines that may be quickly attached to or detached from the reel heads, afford a means of protecting the films from accident in case of neglect on the part of the operator. The film passes through a roller trap which will instantly extinguish a flame.

No. 20 It has Solid Steel Reel Arms and Solid Brass Reel Heads.

No. 21 The Reel Heads are Separable from the reel arms by simply turning a thumb set screw, which is considered a great convenience for packing.

No. 22 The Cylindrical Shutter is an Optigraph invention, and being entirely enclosed it is free from accidental breakage, a source of much annoyance to operators who use other machines. This shutter is double acting and is the only type of shutter that gives uniform exposure. It is quick in its action because it opens and closes from both top and bottom at the same time, dispenses with the flicker and makes the pictures smooth and pleasant to the eye.

No. 23 Two Idler Rollers for holding the film against the sprocket top and bottom at the same time, dispenses with the pressure roller wheel, insures good contact of the film with the sprocket teeth.

No. 24 Adjustable Tension is provided for the pressure roller frames which enables the operator to use any amount of tension he finds necessary.

No. 25 The Eccentric Stop for the idler roller frames prevents excessive pressure and wear on both the feeding sprockets and the film, as well as on other parts of the machine. It may be so adjusted that the rollers will barely touch the film, still the frame will be held firmly by a strong tension against the eccentric stop.

No. 26 The Spring Door Stop holds the door where it is wanted, either open or shut.

No. 27 The Heat Arrestor Disc protects the film, door, springs, etc. from excessive heating while the machine is in operation.

No. 28 Absence of Friction on the picture prevents the disagreeable vertical streaks called rain; also the flashing of light spots, both of which are due to pictures coming in contact with the metal parts or rollers of the machine. In the Optigraph, every possibility of that nature has been eliminated.

No. 29 The Improved "Vise-Grip" Sliding Base is distinctly different from any other machine. It holds the machine as firm and solid as if in an Optigraph product and there is nothing like it that comes as a part of any other machine. It holds the machine as firm and solid as if in an Optigraph product and there is nothing like it that comes as a part of any other machine. It holds the machine as firm and solid as if in an Optigraph product and there is nothing like it that comes as a part of any other machine.

No. 30 Interchangeable Parts affords a great convenience to the operator, for, in case of accidental breakage of any part, a new part may be had from stock to take its place.

No. 31 Simplicity is a very strong point in favor of any machine, and the Optigraph is no exception. It is so simple that it is easy to get out of order, and the simpler it is to operate, the less liable it is to get out of order, and the simpler it is to repair in case it does get out of order.

No. 32 A Compact Machine is a great convenience to the traveling exhibitor, because every inch and every pound of additional baggage is that much additional burden. The Optigraph is exceedingly compact and instead of having much of the working parts exposed to accident, they are contained on the inside of the machine. The Di-

The Optigraph No. 4 runs Seven Months, 210 Nights, 1680 Shows without Repairs or Trouble.

SEYMOUR, ILL., June 3.

Have been running this machine every night since October 25th, and have not had any trouble with it, having made an average of eight runs every night with it.

Yours truly, J. E. B.

dimensions of the No. 4 Optigraph are as follows: Height from bottom of round base to top of lens, 8¼ inches; to upper reel, 12½ inches; to center of light opening, 9½ inches (when on the sliding base about 1 to 7 inches). Length from belt arrester disc to front of crank from center to handle, 3 inches. Width of round base, 3½ inches. Length and width of Sliding Base, 24" x 5 inches. Length of lamp house: Height, 11 inches; Swing of Sliding Base, 5½ inches; backward and forward swing, 1½ inches.

No. 33 The Weight of the Mechanism No. 4 without take up is 24 pounds; take up device, 2½ pounds; sliding base, 3½ pounds; Optigraph with motion picture lamp house, base head and wire, 9 pounds. Are lamp, rheostat, knife switch and

No. 34 Capacity There is no class of motion picture work that is too difficult for the Optigraph.

No. 35 Economy may be installed in several ways by the purchase of an Optigraph motion picture machine, viz: 1st. The first film in a single year may amount to two-thirds the price asked for the machine. 2nd. The saving on the cost of the machine. 3rd. Probably nothing will be required for repairs, but by others for similar parts.

No. 36 The Best Material is none too good for the construction of a machine from which so much is expected, and in the Optigraph the best material is used. When others use the cheapest grade of steel, the cost is used in the Optigraph, and we trust the prospective purchaser will take due account of these important matters, before placing his order.

No. 37 Workmanship is only one of the many points that are prominently conspicuous to one who knows, and on this point the Optigraph is made in a shop that is thoroughly equipped, not with the ordinary machine shop machinery, but with the best class of machinery that is designed only for the work. The many special tools and machines are used and the manufacturing is done, by men who have had a life-long training in the best class of work.

No. 38 Durability is a vital point. If the parts are to retain their steady pictures, they must be accurately made and of the best material, which means durability.

No. 39 The Artistic Design and Finish of the Optigraph has always distinguished it from other machines.

No. 40 The Number of Optigraphs sold has probably been greater than of all other motion picture machines combined, which is evidence of the fact that the buyers and users of motion picture machines are well satisfied with the merit of the "40 Reasons" WHY YOU SHOULD BUY THE OPTIGRAPH No. 4 MOTION PICTURE MACHINE.

Remember that the "40 Reasons" that form the foundation of the Optigraph are not only covered many years ago by United States Patents, but are also covered by other important Optigraph Patents. Thus it can be seen that the Optigraph is not only handicapped, and must sacrifice vital elements of its merit by both himself and the user liable to prove

.... **No. 4 Take Up Attachment**

For the New Optigraph No. 4,
Model 1907
Motion Picture Machine

This attachment was designed to fill the requirements of those who prefer to have their films rolled up on a reel as they pass through the machine instead of running them into a bag, box or other receptacle. It is constructed on the same plan as the upper reel, except that it has the feed sprocket on the reel arm instead of being on the body of the machine.

The No. 4 Take Up Attachment has a geared connection with the main part of the machine and is held in place by a bolt and thumb nut which form a part of the device. The geared connection is positive in its action and will not catch or bind as in chain-driven mechanisms. A metal strap attached by a thumb screw to the upper part of the main frame of the Optigraph serves as a rigid support and relieves the bolt of any unnecessary strain.

The attachment may be instantly attached or detached by the manipulation of two thumb screws.

This attachment is intended for use only with the No. 4 Optigraph and cannot be used with the No. 3 1/2 Optigraph.

... **PRICE** ...

The No. 4 Take Up Attachment, with belt and 8 inch reel....\$ 8.00

The reels used on the Take Up are the same as for the body of the machine.

The No. 4 Take Up Attachment, with Compound Rewind 11.50

Reel Head instead of plain Reel Head.....
Note: The compound rewind is intended to be used on the upper reel arm, but where the Optigraph has been ordered with plain reel head and it is desired to add both "Take Up" and the "Compound Rewind" they may be ordered in combination, then the two reel heads may be interchanged, placing the Compound Rewind on the top arm.

CHICAGO PROJECTING CO.,

The Compound Rewind Reel Head .: Fireproof Magazines.:

Another Important Optigraph Improvement for 1907

For the New OPTIGRAPH No. 4 Model 1907

The object of this attachment is to furnish a convenient means of rewinding the films after they have been run through the machine. This attachment is patented and possesses two very great advantages over anything ever devised for a similar purpose. First, it has two speeds, one which gives three revolutions of the reel to one of the long films of 800 to 1,000 feet or more. The other speed gives one-half of revolution of the reel to one of the handle and is used for the last half of the long films.

The second improvement is, that instead of using a short handle as is customary on other rewinds that form a part of a motion picture machine, the main crank handle from the body of the machine is used which prevents fatigue even where the machine is in constant use as in "continuous show" motion picture work.

The handle may be quickly attached and detached by pressing a catch bolt.

....PRICE....

Compound Rewind Reel Head, without arm, or handle.....\$7.50

28

225 DEARBORN ST., CHICAGO, ILL.

The object of these magazines is to provide protection to the film while in use in case, through carelessness of the operator, the film should become ignited. The magazines are made of strong sheet metal, are spun to shape, corrugated to give strength, are neat and artistic in both finish and design. Being circular in form, they conform to the shape of the reels, hence there is no waste space, or superfluous weight, and they are much more artistic, also more convenient than if made square.

Each magazine is equipped with a "Trap" consisting of a pair of rollers through which the film passes to and from the machine. As these rollers are held in contact by spring tension, the film cannot burn beyond the point where it passes between them. The cover of the magazine is provided with spring catches to hold it in place.

The magazine is mounted on a metal spider which fits on to the reel head and is held in position by screws. But a few moments are required to attach or detach the magazines from the reel heads. The magazines are interchangeable with both the upper and lower reel heads.

CHICAGO PROJECTING CO.

Motion Picture Objective Lenses.

The Motion Picture Objective serves the same purpose for the motion picture machine as the stereopticon lens does for the stereopticon, and is constructed after the same general plan, but owing to the fact that the enlargement for motion pictures must be many times greater than for stereopticon pictures, the requirements are proportionately more exacting. The picture of a motion picture film measures little less than 2 1/2 of an inch by 1 inch, while the picture portion of a lantern slide view is a little less than 2 1/2 by 3 inches. From this it will be seen that the magnifying power of the motion picture lens must be three times greater to produce the same size picture on the screen, and it naturally follows that in order to secure satisfactory results the lens must be made with the greatest possible degree of accuracy. In order to secure sharp detail, and depth of focus, both of which are absolutely necessary to the production of good pictures.

In our "Roe Special" Motion Picture Lens we have endeavored to leave nothing undone that would contribute to the best results. The lens has been designed by an expert in this line; one who has devoted himself to this line of work ever since the introduction of the motion pictures. Every stage of the manufacture is conducted by the most thorough mechanics who have had long experience in this line of work, and from the lens glasses to the mountings every piece and part represents the best in both material and workmanship.

In the planning of this new line of Motion Picture lenses, our action has been the same as on our new line of stereopticon lenses; viz., a radical departure from the old system of measurements, and in keeping with the rapid progress in this line of work. Instead of giving each lens by its equivalent focus in inches, which means the distance between the motion picture film and a point between the two sets of lens glasses at which the light rays cross, this point being usually a little in front of the dividing line between the two lens cells. The different lenses at varying distances from the screen, while the figures represent the height of the picture on the screen. The upper lower figures represent the width. The figures in the left hand column represent the focal length of the Motion Picture lens, while the figures in the right hand column represent the focal length of the stereopticon lens best adapted to match the motion picture lenses in the respective horizontal columns.

225 DEARBORN ST., CHICAGO, ILL.

Our Way of matching Motion Pictures with Stereopticon views is shown in the diagram herewith. The solid line represents the margin of the Motion Picture view, while the dotted line represents the margin of the Stereopticon view. These proportions result in a harmonious and pleasing effect that is entirely absent in any other arrangement. Some dealers and exhibitors match the sides and disregard the top and bottom. Our table of comparative sizes has been calculated on the proportions shown in the diagram and unless otherwise instructed we will fill orders accordingly.

The focus of both Stereopticon and motion picture lenses vary sometimes over 10 per cent, hence the size of picture will vary accordingly. For more accurate matching, we make an extra charge of \$3.00.

A Special Feature of the "Roe Special" Motion Picture lens and one of very great convenience and economy, is the interchangeable lens cells, by the use of which it is unnecessary to have anything more than one mount. By purchasing additional pairs of lens cells for the various feet, they may be interchanged in the lens mount to produce the sized picture desired. When using lenses of longer focus it is necessary to extend the lens mount further from the body of the machine, and for this purpose we provide what we call extension collars, each of which is designated by the length of focus of the lens.

For the new "Roe Special" Motion Picture lens we have designed an entirely new mount in which a knurled ring that encircles the mount, working in spiral grooves, is used for focusing instead of the old-fashioned rack and pinion, which is not only cumbersome and awkward, but constantly exposed to accidents in transportation. The spiral focusing device is in keeping with the progress demanded in this line. It is a little in design, and provided with the finest adjustment for focusing. The lens barrel and focusing ring are nickel-plated; the lens cells are enamelled in black; the lens body is finished in Egyptian bronze lacquer. The combination makes a very pretty and harmonious contrast.

PRICES

The "Roe Special" Motion Picture lens, 3-inch focus, each.....\$8.00
The "Roe Special" Motion Picture lens, 3 1/2, 4 or 4 1/2 inch focus including extension collar (except for the 3-inch), each.....\$8.50

The Adjustable Motion Picture Lens.

suitable for any make or style of motion picture machine. The object of this lens is to enable the operator to project any size picture he desires, within certain limits, without changing the distance between the instrument and the screen. The focus is obtained by turning the milled thumb nut, the same as with any other lens, while the size of the picture is increased or decreased by turning the front flange of the objective, as indicated by the hand. It is not necessary to re-focus after changing the size of the picture.

The following table will show the possibilities with the adjustable objective.

At 20 feet distance, any size picture between	4 and 7 feet
" 20 " " " " " "	6 " 10 "
" 40 " " " " " "	8 " 14 "
" 50 " " " " " "	10 " 17 "
" 60 " " " " " "	12 " 20 "
" 80 " " " " " "	16 " 26 "

Price of the Adjustable Motion Picture Objective Lens.....\$10.00

Notes: Price of this objective fitted to the Optigraph will be quoted on application.

Spun-Cone and Sub-Condenser.

The Spun-Cone is of much value for attaching to the rear of the Optigraph to prevent the side illumination from escaping between the Motion Picture Machine and the Stereopticon. When using electric or calcium light only the cone should be used, but when using Vapor Light both the Cone and Sub-Condenser are necessary, as the Sub-Condenser makes a much flatter field, and more intense illumination.

Spun-Cone, price.....\$0.75
Sub-Condenser, diameter 3 1/4 inches, price.....\$1.25

Fireproof Floor Magazines FOR MOTION PICTURE MACHINES

The object of this magazine is to provide a fireproof and dust-proof receptacle into which the film may be deposited after passing through the machine, instead of using a take-up. It also provides a solid support for the Motion Picture Machine.

It is made of heavy galvanized iron, has a spring trap in the top through which the film passes and which may be instantly closed by a spring trigger. It has a large slide door, which is held in place by spring hinges and a spring catch.

This magazine is constructed with great care, and has been designed to meet all of the requirements of these cities which have strict fire insurance regulations, and other restrictions in the way of city ordinances, etc.

Weight, net about 35 lbs. Weight, crated for shipment, about 50 lbs.

Certificate of Inspection from the city electrician of Chicago, when desired, extra \$1.00.

PRICES

No. 2 Film Case, to hold two reels, each.....\$2.00

CHICAGO PROJECTING CO.,

The Stereopticon.

The origin of the Stereopticon dates back to the time of the Pyramids, at which time it was called a "magic lantern" on account of its mysterious results produced by it. At that time, however, it was nothing more than a toy. The Stereopticon of to-day is an optical instrument used in connection with a powerful light for the purpose of

illuminating transparent photographic views and projecting large images of them on a white surface at a considerable distance from the instrument, making them visible to large audiences. The essential parts are, a pair of condensing lenses, "B" and "C", an objective lens, "E", a frame for supporting same, and a suitable casing to prevent the illumination from escaping except through the lenses.

The two condensing lenses "B" and "C" are usually $\frac{1}{4}$ inches in diameter with a flat surface on one side and a convex surface on the other, the convex surfaces being placed towards each other as indicated by "B" and "C" in the above diagram. The objective lens consists of a suitable cylindrical mounting, containing two lens cells or combinations, "E" and "F", each of which is composed of two glasses of varying refractive power, one called "lens" and the other called "crown." The function of the condensing lenses is to collect and condense the illumination and direct it through the glass slide or stereopticon view, the position of which is indicated by the smaller arrow, into the objective lens, the office of which is to magnify the picture and form an image of it on the screen, the position of which is indicated by "G." In passing through the objective lens the light rays cross at a point "D" which is almost midway between the two combinations "E" and "F." The distance be-

tween this crossing point and the position of the stereopticon view as indicated by the small arrow, is called the focal length or equivalent focus of the objective lens. On the equivalent focus of the lens depends the distance between the stereopticon and the screen upon which the pictures are to be projected, when a certain size picture is desired. In other words, when it is desired to project a picture ten feet in diameter, if you are using an objective lens of a inches equivalent focus, the distance between the stereopticon view and the crossing point of the light rays "D" would be 4 inches, while the distance between the crossing point and the screen "G" would be 20 feet, as shown in Fig. 1. If the construction of the hall in which the exhibition is given is such that it would be more convenient to operate it at a distance of 40 feet from the screen, and it is desired to project a 10 foot picture as shown in Fig. 2. The only reason for having objective lenses of different

225 DEARBORN ST., CHICAGO, ILL.

focal lengths, is for the accommodation of the operator in allowing him to place his instruments at the most convenient point in the exhibition hall. With a lens of any length of focus any size picture can be made by varying the distance between the location of the stereopticon and the screen on which the picture is to be projected. By placing the instrument farther away, a larger picture will be made, and by placing it nearer, a smaller picture. As a rule, however, stereopticon lenses of 10 or 12 inch focus will fill the requirements, and unless otherwise specified, we usually furnish the 10 inch.

Owing to the crossing of the light rays, the position of objects is always reversed, for which reason it is necessary to place the stereopticon view upside down so that it may be projected on the screen right side up.

With weaker forms of illumination, it is best to work close to the screen, using a lens of not over 10 inch focus as the light becomes weaker in transmission over longer distances. For further particulars on lenses, see introductions to stereopticon lenses and condensing lenses.

Dissolving Views constitutes the highest art in the projection of stereopticon or magic lantern views, and is accomplished by the use of two lanterns or stereopticons, the lenses of which are exact duplicates of each other. Usually they are placed one on top of the other, and so located that views projected by both instruments will occupy the exact same spot on the screen. To accomplish this adjustment, called the register, the top instrument is provided with adjustable supports by which either a horizontal or vertical adjustment may be secured. To produce the dissolving effect, a slide is placed in the carrier of each stereopticon and by mechanical means the illumination in one instrument is gradually reduced, while in the other it is gradually developed to full brilliancy, with the result that one view gradually fades away, while the other grows to full brilliancy, the change from one to the other producing a most pleasing and satisfying effect. After changing the views in the stereopticon, in which the illumination has been reduced, the dissolver is reversed, with the same results as before, and so continued throughout the entertainment.

When Using Calcium or Acetylene Light, the dissolving is accomplished with what is called a dissolving key, which turns the gas from one stereopticon to the other. When using electricity, the dissolving is accomplished by a cut-off used on the front of the objective lenses, called a mechanical dissolver. This will be found illustrated on another page. In using the mechanical dissolver, both illuminants are allowed to remain full on, while the dissolving is accomplished by allowing one lens at a time with the dissolver, and gradually shifting the dissolver to the other lens. The dissolving effects in stereopticon work is without exception used by the best known operators and lecturers, who have made fortunes in this line of work. Perfect dissolving view work is however accomplished only by the use of calcium light as an illuminant.

A triple stereopticon and tintar slides are used by some for the purpose of accomplishing certain fancy results in the way of changing day scenes to evening or night, and for the showing of certain movable effects. The showing of evening, moonlight or night effects is usually accomplished by having the picture slides made in various tints, and accomplished by having the double stereopticon.

The Value of a Stereopticon depends upon the quality of its lenses and upon its arrangement for convenience in accomplishing the various adjustments with ease and speed, and retaining them after they are secured. Our stereopticons are built with a view of affording every modern convenience and of securing every adjustment desired with the greatest possible speed and ease, and of conducting in every possible way to the comfort and convenience of the operator.

Dissolving Views
See description, following page

225 DEARBORN ST., CHICAGO, ILL.

The Peerless Stereopticon

THE BEST, MOST CONVENIENT and EFFICIENT
MAGIC LANTERN MADE FOR THE MONEY

This instrument has been designed to meet the demand for a low-priced, portable, light and convenient Magic Lantern for illustrating sermons and for Church, School, Lodge, Scientific, Home and other work, where the purchaser feels that the purpose will not justify the purchase of a higher priced instrument.

The Peerless Stereopticon

Is strong and well made, has fine quality Condensing and Projection Lenses, rack and pinion for focusing, uses either short, medium, or long focus lenses, has nickel-plated slide rails and tubes, and black bellows, and while it is not so well finished as our Enterprise Lantern, it is well-proportioned, artistic in appearance, does good work, and is much better value than can be had elsewhere for the same or more money.

THE LAMP HOUSE

Is made of planished steel, and is of good size, which permits the use of either the Sun, kerosene, Acetylene Gas, Calcium or Electric Light. This universal feature is very desirable, as no change is necessary other than a burner if a change of light is desired.

THE PEERLESS STEREOPTICON is so arranged that two or more of them may be used in series, one on top of the other, for dissolving work, and as they are all of the same construction, any one of them may be used for either top or bottom.

When two or more Peerless Stereopticons are ordered at the same time the attachments for connecting them are included without cost, but when ordered one at a time the connections are not included, and cost extra.

A DOUBLE SLIDE CARRIER,

Made of polished hard wood, and so arranged as to enable the operator to instantly change and center the views, will be included with each lantern without charge.

.....PRICES.....
THE PEERLESS STEREOPTICON with Condensing and Projection Lenses, Double Slide Carrier and box..... \$15.00
TWO PEERLESS STEREOPTICONS, same as above, with Lenses, Slide Carrier, Connections for Dissolving Work and Box..... \$30.00
CONNECTIONS, when ordered with a single lantern..... \$1.00

The above prices do not include burners, jets or dissolving keys.

CHICAGO PROJECTING CO.,

The Enterprise Single Stereopticon

Is Used in our Special Exhibition Outfits and is the
ACKNOWLEDGED LEADER IN OPTICAL LANTERNS.

MODEL 1906

Patented in the United States and Canada.

The above view shows the Objective Lens Door closed and in position to show Stereopticon Views.

THE "ENTERPRISE" has all the adjustments required for high class stereopticon work, is equipped with the latest improvements, possesses many important advantages over others, is the most artistic in design, the best finished and absolutely the best Stereopticon on the market, a fact that is amply evidenced by the sales, which we believe are greater than of all other stereopticons combined, and it is sold for less money than other instruments of far less value.

Foremost Among the Advantages to be found in this instrument and in no other, is the "Patented Objective Lens Door," which especially adapts the "Enterprise" lantern to use in combination with a Motion Picture Machine, and is of great additional advantage in that it affords a quick means of attaching or detaching the lens, and for examination of or cleaning the lenses.

system of clamps which insures the perfect working and adjustment of all the parts.

The New Vise Grip Clamps for the telescope tubes and rods are infallible in firmly securing the fixed and movable parts and constitute a valuable and important improvement for 1906. Operators who have experienced the perplexing difficulty of having the fixed parts slip out of place, or the adjustments slip fast when attempting to set up their instruments will appreciate the merit of our new

225 DEARBORN ST., CHICAGO, ILL.

Both of these valuable features are illustrated in the cut on the preceding page which shows a partial view of the side of the Stereopticon. The clamp "A" shown in the rear of the cut shows the method of securing the main frame in place on the telescope tubes. The casting is slitted with a saw and drawn together round the tube by two screws which hold it as firmly as if in a vise and yet it does not in any way cramp or interfere with the easy and perfect working of the rods in the tubes which is the case with lanterns constructed that the clamping screws press directly against the tubes.

The New Pin Button lens door latch illustrated

herewith marks another important 1906 improvement. The new latch is attached to the frame of the Stereopticon instead of to the door as in the last years' model and is the means of furnishing a perfectly rigid and always dependable means of holding the door in a closed position.

When Motion Pictures are to be combined with Stereopticon views, the "Enterprise" will be found invaluable owing to its special adaptation to this class of work. The "Sliding Attachment" or "Sliding Base" for the Motion Picture Machine may be attached at any time by means of screws. By the addition of the Motion Picture Machine in this manner, the change from stereopticon views to motion pictures and vice versa may be made almost instantly.

The Universal Lamp House affords a great advantage to the traveling exhibitor in that it is large and roomy, and any form of illumination may be used by simply changing the burner. It is made of the best grade of planished steel and is well ventilated.

Dissolving Views, which constitute the highest art in Stereopticon Projection work, may be produced with the most perfect results by adding at any time the upper "Enterprise" Stereopticon as listed and further described on the following page.

Objective Lenses of any kind may be used on the "Enterprise" Stereopticon and the bellows are of sufficiently long draw to accommo-

MODEL 1906

The above view shows the Objective Lens Door open to make room for the Motion Picture Machine.

date them. Unless otherwise instructed we will furnish lens door with opening to accommodate the largest size lens ordered, in which case adapting or reducing rings as listed on another page will be required for the use of lenses of smaller bore.

CHICAGO PROJECTING CO.,

The Eccentric Collar at "C" is attached to the front end of the telescopic tubes and with the thumb screw "D" affords a rigid and dependable means of clamping the telescopic rods in the tubes to maintain the proper bellows extension.

The Condensing Lenses are of the best quality, are $\frac{3}{4}$ inches in diameter and are mounted in nickel plated telescopic mounts of such construction as insures the maximum of utility and convenience.

Adjustments and Finish. The rough adjustment for focus is accomplished by the extension of the flexible bellows and the telescopic rods sliding within the frame tubes. The slide changer is held in place by two springs and two top adjusting screws which are secured in adjustment by check nuts. All parts are made interchangeable and adjustment may be had at any time. All metal parts except the lamp house are polished and nickel plated. The combination with the dark red bellows and the dark lamp house makes a pretty and harmonious contrast.

....PRICES....

The Enterprise Single Stereopticon, lower or upper, with condensing lenses, "Petit Je" objective lens of 8, 10 or 12 inch focus in one-fourth size mounts and one double slide carrier \$25.00

The Enterprise Single Stereopticon, lower or upper, with condensing lenses, "Roco Special Sr." objective lens of 10 inch focus in one-half size mount, as shown in the illustration and one double slide carrier..... \$32.50

Finds it a Very Profitable Business.

CHICAGO PROJECTING CO., Chicago, Ill.

GENTLEMEN:—Have been using your combination moving picture and exhibition machine for the past year and must say that I am now in a position to give a high class entertainment and find the secret of my success in using my advertising matter liberally. I know of no business where the profits are so large and the return so quick as this.

Yours for success,

W. W. B.

BOSCONIA, Wis., Nov. 19.

225 DEARBORN ST., CHICAGO, ILL.

THE ENTERPRISE... DOUBLE Model 1906 Dissolving Stereopticon

The Highest Grade..
..Stereopticon Made

The Enterprise is especially arranged for convenience in showing dissolving views, which is the highest art in stereopticon exhibition.

For those who are not familiar with stereopticon work we will explain that dissolving effects are produced by having two different views, one in each stereopticon, and gradually turning the illumination from one stereopticon to the other, so that while one view gradually fades away, the other grows brighter, until the one picture is not visible on the screen, and the other has developed to full brilliancy. In this manner the screen on which the pictures are shown is never blank, but shows a picture throughout the entire exhibition.

The Enterprise Double Stereopticon is composed of two the same as described on the preceding page, except that the upper one is made somewhat different so as to be attached to the lower one and is not provided with a swinging objective lens door. The lower stereopticon is adapted for the attachment of the Optigraph Motion Picture Machine which may be added at any time.

Enterprise Double Stereopticon, with condensing lenses, "Petit Je" objective lenses of 6, 8, 10 or 12 inch focus in one-fourth size mounts, and double slide carriers..... \$50.00

Enterprise Double Stereopticon, with condensing lenses, "Roco Special Sr." objective lenses of 10 inch focus in one-half size mounts, and double slide carriers..... \$65.00

CHICAGO PROJECTING CO.,

Enterprise Skeleton Dissolving Stereopticon

The Enterprise Skeleton Stereopticon has been designed especially for use with the "A. C. R." Right Angle Arc Lamp, in combination with which it possesses many advantages, viz:—It may be used without lamphouse; it is convenient to manipulate; is neat in design; and is light, compact and portable.

As the Enterprise Skeleton Lantern is the same as our standard Enterprise Lantern with the exception that the light hood is substituted for the lamp house, it can be used for the calcium or other forms of arc lamp at any time, by removing the hood and attaching the regular lamp house. The lamp house, however, is not included in the prices below, but is charged for extra, if desired.

For description of "A. C. R." Right Angle Lamp see another page. The Enterprise Skeleton Stereopticon is full nickel plated and polished, has red leatherette bellows, and is well finished in every particular. The Arc Lamp is also full nickel plated.

PRICES

Enterprise Skeleton Stereopticon, Single, lower or upper, with condensing lenses, "Petit-Jr." Objective lens of 6, 8, 10 or 12 inch focus in 1/4 size mounts, one "A. C. R." Right Angle Arc Lamp, one double slide carrier, and six extension legs..... **\$32.50**

Lenses of different lengths of focus are also known by the following names:

The "Petite Jr." Stereopticon Objective Lenses, in 1/4 size mounts. This series of lenses is furnished in all lengths of foot, from 6 inch to 12 inch equivalent focus inclusive. The glasses are of good quality and possess good depth of focus. The mountings have a rack and pinion for focusing, are finished in gilt and are lacquered.

"Petite Jr." Stereopticon Objective Lenses, 6, 8, 10 or 12 inch focus, including Morocco dust cap. Price each..... \$4.50

The "Petite Sr." Stereopticon Objective Lenses, in 1/2 size mounts. Are furnished in all lengths of foot from 4 inches to 12 inches inclusive, and are similar to the "Petite Jr.", with the exception that they are much better finished, have nickel plated lens barrels, black enameled lens colls, and thumb nuts, and fine rack and pinion movement for focusing. They are up-to-date in that the old-fashioned type of shade has been omitted.

"Petite Sr." Stereopticon Objective Lenses, 6, 8, 10 and 12 inch focus, including dust cap. Price each..... \$6.00

"Petite Sr." Stereopticon Objective Lenses, 4 or 15 inch focus. Price each..... \$7.50

The "Roe Special Jr." Stereopticon Objective Lenses, in half size mounts. This series of Stereopticon Lenses is furnished in 10 and 12 inch focus only. The glasses are of good quality and possess good depth of focus. The mountings have a rack and pinion for focusing.

"Roe Special Jr." Stereopticon Objective Lens, 10 inch focus with dust cap. Price each..... \$10.00

"Roe Special Jr." Stereopticon Objective Lens, 12 inch focus with dust cap. Price each..... \$12.00

The "Roe Special Sr." Stereopticon Objectives in half size mounts. This series of lenses has been designed with a view to meeting any and all requirements. The formulae have been designed by experts of long experience in the designing of Optical Projection lenses. Both the glasses and the mounts are made by the most skilled workmen and no expense has been spared to make them everything that could be wished for. They are furnished in all lengths of foot from 10 to 21 inches inclusive, and are similar to the "Petite Sr." with the exception that they are finished in the best possible manner. The mountings measure 2 1/2 inches in diameter by 3 1/2 inches in length, have nickel plated barrels, black enameled lens colls and fine rack and pinion movement for focusing, concealed thumb nut, and the bodies are finished in Egyptian bronze lacquer. They are

up-to-date in that the old-fashioned type of shade has been omitted. This series of lenses gives greater illumination, will be found equal to all requirements, and afford a great convenience in the matter of interchangeability and portability, features which will be specially appreciated by the traveling exhibitor. We take great pleasure in recommending this series of lenses as being first-class in every respect, and every one of them is guaranteed to give entire satisfaction.

"Roe Special Sr." Stereopticon Objective Lenses, in 1/2 size mounts, 10 inch focus with dust cap. Price each..... \$12.00

"Roe Special Sr." Stereopticon Objective Lenses, in 1/2 size mounts, 11 to 15 inch focus, with dust cap. Price each..... \$15.00

"Roe Special Sr." Stereopticon Objective Lenses, in 1/2 size mounts, 16 to 21 inch focus, with dust cap. Price each..... \$16.50

Lenses of longer focus will be quoted on application. Heads will be furnished when desired for 50 cents extra.

Extension Tubes are required for lenses of 12, 18 and 21 inch E. F. Lenses at an extra cost of \$2.50, \$2.75 and \$3.00 each respectively.

Standard Stereopticon Objective Lenses.

These Lenses are the best grade of standard lenses, made by the Bausch and Lomb Optical Co. They have nickel plated barrels, black enameled lens colls, and bronze lacquered bodies. The cuts show the comparative sizes.

Condensing Lenses form an indispensable feature of every Stereoscopic Motion Picture Machine. They serve to gather and concentrate the rays of light for passage through the objective lens. Modern instruments made by the best makers use the standard size condensing lenses which is $\frac{1}{4}$ inches in diameter. We carry in stock the following foci: 5% 6% and 7% Inch. To obtain the best results the focus of the condensers should be suited to the objective lens. We advise the use of the following combinations in the same mount depending on the focus of the objective.

Two 5½ inch focus; one 5 and one 6½ inch focus: two 6½ inch focus; one 6½ and one 7½ inch focus; two 7½ inch focus, depending on the focus of the objective lens.

In ordering condensers separately, the focus of the objective lens with which they are to be used should be specified, otherwise we will ship 6½ inch focus. We list

Condensers No. 1 grade 4K inch without mounts and

CHICAGO PROJECTING CO.,

.....DESCRIPTION OF THE.....

Victor Acetylene Gas Apparatus

WHAT ACETYLENE IS.—Acetylene Gas is made from *Calcic Carbide*, a dark crystalline, semi-metallic substance, which is made from pure insular lime and high-grade coke, fused together by being submitted to the intense heat of an electric furnace.

The carbide is made to give off Acetylene Gas by simply immersing the material in water, and each pound of carbide will yield about five cubic feet of gas.

POWER OF ACETYLENE.—Acetylene burns with a small, pure white flame, and Photometric tests show that a given area of Acetylene flame has about twelve and one-half times the brilliancy of ordinary gas, and five times the strength of the ordinary incandescent electric lamp, and will illuminate a view, giving good detail up to 12 feet in diameter, and will give a fair picture up to 16 feet.

SAFETY.—Acetylene is as safe to use as ordinary city gas, and is not dangerous except when stored in tanks under high pressure.

SIMPLICITY.—Acetylene is the most simple form of illumination for Stereopticon work, and the outfit is so easy to operate that a child can handle it successfully and with perfect safety.

OUR BURNER.—We have arranged a special new form of three-jet burner, which has been found to give the best possible results for Stereopticon Projection work. It gives approximately 250 available candle power with complete combustion, is noiseless, and without odor or smoke.

Our New Improved Three-Jet Burner is a great improvement over the old style four-jet burner, owing to the improved form and efficiency of the tips, and their arrangement in steps, which gives a much stronger, and perfectly even illumination.

A special advantage of Acetylene is that it produces less heat than ordinary gas, for which reason the lamp house and the condenser lenses are better preserved. We furnish four-jet burners when desired without extra charge.

Other advantages.

A 4-JET BURNER will be furnished instead of the 3-jet burner **TWO BURNERS** without extra charge.

Our outfit is small and steady, without noise, has the best form of burner, and is in every way far superior to other apparatus now on the market.

GUARANTEE.—We guarantee our Acetylene Outfit to be well made, durable, efficient and as represented throughout, and will replace without charge any parts that may show defective material or workmanship.

FOR CHURCH AND SCHOOL WORK. Acetylene is the most convenient and simple method of illuminating Stereopticon Views, and fills a much felt want.

CHICAGO PROJECTING CO.,

The "Model B" Enterprise Calcium Light Outfit

A VICTORY OF SCIENCE

Makes Its Own Gas, but Requires No Forced Pressure, No Hot Retort, No Furnace, No Hot Water, No Heat of Any Kind, No Gases in Wrong Place, Failures, Delays, Accidents, as necessary. Dispenses with Freight, Express, Cartage, as Excess Baggage Bills, No Disappointments Owing to Delays in Transit, or Illuminating Apparatus Going Astray as when Using Cylinders or Old Style Outfits.

ANYONE CAN USE IT WITH PERFECT SAFETY, AND ITS WEIGHT IS BUT ABOUT 35 POUNDS (In Case)

It Makes PURE Oxygen Gas (Others only 85 Per Cent). It is Positive. It is Automatic. It Makes Gas as Used. You may Charge it Five Minutes or Twenty Four Hours in Advance. Stop Using Gas, it Stops Making. No Waste of Chemicals. It May be Charged for a short Entertainment if Desired. Gives Over 700 Candle Power. Light as strong as from Compressed Gases in Cylinders, and Stronger than Produced by the Old Style Portable Gas Making Outfits.

Calcium Light is produced by burning in combination, the proper proportion of Oxygen and Hydrogen gases, both of which are generated in the Enterprise outfit. The Oxygen Gas is generated from either one of the New Oxygen Chemical Compounds, called "Oxythine" and "Oxone" which are made by recently patented processes, and are put up in tin boxes, containing about 2½ to 2½ pounds. These chemicals generate Oxygen Gas when brought into contact with water with which the tanks are partly filled. The Hydrogen Gas is produced by the electrolysis of a fine grade of Ether. Calcium Light, (sometimes called Oxy-Hydrogen) is the only all-around satisfactory light for the traveling exhibitor who desires to give a first-class show to large audiences.

All who have examined the Enterprise agree that it is a most satisfactory method for the production of Calcium Light, and that its use adds much to both the pleasure and the profit.

225 DEARBORN ST., CHICAGO, ILL.

.....DIRECTIONS.....

Remove the cover from the Oxygen Tank, put a number of cakes of the Oxygen Compound in the holder, replace the cover, attach the stand pipe and upper tank, pour in water, charge the saturator with a quantity of Ether or 88° grade Gasoline, connect the rubber tubes to the Calcium Jet (Burner) and all is ready.

THE SATURATOR for generating hydrogen gas is of a new and improved design having a patented arrangement of saturating compartments, which are filled with a specially prepared absorbent and non-deteriorating material. A very important feature of this Saturator is a **Condensing Jacket** which serves a double purpose. It takes the moisture from the Oxygen Gas—dry gas being necessary for a steady light—and at the same time carries off the heat from the warm Oxygen Gas to the Ether or Gasoline contained in the saturator, which stimulates vaporization.

A Screw Cap on the bottom makes it possible, in case the Saturator should become clogged with non-volatile residue, to very quickly and easily change the filling, and give the one that was in use ample exposure and time to dry.

Complete Instructions, that tell all about the operation and care of the outfit, attaching it to the Stereovision or Magic Lantern, etc., accompanies each outfit.

Dissolving Views, which represent the highest attainment in the art of Stereoscopic Projection, as further referred to on another page under the title of Single and Double Enterprise Stereoscopes, may be shown with the most perfect results with the Model B Calcium Gas Outfit in combination with a Double Stereovision, and the regular Low Pressure Dissolving Key as shown in the illustration herewith. When ordered for dissolving work two extra pieces of tubing should be ordered with the dissolving key, to make the additional connections required.

THE TANKS of the Model B Outfit are each drawn from a single piece of the very best sheet steel and are without seams, rivets or solder, which are frequently the causes of leakage. Both tanks are coated inside and out, with porcelain, which renders them positively proof against the action of chemicals, easy to keep clean, free from rust or corrosion, and practically indestructible.

The entire outfit is constructed on scientific principles, is made of the very best materials, and by the most skilled workmen. The top of the oxygen tank is ornamented by a neat design of roller scroll work. The fittings including the Saturator, Stand Pipe, Oxygen Tank, Top, Band, Clamp Screws, Cocks, etc., ARE HEAVILY NICKEL PLATED, and the whole presents an unusually rich and artistic appearance.

The Oxygen Tank is 6x15 inches, and the height of outfit complete, set up for use, is 45 inches. The dimensions of the carrying case is 10x10x24 inches, and the weight of the complete outfit in case is about 35 pounds.

CHICAGO PROJECTING CO.,

The Model B Calcium Gas Outfit possesses the very great advantage of being always at hand, and that the exhibitor can always depend on having a supply of pure gases on a few minutes' notice which cannot be said of the compressed gases in steel tanks, owing to the unreliability of the railroads and other transportation companies who often fail to get goods to destination on time, or through mistake ship them to the wrong place, to say nothing of occasional disappointments from breakage or mistake in estimating quantity on hand. While an Electric Arc Lamp is a good thing to have, electric connections cannot always be had, because very often the hall or church in which the exhibition is to be given may not have been wired for electricity.

If you wish to know more about this outfit, or there's anything you don't understand, write us for further particulars, specify what you wish to know, and we'll be pleased to give the information desired.

WE GUARANTEE the Model B Calcium Gas Outfit to be well made, durable, efficient and to be as represented throughout, and will replace without charge any parts that may show defective material or workmanship.

WE CANNOT SAY ENOUGH

For the merits of this Outfit, as all who have used it say that it will revolutionize the business, and is everything that could be wished for.

....PRICES....

THE ENTERPRISE MODEL B CALCIUM GAS LIGHT OUTFIT, complete, including rubber tubing, wrench, tongs, funnel, and full printed instructions, in case (Wght. with case about 35 lbs.) \$37.50
 "Extra filler for Saturator, each..... 75
 "Oxylithe" Oxygen Compound, per box..... 1.35
 "Oxone" Oxygen Compound per box..... 1.35

See the Following Page for further particulars on Oxone and Oxylithe.

Sulphuric Ether, of best quality for Calcium Light, in sealed cans, per pound..... 1.00

One box of oxygen compound and about 3/4 of a pound of Ether or Gasoline is sufficient for an entertainment of over one and one-half hours, with a lot of medium bore.

IMPORTANT—One Improved Perfect Combustion "Non-Pop" Calcium Jet will be found a great advantage and should be used with this outfit.

Ether is a little more expensive, but we recommend its use in preference to the gasoline, as the additional expense is a very small consideration. It gives better results, may be carried in small quantity, and it can be had of almost any druggist, while gasoline of the 88-proof grade can be had only from the large cities, and must be shipped by freight. **SPRAY GASOLINE MUST NOT BE USED.** See 88 test gasoline listed on another page.

225 DEARBORN ST., CHICAGO, ILL.

Oxone

TWO VICTORIES
OF SCIENCE

Oxylithe

That are of inestimable value and furnish a much needed and long sought convenience to The Optical Projectionist.

By Simply Bringing Either one of these new chemicals into contact with water or in the same manner as when producing acetylene gas from calcic carbide, they will generate almost

... PURE OXYGEN GAS ...

which, when burned against the surface of a piece of lime in combination with the vapor of Ether or Gasoline will produce the most brilliant form of

Calcium or Lime Light

CALCIUM LIGHT has always been the favorite and main dependence of the optical projectionist even in the bygone days when it has been necessary to procure the gases ready made in high pressure steel tanks, or to make it with the old-fashioned, portable outfit in which chemicals, consisting of black oxide of manganese and potash, were converted to gas by placing the heavy iron retort into a stove or furnace and heating it red hot.

But How Different Now!

All that is required is to place Oxylithe or Oxone in the basket of the Enterprise Model B Calcium Gas Outfit, pour in water, put a few ounces of ether or 88° test gasoline into the saturator and

YOUR GASES ARE READY

OXYLITHE AND OXONE are both made from practically the same combination of chemicals, but Oxylithe is made in France and the chemicals are compressed into cakes, while Oxone is made in the United States and the chemicals are fused into cakes by the electrolytic process.

The Oxone cakes differ from the Oxylithe in that they are much harder, a little lighter and do not break or crumble in shipment. The Oxylithe cakes are completely consumed in the making of the gas while the Oxone leaves some residue. Both chemicals are put up in sealed tin boxes, the Oxylithe weighing about 22 pounds and the Oxone about 25 pounds per box. Either chemical will produce approximately six cubic feet of 99 per cent Pure Oxygen Gas which is equal in illuminating power to between seven and eight feet of tank or chlorate gas owing to the 15 per cent of impurities in the latter which are non-combustible, and reduce the intensity of the illumination in greater proportion.

One Box of either Oxylithe or Oxone will produce gas enough for an exhibition of over one and one-half hours when using a jet of medium bore.

NOTHING IS GAINED as some suppose by high pressure on the gases. While the maximum pressure of gases stored in steel tanks is 250 pounds, it is well known that the gas may be used to the last pound with equal results, as the pressure actually required at the tip of the jet does not exceed one pound. The Enterprise Model B Calcium Gas Outfit gives a uniform pressure of about 6 pounds to the square inch.

As to the Relative Merits of Oxylithe and Oxone, We Recommend Both

You Try Both and be Your Own Judge

Oxylithe, per box.....	\$1.35
Oxone, per box.....	1.35

We recommend our New Improved Perfect Combustion Non-Pop Calcium Jet for the best results with the Calcium Light.

Sun Rival Hydro-Carbon Vapor Gas Outfit

A MARVEL OF
SCIENTIFIC INGENUITY

Patent applied for.

**A
Steady
Light
Without
Flicker,
Odor,
or Dirt.**
**Produces
A POWERFUL
WHITE LIGHT
at a cost of about
1 CENT PER HOUR**

See Description and Price on Following Pages.

225 DEARBORN ST., CHICAGO, ILL.

The Sun Rival Hydro Carbon Vapor Gas Outfit

The Sun Rival Hydro Carbon Vapor Gas Outfit consists of a strong steel tank for containing gasoline and air, a gauge for indicating the air pressure, a powerful foot pump for supplying the air to the tank, a generator for converting the gasoline into vapor gas, a burner adapted to receive a mantle, specially-prepared mantle and a long flexible metal tube for connecting the burner with the tank. For operation the tank is supplied with about two quarts of ordinary stove gasoline and the generator is placed in the pressure which should be pumped to about 40 pounds pressure. With the filler bulb about a speed of 100 revolutions per minute. The generator cup and is lighted by opening the generator needle valve. One pumping of air is usually sufficient for an entire exhibition.

The generator of the Sun Rival Outfit is of special construction, the result of much investigation and experimental work and has been so perfected that it insures perfect vaporization of the gasoline, which in the form of vapor gas passes through the mixing chamber where it combines with the necessary quantity of air to insure perfect combination when burned on the mantle.

The Mantles are specially prepared for this class of work, being charged with several times the usual amount of the "Oxide of Thorium" which together with the forced pressure gives an illumination about three times the power of the ordinary incandescent Welsbach gas light, a little stronger than acetylene and about one-third the strength of Calcium light.

Ordinary mantles that may be purchased in almost any town, will serve the purpose in case of an emergency, but will not be found satisfactory for regular work as they will not give any where near so much illumination as the special-prepared mantles. The mantles may be transported with perfect safety before being burned, and will last for some time if carefully used, but after having been once used they are fragile.

The Sun Rival Outfit furnishes a steady and brilliant white light of about 200 candle power at a cost of about one cent per hour and will illuminate a stereopticon picture up to 12 feet in diameter or Motion Pictures up to 6 or 7 feet in diameter, but is not recommended for motion pictures.

Convenience. The tank measures but 6x13 inches and the entire outfit weighs only nine pounds. It is so simple that a child can operate it and is free from danger of any kind. The tank is tested to three times the amount of pressure that is required for use. Owing to the compactness and portability this outfit is especially adapted to the requirements of certain classes of public exhibitors, secret societies, churches, Sunday schools, day school teachers etc.

PRICES.

THE SUN RIVAL HYDRO-CARBON VAPOR GAS OUTFIT including Tank, Air Pressure Gauge, Foot Pump, Burner, Flexible Metal connecting tube, Asbestos Lined Light Shield, two Gas Mantles, Carrying Case and complete Printed Instructions	\$16.00
Extra Burner for San Rival (necessary for dissolving with two lanterns)	\$7.50

CHICAGO PROJECTING CO.,

The Vapo Search Light Gas Outfit

For Portability, Compactness
Power and Quality of Illumination,
Safety, Cleanliness and
Economy it's
"A WORLD
BEATER"

**OUTSHINES ALL OTHERS OF ITS CLASS IN
Economy, Power and Quality of Illumination, Safety,
Cleanliness and Portability.**

AT A COST OF ABOUT EIGHT CENTS per hour the Vapo Search Light produces a beautiful white light, and in every way equals anything else that has ever been produced in this line. The tank is filled about two-fifths full of Columbian Spirit and the balance of the space is reserved for air pressure, which is supplied by the rubber bulb air pump. The air pressure forces the spirit through when it is heated and converted to vapor gas. From the generator it escapes to the mixing chamber where it is mixed with air and is burned on the surface of the specially prepared and highly Thorinized mantle. The generator is started by turning a little alcohol in the generator cup which is placed just below the generator. But little pumping is required to supply the necessary pressure and as there is ample space in the reservoir it needs little attention after being started. No other illuminating outfit of any kind approaches this one for cleanliness. There is absolutely nothing to soil hands or clothing of other Hydrocarbon outfits have been taken full account of, and in the "VAPO SEARCH LIGHT" the inventor has secured in producing an improvement that insures perfect vaporizing, an adjustment for securing the proper proportion of gas and air, hence perfect combustion with an unbroken incandescent surface all over the mantle, and a steady and intensely brilliant white light which is indispensable to good results in Optical Projection Work.

A Screw Adjustment for the air mixer, and a quick screw feed Cleaning Needle for the vapor outlet orifice, are improvements that are entirely new with the appearance of this outfit and constitute a very great convenience to the operator.

A Special "Vapo Search Light" Mantle

marked the "VAPO SEARCH LIGHT" and very rich in Mineral Salts, is responsible to a considerable degree for the intense and even illumination. From the results thus obtained, we make A GREAT IMPROVEMENT by the use of a Plano Convex Lens of good quality and finish, which is set into the burner hood, where it does much in collecting the rays of light and distributing them evenly on the surface of the condensers.

A Large Picture

up to ten feet, with good detail, may be projected with the "VAPO SEARCH LIGHT" and while not recommended for such it may be used for motion pictures in small halls, or for home amusement. THE EFFICIENCY of the illumination is considered equal to Acetylene or any of the other Hydrocarbon Illuminants and it has more than three times the power of the best multiple wick kerosene lamp.

In Every Way the "VAPO SEARCH LIGHT" stands unapproached by any other alcohol light. It weighs only 20 ounces, and is so small that it may be packed in the lamp house of an ordinary Optical Lantern, or in a box 5x8x8 1/2 inches. This, together with the fact that it can be charged and started in about five minutes, commends it to the use of all who do not find it necessary to use calcium or electric light.

Economy is an important consideration to many, and in this respect the "VAPO SEARCH LIGHT" is in the front rank. By using Columbian Spirit, it may be operated at a cost of about eight cents per hour for fuel; mantles extra.

A mantle may be used for a considerable time if handled carefully. Before the protecting coating is burned off they may be handled with perfect safety. After being burned they are fragile.

It Meets the Requirements

of Traveling Lantern Exhibitors, Ministers, Sunday Schools, Missionaries, Secret Societies, Educational Workers and for home amusement. THE VAPO SEARCH LIGHT is guaranteed to be exactly as represented, and we agree to make good any instrument that should fail through defective material or workmanship, to properly perform its duty, or to refund the purchase price.

PRICES.

Steel Cylinders for Calcium Light Gases. We handle only the best quality of steel for this class of work, and tested to 600 pounds pressure and are fully guaranteed. The oxygen tanks are painted red, the hydrogen (tan) black, capacity figured at 225 pounds pressure.

Capacity	Size	Weight	Price
15 feet	8x30 inches	38 pounds	\$17.5
25 feet	10x41 inches	65 pounds	18.5
50 feet	12x48 inches	95 pounds	22.5

A List of Dealers in Compressed Gases in Tanks

Will be furnished to those who are interested. Dealers are located in most of the principal cities.

The customary charge for compressed gases in tank is \$6.00 for 50 feet each of oxygen and hydrogen, freight express and cartage extra. 50 feet is sufficient to last 60 from five to seven entertainments of one and one-half hours each.

If interested write for list.

Dissolving Keys

The "Roe" Low Pressure Dissolving Key No. 1 for Calcium Light Gases. This key is suitable for use with gas furnished in tanks, or with any portable calcium light and gas making apparatus. The valve in this key is very carefully fitted, and ground to a perfect fit, and gives satisfactory results. It is provided with screw adjustment with check nuts, is well finished, polished and nickel plated.

Price.....\$10.00

FOR DISSOLVING WORK with Oxy-Hydrogen gas don't fail to use the "Non Pop" Calcium Jets and especially if you are using a gas making outfit. The "Non Pop" Jets give results that cannot be had with any other.

High Pressure Dissolving Key for Calcium Light Gases. (Not illustrated.) The construction of a calcium light key for use with gases under high pressure requires the highest grade of mechanical skill, together with the greatest care in design, workmanship, etc. These conditions have all been met in the new high pressure key. With this key it is possible to keep the gases properly adjusted and under perfect control from the beginning to the close of the exhibition. Complete with high pressure hose and couplings. Price.....\$30.00

"Roe" Acetylene Dissolving Key. The object of this key is to provide a means of doing dissolving work with two stereopticons in combination with a single acetylene generator and two burners. This key is carefully fitted, well finished, polished and nickel plated. Price.....\$4.50

Rubber Tubing for connecting dissolving key to two lanterns, set of two pieces of two feet each.....\$0.40

Automatic Pressure Regulators. These regulators automatically control the pressure of calcium light gases from cylinders, and maintain a uniform pressure, whether the cylinders are full or nearly empty. When using gases from cylinders, by using the automatic pressure regulator with low pressure key, key are obtained. These regulators are not necessary when using low pressure outfits such as the Oxytho or Oxone gas making outfits. Carefully finished, polished and nickel plated. Price per pr. \$15.00

Patent Valve for high pressure calcium light cylinders. Having two needles, the equilibrium of the gases is easily accomplished. The side spindle is for fine adjustment, and the flow from the cylinder is controlled by the main or top needle. This enables the operator to make his adjustments before the entertainment begins, thus avoiding all annoyance in this direction after the audience is seated. Price.....\$5.00

CHICAGO PROJECTING CO.,

Regulating Needle Valve

Coupling for Gas Cylinder. Used for connecting high pressure key and gauge to tanks while using all the gas out of one of them, etc. Full nickel plated. Price, each.....\$2.00

Rubber Hose, Best High Pressure with coupling. Per section.....\$2.00

Cylinder Clamp and Hand Regulator, combined. This Regulator is of the same quality as the one way valve. Finished in the best manner throughout and nickel plated. Price, each.....\$5.50

Coupling, used to connect rubber hose to gas cylinder. Price, each.....\$0.50

Bushings, for use on calcium light cylinders when the threads become so much worn that they are unreliable. Nickel plated. Price, ea.....\$0.50

Coupling for Cylinder.

Regulating Needle Valves. A desirable attachment for those using calcium gases from cylinders. The regulating needle has fine threads which enables the operator to secure a steady and perfect adjustment of the gases. This valve is finished throughout in the best possible manner and nickel plated.

Improved Calcium Light Jets.

While calcium light, by reason of its great efficiency, reliability, portability, and convenience, has in the past, been the leader in illuminants and a most faithful servant to the optical projectionists, recent developments in the line of patented improved calcium jets promise to expand its field of usefulness to a wonderful and unexpected degree.

In this catalogue is listed, for the first time in the history of the optical projection business, a line of improved calcium light jets, which for efficiency, reliability, convenience and artistic merit, is nothing short of a revelation in several ways. There is probably not another instrument in the optical projection line where it has been possible to bring about greater results in the way of better pictures than by improvements in the calcium jets. The opportunity for improvement has been taken full advantage of, and radical departures have been made from the stereotyped, awkward jets to which the public have been accustomed in the past, and our new line is equipped with improvements that are absolutely original and new, as must be plainly recognized by any one who will take the pains to compare our line with the jets of other makers.

Foremost among the improvements embodied in our new line of calcium jets, is the patented "Non-Pop" nozzle, which is furnished in two forms, either of which, besides securing better combustion, hence greater efficiency, positively prevents popping at the jet, which is especially annoying and happens more frequently when using gas making outfits. With the "Non-Pop" nozzle large quantities of gas may be used, thus obtaining the maximum illumination without the possibility of popping or other unsatisfactory results. While either of our "Non-Pop" nozzles is a phenomenal improvement over the other types of jets, the Cone type of "Non-Pop" nozzle is to be preferred, by reason of the advantages gained in its form of construction. Both of these "Non-Pop" nozzles are fully protected by U. S. patents applied for, and infringers on these rights will be vigorously prosecuted.

Outfit all Right. GENTLEMEN: I received the outfit and it is all right. You may look for my future orders
J. H. M., Silver Creek, N. Y.

CHICAGO PROJECTING CO.,

225 DEARBORN ST., CHICAGO, ILL.

Another radical departure in our line of jets is the "turned ball type of mountings, in which form they take a better finish, are made to keep clean and with their well proportioned and symmetrical arrangement are neat and artistic beyond description.

Prominent among the new features is that every one of our new jets is made with the assistance of very expensive specially made jigs and tools, that are true to the thousandth part of an inch, and by the use of these invaluable new series, instead of depending on ordinary machinery, the jets are perfect in construction and can be depended upon to be uniform, to work smoothly, easy and with certainty.

Other important improvements are the screw adjustment, the perfect mixing-chamber for mixing the gases, needle valves instead of stopcocks, tubular bearings on the cross heads and the off-set nipple none of which improvements are to be found in any other line of jets.

The "Togo" Calcium Jet is without question the best low-priced jet on the market. While it is not equipped with the "Non-Pop" Nozzle, a mixing chamber and other desirable improvements to be found in the "Loco Special" and "Roco Premier." It is well made, has the ball type of mountings and is nickel plated.

The "Togo" Calcium Jet No. 1, with one, 11 in. burner. Price.....\$4.00

The "Togo" Calcium Jet No. 2, with line burner. Price.....\$5.00

"NON
POP"
JET
With
Gas Making
Outfits

The "Roco Special" Calcium Jets, are intended to take the place of and are a very great improvement over the Perfection jet formerly listed by us. It has two tubes running its entire length, has the ball type of mountings, a modified form of mixer for mixing the gases, strong and rigid, and is full nickel plated. Nos. 2 and 3 are provided with the patent "Multi Non Pop" Nozzle, which has a series of small holes for the escape of the gas, that absolutely prevents the flame from snapping back into the jet, as it will do under certain conditions when using a Sectional View patented "Non Pop" with a single hole of larger bore.

The "Roco Special" Calcium Jet No. 1, with line burner and plain single hole nozzle. Each.....\$7.00

The "Roco Special" Calcium Jet No. 2, with line burner, tube mixer and patent "Multi Non Pop" Nozzle. Each.....\$8.00

The "Roco Special" Calcium Jet No. 3, with line burner, tube mixer and patent "Multi Non Pop" Nozzle and cocks. Each.....\$9.00

"Roc Premier" Calcium Jet.

No. D

the greatest possible efficiency. The most prominent feature in this new jet is the "Cone Non-Pop" nozzle which absolutely prevents popping, and at the same time affords better combustion, hence greater illumination. Both of these advantages are hailed with delight by experienced exhibitors. Different sizes of cones makes it possible to regulate the quantity of gas to suit individual requirements. The consumption of gas per hour with Cone No. 1 is about three feet, No. 2 about four feet, and No. 3 about six feet. Larger sizes made to order.

Unless otherwise ordered we will furnish the No. 2 cone. A feature of great value in this jet is the Perfection Mixing Chamber, an arrangement which insures the perfect mixing of the two gases, hence, perfect combustion, and the greatest possible intensity of illumination. A screw adjustment for adjusting the distance between the line and the point of the jet is another special feature of the "Roco Premier" and is alone the means of placing this jet a long way ahead of anything else on the market. The screw adjustment, which is mounted on the line burner shaft, insures a steady and positive movement of the line, and it is sure to remain where it is placed. By the use of this handy device, it is possible to secure a perfect and positive adjustment of the line without the necessity of exposing the hand to the heat of the inside of the lamphouse.

Needle Valves are another excellent feature to be found in no jet other than the "Roco Premier" No. D. By their use a finer adjustment of the gases may be secured with the greatest ease and certainty, and after the adjustments are secured there is no danger of their being changed by an accidental knock, as with stopcocks.

Long Tubular Bearings to the cross head and other mountings, are a great improvement, which insures the smooth and easy working of all parts without chafing or cramping.

Take it all in all, this jet possesses so many points of merit, that those who are interested in securing the best results with the greatest comfort in operating, cannot afford to consider any other.

CHICAGO PROJECTING CO.

The "A. C. R." Adjustable Rheostat UNDERWRITER'S MODEL

The "A. C. R." Adjustable Rheostat, Underwriter's Model is another one of the "A. C. R." improvements, which has been designed to meet the growing demand for a rheostat of greater capacity and utility. The "A. C. R." Adjustable is made sufficiently heavy for all practical purposes, yet it is not a burden by being unnecessarily heavy. The resistance consists of a number of individual coils of very high grade resistance wire, any one of which may be replaced without disturbing the others. The coils are insulated from the frame by porcelain insulators, to which they are attached in a novel manner. An important feature is that the number of insulators used is only one-half the customary number. This feature considerably reduces the weight and makes the coils much more convenient of access, as the insulation is perfect and has an abundance of strength.

The adjustment lever is mounted on a slate base, which furnishes the highest class of insulation. It is located on the end of the rheostat, instead of on the side, a feature that has many advantages. It is less liable to injury in transportation and entirely free from the liability of the lever being moved by accident.

The slate base adjustment lever is thoroughly protected from accidental breaking by a metal cap, yet the lever is immediately accessible by an adjustable telescopic extension handle that is tipped with felt. After adjustment, the handle is telescoped to prevent accidental movement or tampering.

This rheostat is provided with a perforated steel jacket, which is sufficiently strong to furnish ample protection. The jacket may be instantly removed, by removing a few screws in the base and sides. The jacket is in two sections, and may be quickly removed or replaced. The "A. C. R." is arranged so it may be covered and four legs used instead of the cap, an arrangement which is desirable under certain conditions.

Capacity: This rheostat, when on currents of from 10 to 150 volts will give from 25 to 40 amperes without excessive heating. The 250 volt rheostats will furnish about 25 amperes.

The "A. C. R." Adjustable Underwriter's Rheostat is strictly high class in every respect, and fills the requirements of both the motion picture exhibitor, (whether a traveler or permanently located), and the municipal authorities.

Dimensions: For 110 volts height to top of cover, 15 inches; length, 9½ inches; width, 4½ inches; weight, about 21 lbs. For 250 volts the dimensions are the same except that it is about 1½ inches higher.

PRICES

The "A. C. R." Underwriter's Adjustable Rheostat, 110 volts, with cover and legs.....	\$17.50
Same without cover or legs.....	16.00
The "A. C. R." Underwriter's Adjustable Rheostat, 250 volts, with cover.....	25.00
The "A. C. R." Underwriter's Non-Adjustable Rheostat, similar to the "Underwriter's Adjustable" except that it is non-adjustable and is not provided with the cover on the top.....	10.00
Set of four legs for either of the above rheostats.....	1.50

154

225 DEARBORN ST., CHICAGO, ILL.

"Excelsior" Rheostat, No. 1. This Rheostat is light and strong, is adjustable and is adapted to direct current of 55 to 110 volts, and alternating 55 to 104 volts. It has iron frames top and bottom, separated by a sheet metal form, is well insulated, and is especially adapted to the use of the traveling exhibitor. Height 16 inches. Weight, 5½ pounds. Price.....\$4.00

"Excelsior" Rheostat, No. 2, same as the No. 1, except that it is covered with a heavy wire screen. Price.....\$7.50

The "Excelsior" Rheostat, No. 3. This rheostat is the same as "Excelsior" No. 1, except that it is wound with finer wire for use with ordinary lamps using ¼ inch carbons and socket attachment. Price.....\$1.00

The "Roo" Rheostat is a very popular form for the traveling exhibitor. It is provided with a number of resistance coils, which are protected from contact by a heavy perforated sheet metal covering and is adjustable by turning the handle on the top. The resistance coils may be replaced at small cost in case of accident. This rheostat is intended for either direct or alternating current, and is calculated to carry fifteen amperes on a 110 volt circuit. Price.....\$10.00

"A. C. R." UNIVERSAL Four Rheostats in One

The "A. C. R." Universal Rheostat meets a long-felt want, in that it is adapted to varying conditions, and is especially adapted to the requirements of the traveling exhibitor. It is neat in design, sufficiently heavy for all practical purposes, and is not a burden by being unnecessarily heavy. The resistance consists of a number of individual coils of high-grade resistance wire, any one of which may be quickly replaced without disturbing the others. The coils are insulated from the frame by porcelain insulators, to which they are attached in a novel manner.

The "A. C. R." Universal Rheostat was so made because of its universal adaptation. While it is of the non-adjustable type it is so arranged that making the proper connections to the binding posts it may be used as follows:

On 110 volt circuit, one lamp to carry about 12 amperes. On 110 volt circuit, one lamp to carry 25 amperes. On 110 volt circuit, one lamp to carry about 50 amperes. On 110 volt circuit, two lamps to carry about 25 amperes for each. On 220 volt circuit, one lamp to carry about 25 amperes. This Rheostat is provided with a perforated steel jacket which may be instantly removed by removing a few screws from the base and sides, the jacket being in two sections. Four legs may be used to raise the Rheostat above its support, in order to comply with the requirements of certain cities.

Togo Rheostat, same as the above, but without cover.....	8.00
Set of four legs for either of the above rheostats.....	1.50

The "Motto" Universal Arc Lamp

The "Motto" Universal Arc Lamp was designed for use with the Moteograph Motion Picture Machine and possesses many features of advantage not to be found heretofore in other lamps. Besides being unusually strong, and heavy, and adapted in every particular for use on heavy currents, it is provided with improved extra heavy carbon clamps, which not only furnish ample contact surface to prevent short circuiting, but are sufficiently strong to avoid the leakage so common in other lamps. The carbons are held firmly between two strong jaws, and are clamped in place by a single thumbscrew. The clamps will hold firmly the entire range of sizes of carbons that are in general use.

All Hand Wheel Adjustments for focusing are a special feature by experienced operators. It has the vertical, sidewise and endwise adjustments operated by hand wheels, all located outside of the lamp house with which the point of illumination may be accurately, quickly and positively adjusted to the focus of the condensers. Each adjustment is entirely independent of the other, which enables the operator to correct any one without disturbing the others. The vertical and sidewise adjustments and the carbon feed have flexible ball shafts or arbors, which permits of their being located stationary at the point where they pass through the lamp house. This arrangement is a very great advantage, as it enables the operator to get more accuracy and quicker adjustments than otherwise would be obtainable. Another feature is the insulated adjustable carbon clamp stops, which in case the joint should become loose, will prevent the clamp from dropping down and causing a short circuit. This feature is necessary to fill the unusually long and is sufficient to consume full 6 inch carbons with one setting. The lamp is very rigid, well finished and nickel plated.

Made Extra Heavy to Carry Heavy Current
And Dispense with Breakage of Carbon Clamps and Other Parts.

156

The "Togo" No. 1 Electric Arc Lamp.

This Electric Arc Lamp is similar in form to the "Roco Premier", but has square rack rods instead of round, and the frame, carbon holders, arms, etc. are made with the square, instead of the round finish, and it is not quite so heavy. The carbon holders are held in line by friction plates instead of guide forks as in the "Roco Premier". The small illustration shows position for alternating current. It is a well finished lamp, and the best on the market for the money.

Price.....\$4.00

The Togo No. 2 Electric Arc Lamp, better finished throughout, and has polished nickel finish instead of the satined finish. Price....\$6.00

The "Roe Premier" Self-Centering Electric Arc Lamp.

This lamp is a great improvement over other lamps of this type, both in utility and beauty of design. It is provided with a perfect double rack and pinion movement, which moves both carbons in unison, and keeps the light centered. The rack rods are round and operate in long cylindrical bearings, which makes them work much more smooth and regular than those of the square type. The guide forks, having a bearing well away from the center of the rod, furnishes the maximum of rigidity, and serve to hold the carbons accurately in line. The parts are made strong and durable, and being furnished in the round, are easy to keep clean, and present a most artistic appearance. The carbon holders are adjustable, making them equally adapted to hold alternating and direct currents. The adjustment wheel is well back away from the heat, is easy to get at, rapid, and certain in its action. The small illustration shows position for alternating current.

In our "Roco Premier" Improved Self-Centering Arc Lamp, as in our new line of Calcium Jets, we have introduced the new turned ball finish. In fact, on every part where it is possible round parts have been used, which, together with the excellent form and proportions of the different parts, contributes to the artistic merit more than can be expressed in words or picture.

This is without question the most artistic, and in every way the best Electric Arc Lamp ever placed on the market, and yet is sold for no more money than others ask for inferior goods. Full polish finish and nickel-plated, price.....\$8.00

157

CHICAGO PROJECTING CO.,

The Right Angle Arc Lamp

The Right Angle Arc Lamp is the neatest and most simple effective lamp of the kind on the market. The carbons are fed both together and separately, depending on whether or not both wheels are grasped. The lens is mounted in a direct line with the optical center of the condensing lenses. For direct current use a 4 inch solid vertical carbon. For alternating current use two 1/2 inch solid vertical carbons. On direct current the "Right Angle" will give a light and a more even illumination than the tilted form and is especially favorite with many operators, but requires more attention in feed. Size of frame is about 5 inches long by 5 inches high. Length of lens for each carbon about 2 1/2 inches. The lens is protected from injury by a hollow ball casting. Full nickel plated and polished.

Price without Ball Hood and Jacket..... \$5.00
Ball Hood with Polished Nickel Plated Shield and Jacket..... \$5.00
use with Skeleton Lanterns which have no lamp house, has cam for focusing, with screws for attaching. Price..... \$2.00
NOTE: The Ball Hood is attached to the Right Angle Lamp by means of screws and does not require interchangeable and may be attached any time.

Automatic Electric Arc Lamps
These lamps are little used. They are not only very expensive, but have proven very unsatisfactory for projecting work, are hard to control, very bulky, and we neither list nor recommend them. Prices, however, will be quoted on application.

Slip Slide Dissolving Carrier

This carrier is specially designed to secure a dissolving effect with single stereoviews. Its operation is simple and rapid. The slide is dropped in the slot at top of the carrier and pushed into place by means of a lever. When the next slide is to be inserted, while the former slide is still projected on the screen, the same operation of the lever carries the second slide into place in front of the other slide. The lever is pulled back, which immediately withdraws the first slide and the second slide is pushed into optical position by means of the springs. The complete operation of changing the slides is done in a fraction of a second and the dissolving effect is produced on the screen by the operation almost equal to that of a double stereoview.

This carrier is made in two styles, Style No. 1 being made entirely of brass and handsomely nickel plated, while Style No. 2 is made of hardwood, mahogany finish, polished, with nickel trimmings. The measures 1 1/2 x 4 inches.

PRICES.
No. 1, 1 1/2 inches wide..... \$3.50 No. 2, 1 1/2 inches wide..... \$2.00

225 DEARBORN ST., CHICAGO, ILL.

Double Plug Electric Connection.
A convenient way of making quick connection for either the traveling exhibitor or for societies, schools, churches and home use. The larger block with the holes in should be attached to the supply wire, and the smaller part with the plugs, to the wires leading to the machine. Should the polarity of the lamp be wrong, it can be instantly corrected by removing the plug block, and turning half around. Will carry 45 amperes. Price..... \$1.00

The Mechanical Dissolver

while the illumination is allowed to remain full on in both stereoviews. The result is that one view will gradually fade away while the other will be developed from nothing to full brilliancy.

The Mechanical Dissolver is attached to the upper lens by means of screw clamps that are cushioned to prevent scratching the lens mounts as shown by the two illustrations. The shutter is made of thin planished sheet steel and the mountings are polished and nickel plated.

For the production of Dissolving Views with arc or incandescent electric light, the Sunlight Gasoline Vapor or Alcohol Vapo Search Light, Welsbach gas or Kerosene oil illumination it is necessary to use the Mechanical Dissolver which consists of a cut off with ragged or saw tooth edges and so mounted on one of the objective lenses that it may be gradually shifted so as to cover first one lens and then the other

PRICE..... \$5.50

The Mechanical Dissolver.....

CHICAGO PROJECTING CO.,

Electric Switches.

Exhibitors using Electric Arc Lamps should provide themselves with a Knife Switch. A fuse block is also desirable, for if in any way a short circuit is formed, no damage would be done other than to melt the fuses in your block, which could be instantly replaced. We recommend the Nos. 5 or 6 Combined Switch and Fuse Block to use enclosed fuses. In many cities the insurance companies prohibit the use of any but enclosed, or cartridge fuses. We also advise the use of a 50 ampere switch and fuse block, because when using alternating current it is necessary to use 30 to 40 ampere of current to get good results on motion pictures.

Jute Stage Cable No. 6, length of 50 feet or more, per foot, ...15
 No. 10 will carry up to 20 ampere.
 No. 6 will carry up to 30 ampere.

Voltmeter. For measuring the voltage of electric lines. This little instrument will be found a very great convenience by the traveling exhibitor for measuring the voltage of electric lines, to determine with certainty what resistance should be used, and the adjustment of the rheostat required to justness of the current to his purpose. It is especially adapted to the requirements, in that it measures but 4 inches in diameter by 2 1/2 inches in height, and will indicate the voltage of lines up to 250, which is above the voltage generally used for lighting purposes. Price, ... \$15.00

Ampere Meter. For measuring the amperage of electric lines. This instrument is the same size and form as the Voltmeter listed above, and makes an excellent companion to that instrument, although not so necessary. It measures to 75 ampere. Price, ... \$15.00

CHICAGO PROJECTING CO.,

225 DEARBORN ST., CHICAGO, ILL.

The "Roc" Incandescent Electric Lamp.

The Incandescent Electric Lamp will be found a very great convenience where electric connections can be had, for such as lodges, school and church work and may be used to advantage by certain classes of traveling exhibitors. It may be used on either the alternating or direct current. When using the 50 candle power lamp the connection may be made direct with the lamp socket without the use of a rheostat, but when using the 100 candle power lamp, a small switch should be used for turning the current on and off, instead of making and breaking the connection at the lamp socket. This form of illumination is a little stronger than the Welsbach gas burner, but has not the efficiency of an Acetylene or Vapor gas light.

The design of the "Roc" Incandescent Electric Lamp is highly artistic and for general merit is far superior to anything heretofore introduced. It is beautifully polished, and with the exception of the lamp socket, is nickel plated.

Price, complete with 50 c. p. lamp for 110 volt circuit, 20 feet of insulated wire and attachment plug.....	\$1.50
Same as above, but with 100 c. p. lamp instead of 50 c. p.....	5.00
Price, complete with 50 c. p. lamp for 220 volt circuit, 20 feet of insulated wire and attachment plug.....	5.00

100 candle power Incandescent lamp, bulb only, 220 volt.....	5.00
Switches for 100 candle power lamp.....	.50

NOTE: We cannot be responsible for breakage of electric lamp bulbs in transit.

NOTE: When ordering, do not fail to state whether for the 50 or 100 volts alternating, or 110 or 220 volts direct current, and also whether for Edison or Thompson-Houston socket.

STAND OR BURNER SUPPORT.

This stand is intended for use in old style lanterns, which have not been fitted for the use of modern burners. It has a round base with screw holes for securing to the bottom of the lantern, standard in right burner spindle and is fully nickel plated. Price.....\$2.00

The "Roc" Welsbach Gas Burner.

The "Roco" Burner is an improvement over anything heretofore made in this line. Its form of construction is such as to afford the greatest efficiency together with convenience and artistic design. The Burnson part is of the form best adapted to the requirements, and has ample adjustments for the perfect balancing of the gas and air. In efficiency it is considered better than the best oil lamps, but it is not equal to the Alcohol or Gasoline Vapor Burners. It is made of brass throughout, beautifully polished, nickel plated, and from an artistic standpoint as well as efficiency, it is far ahead of anything in its class.

PRICE	
Price, complete with 10 feet of rubber hose.....	\$4.00
With Stop Cock, extra.....	.50
Extra Mantles with support, best quality, each.....	.20
Extra Chimneys, 5 inches, each.....	.15

The "Orton" Four-Jet Self-Cleaning Burner is much appreciated by those who have used it.

The jets are so placed that the centers of the flames all come in a line with the axis of the lenses and being placed nearer together than in the old type of burners, they all come more nearly within the focus point of the condenser, hence greater efficiency.

Each tip is provided with a coarse-threaded screw, the point of which passes through the orifice of the tip and cleanses it of any soot or carbon deposit with which it may have become choked. Each jet is provided with a nickel-plated and polished reflector. Full polished finish, nickel-plated.

Price, each.....\$5.50

Condensing Chamber or Drip Cup, for Acetylene Outlets. Owing to the presence of a considerable amount of heat in the generation of acetylene, steam is formed, a certain amount of which is carried to the jet with the gas, especially with some forms of generators that are different from our own. To remedy this condition which is detrimental to good results we have devised this little attachment which is placed in the path of the gas from the generator to the jet. As the gas gets away from the heated generator it cools and the vapor condenses to water which lodges in the condenser. It is about 5 1/2 inches long, is made of brass and nickel plated. Price.....\$0.75

CHICAGO PRINTING CO.

225 DEARBORN ST., CHICAGO, ILL.

The "No. 50" Magic Lantern with Oil Light

ing public exhibitor. PRICE, complete with lenses, carrying case, etc.....\$12.00

Oil Lamp for Stereopticon

While Oil lamps are now but little used for stereopticon work, there are still a few people, who, from a desire of economy, are prompted to use them. While the lamp we illustrate is the best that can be had for the purpose, having three wicks, we do not recommend them. They are rated at about 10 candle power and give about one-third the efficiency of American Gasoline or the Alcohol Vapor Light. This lamp may be used in our \$15.00 Magic Lantern or Stereopticon. Price, complete with wicks and telescope chimney.....\$4.00

Motion Pictures are Taking Top Money Is the almost universal report that comes from amusement places such as Summer Carnivals, State and County Fairs and Amusement Parks.

People do not Tire of Motion Pictures. On the contrary they get into the habit when near enough, of going once a week or more.

Slide Carriers.

the same as the No. 1, with the exception that it has brackets for locating it in the lantern, and cushions which make it possible to change views instantly without noise, thus making a substitute for a dissolving lantern. Price.....\$0.80

Double Slide Carrier No. 3, for Single Stereopticon. Instead of having one groove as in the No. 1, it has two grooves side by side, one for the English and the other for American slides. Is convenient when exhibiting a mixed lot of slides. Price.....\$0.75

Shutter Slide Carrier, for both American and English slides. Is especially adapted for the double lantern. Is similar in form to the double slide carrier, but has a metal diaphragm in one side, and is intended to carry a piece of opaque material or a ground glass in the other. Price each.....\$1.25 Per pair.....\$2.25

"Panoramic" or "Push Through" Slide Carrier, for Single Stereopticon. Suitable for both English and American slides. This carrier can be used for showing Panoramic effects. Price.....\$0.50

Adjustable Slide Carrier.

Carrier for Dissolving Stereopticon. Adapted for both English and American slides. This is the most convenient and popular form of slide carrier for use with a dissolving lantern. Has a metal pull for withdrawing the slide. Price, each.....\$2.00

Adjustable Slide Carrier, for Dissolving Stereopticon. Adapted for both English and American slides. Adjustment is secured with a screw. Price.....\$0.60

Self Centering Slide Carrier.

Glass Cell. Measures 4x7 inches, and fits into the slide stage of any lantern using standard slides. It can be used dry, to hold views, or may be filled with water to show live specimens of insects, fishes, worms, etc., mounted on slides of which may be projected on the screen with the Stereopticon or Magic Lantern. Price.....\$3.00

CHICAGO PROJECTING CO.

Lecturers' Reading Lamps.

In delivering a "Lecture" or "Reading" where it has not been previously memorized, it is necessary to have a lamp that will concentrate the light on the book and not illuminate the room to interfere with illumination of the stereoscopic or motion pictures.

Electric Battery Reading Lamp No. 1. clean and always ready for use. Battery is enclosed in the oak case. It has an adjustable reflector to throw the light where wanted. Is lighted by turning the switch. Bulb is frosted to give even light. Battery will last on continuous run about five hours, but by using short periods will last a long time. Metal parts are nickel plated. Price each.....\$3.50
Extra batteries, each.....0.50
Extra frosted bulbs, each.....0.50
Ruby Bulb, for photographic dark room work, each.....0.50

Candles, special for No. 3 Lamp, per doz.....\$0.75

Kerosene Reading Lamp, No. 1. Uses kerosene oil. We advise against the use of a glass chimney as the oil will leak out and soil other goods when carried. Price, each.....\$2.50
Candle Reading Lamp, No. 2. Uses ordinary candles which may be had in almost any size. It is lighted by a spring so light that it always remains in the same place. Price, each.....\$2.00
Improved Candle Reading Lamp, No. 3. Uses a special large size candle which is fed up by a spring. Has a folding reflecting hood and is a great improvement over the No. 2, even though it can be sold for the same money. Price, each.....\$2.00
Shutter. When pressed with the finger it gives signal the operator for the next slide. Price each.....\$0.25

225 DEARBORN ST., CHICAGO, ILL.

225 DEARBORN ST., CHICAGO, ILL.

Adjustable Extension Screen Frame.

Price with Poles 1 1/2 inches in diameter, per section.....\$0.50

Price with Poles 2 inches in diameter, per section......75

The Portable Extension Screen Frame can be adapted to all sizes of screens and will be found a great convenience to the traveling exhibitor.

It is composed of the required number of sections depending on size of screen, each section being three feet in length, made of tough, thoroughly seasoned white wood and jointed together with metal ferrules. Two of the end sections have a sharp pointed brad that sticks into the floor so that it cannot slip or get out of position. The other two end sections have a pulley let into the body of the section through which is carried the screen rope which is to be attached to a small screw-eye in the floor in the line with the face of the screen and at the proper distance from the screen. Then two guy ropes at each side of the screen, one extending forward and one backward, serve to hold the screen immovably in place. This arrangement answers admirably for screens up to 20 feet square. Larger screens than this require a heavier frame. We recommend 1 1/2 inch poles for screens 12 feet square and under, and 2 inch poles for screens over 12 feet square. The frame for a screen 2 feet square or 10x12 consists of six sections, three for each side.

Price of Frame, 8 sections, for 12x12 foot screen, complete, \$4.00

without ropes.....The ropes are extra.

Tools and Accessories.

Improved Cylinder Wrench No. 2. This wrench is lighter and is considered an improvement over the No. 1. It fits on the spindles, couplings and at the ends of the cylinders for calcium gases. Polished and nickel-plated. Price, 75c.

Adjustable Pocket Wrench No. 2.
This wrench is the same style as the No. 1 but is better made, finished with greater care, has fluted handles, and is nickel-plated and polished.

Price.....\$0.50

Combination Cutting and Flat Pliers. This combination of a parallel flat plier with cutting pliers should be made a part of every exhibitor's outfit. The jaws are made of the best tool steel, while the handles are stamped from sheet steel making them both light in weight and are well finished, polished and full comfortable to the hand. Price...

Yankee Pocket Tool Set No. 2. This tool set is similar to No. 1, but is larger, and contains the following tools: Gimlet, two chisels, screw driver, two gouges and a saw. Price

Magazine Screw
my little tool will

B. & S. Magazine Screw Driver
No. 2. The B. & S. Screw Driver No. 2 differs from the No. 1 in that the blades are pivoted to the handle instead of being loose, and are changed by raising the bolt and pressing forward the slide to the front end of the slot. It contains four blades of finest steel has metal handle with wood grain, and is nickel plated. It is a little larger and heavier than No. 1.
.....\$1.3

Oil can. No operator of a machine should be without oil can. This one is especially adapted to the requirements of the motion picture exhibitor, in that it is flattened compact. It is not necessary to keep it standing upright. It has a screw cover to prevent spilling the oil. Nickel plated. Price.....\$

Smoked Spectacles, good quality, for
protection of the eyes when adjusting elec-
tric, arc, or calcium, or other illuminants,

THE "TOGO" FILM WINDER

No. 1

attach them quickly to a table, bench or shelf, besides which they each have two slots for bolts or wood screws. The frames are finished

The "Togo" Film Winder is a most convenient accessory for rewinding and the repairing of films, and should be included as a part of the outfit of every Motion Picture exhibitor. The "Togo" Film Winder is made in two styles, viz: No. 1, which has a single frame, and No. 2, which is divided into two frames and is better adapted to repairing than the No. 1. Both styles are artistic in design, strong, and are unusually well made. They are provided with a thumb screw clamp, with which to

Carbons for Electric Arc Light.

Solid Carbon

Soft Cored Carbon

Soft Cored Carbon
give off a dust when burning. Have hard spots that cause the light to grow dim at times, and make a hissing noise. Our carbons are expressly for optical projection work. The combustion is even and perfect, they give a brilliant uniform light, and produce the high candle power obtainable in proportion to the current consumed. The high 5 inch soft cored carbon allows 15 to 20 amperes to the current consumed. The 5 inch soft cored carbon allows and 15 inch solid carbon below 10 soft solid lower carbon. We advise a 1/2 soft cored upper and 1/2

For alternating current use $\frac{3}{8}$ or $\frac{1}{2}$ soft cored carbons both top and bottom, depending upon the number of amperes used.

We carry in stock the following sizes:

**THE "A. C. R." IMPROVED
INTERCHANGEABLE CHROMATROPE**

With Detachable Handle.

Chromatropes are suitable and very desirable for the opening, intermission and closing of a Stereopticon and Motion Picture Entertainment and especially for announcements for Nickelodeons and Five Cent Theatres. The Chromatropes effect is produced by two

circular discs of glass, each one having painted upon them curious geometrical designs in a variety of brilliant colors. By turning the crank the two discs are rotated in opposite directions which produces a mysterious and very beautiful effect that must be seen to be appreciated.

Until the present time all chromatopes have been imported and the great majority have been of cheap construction, the mechanical parts being poorly made, and hard to operate, the designs were rough

No. 1

Design Slide

No. 3

and not uniform and the cranks permanently attached which made them very inconvenient for transportation, besides which a complete chromatropé was required for each design. We are now able to offer an American-made chromatropé with both mechanical parts and the glasses finished in the best American Style.

They have detachable cranks and both the color discs and announcement or design slides are interchangeable.

The announcement or design slide is changed by lifting out the 3 1/2 x 3 1/2 slide and substituting another. Another important feature is

CHICAGO PROJECTING CO.,
Interchangeable Chromatropes—Continued.

that they may be had in a neat cloth covered wooden case with eight compartments for the entire series of color discs and eight announcements or design slides.

What Our Customers Say

Finds it a Very Profitable Business.

BOSCOBEL, Wis., Nov. 19.

CHICAGO PROJECTING CO., Chicago, Ill.
GENTLEMEN—Have been using your combination moving picture and calcium gas machine for the past year and must say that I am meeting with grand success. By adding to my outfit now and then I am now in a position to give a high class entertainment and find the secret of my success in using my advertising matter liberally. I know of no business where the profits are so large and the returns so quick as this. Yours for success,
W. W. B.

Quick and Large Returns.

SEDALIA, Mo.

CHICAGO PROJECTING CO., Chicago, Ill.
GENTLEMEN—If you remember I started out a short time ago with one of your combination outfits, and am now successfully working the street fairs, and opera house circuit. At first I was a bit skeptical as to the success of my venture, but am now thoroughly convinced there is no other business I know of that pays such quick and large returns as this. Wishing you the success that I am now enjoying, I remain,
E. S.

Nice, Clean and Easy Business.

KANSAS CITY, Mo.

CHICAGO PROJECTING CO., Chicago, Ill.
GENTLEMEN—I have used one of your combination stereopticon and moving picture machines for the past two years, and have succeeded beyond my fondest hopes. I have confined my work to the school houses and churches and have averaged from \$100.00 per night. To anyone wishing to enter a nice, clean and easy business, on a small investment I would certainly advise them to get a combination outfit at once.
Yours for business,
T. F. N.

CHICAGO PROJECTING CO.,

MOVING PICTURE FILMS.

We are greatly pleased to be able to furnish a complete list of moving pictures, and in this list can be found films to illustrate almost any subject. Moving pictures, being the most important part of an entertainment, and knowing it is rather difficult for the exhibitor to choose films by the name only, we have endeavored to select what we consider the best subjects, giving the description of each, covering films of different classifications from both foreign and domestic film makers, so as to fulfill the requirements of the different classes of exhibitors.

You will find that each film maker issues his own list of films and furnishes them to the trade, but from this complete general film list, the purchaser may receive every satisfaction in making his selection.

Exhibitors know from experience that it is the audience who are to be suited, and his taste must be governed by what they like. This must be remembered in order to give a successful entertainment.

We are always willing to suggest, and help the purchaser to select their films and will give them the benefit of our many years experience in the selection of what class of entertainment they are giving. Such films should be chosen as would appeal to the rest of the programme.

Where you find films under the same or similar name, they are generally made by different manufacturers, and in such cases, we are in a position to select which we consider the best suited for your particular entertainment.

Inasmuch as the copy of films makes the selection uncertain, it is important that the best pictures should be purchased of a reliable dealer.

Every exhibitor, both professional and beginner, should find and become familiar with the subject, "Moving picture machine and its application," which will be found in the front part of our catalogue.

225 DEARBORN ST., CHICAGO, ILL.

The length of each film and the subjects required, depends largely upon your entertainment. The travelling exhibitor who entertains in small churches, halls, schools, etc., as a rule has one set of stereopticon views interspersed with from five to one dozen short films. If the exhibitor can afford it, more can be used to advantage.

The standard moving picture film is 1 1/2 inches wide, and about four minutes is required to run 100 feet, but even though the picture is 1 1/2 inches wide, they can be reproduced on the curtain of any size up to 30 feet, and larger, according to the strength of the light, and the lens used. Short films can be cemented together using a small piece of blank film between each subject. This does away with the delay in framing each separate picture, for when compounded together, they are only threaded once.

For five cent theatres, summer parks, etc., 500 to 1,000 feet of film is required.

Some films can be produced with but little cost, while others require more expense, therefore the price of films ranges from eleven to fifteen cents per foot. The lengths of films as given are not intended to be exact, and the price quoted is for the subject, but the variations do not amount to much. In buying films, as with everything else, quality is more important than economy.

We carry in stock at all times, some of the best selling subjects, but as a rule we require from two to several days to make the films to order.

Color, is seldom used, but it adds much to the value of the moving pictures and in as much as each picture must be done by hand and by the same artist, it requires from two to four days' time for 100 feet of film.

In compiling a catalogue of this kind, it is unreasonable to expect errors to be entirely eliminated, and in case of errors, we reserve the right to correct them.

TERMS.—Upon receipt of a deposit of 20 per cent of the amount of order, we will ship films C. O. D. when desired, but it must be remembered that with few exceptions, films have to be made to order which requires from two to three days.

If the full amount is sent with order, we will send films by mail, the postage being one cent per ounce, and registry eight cents extra, and unless the package is registered, all goods are sent at owner's risk. One hundred feet of film would weigh about thirteen ounces.

Remember that we are reliable, and can furnish any films desired even though they are not listed in our catalogue. Write for further information. Yours very truly,

CHICAGO PROJECTING COMPANY.

**IMPORTANT:—All Films
are now
12 CENTS PER FOOT
Some of the Prices in this List
are incorrect.**

NOTE:—Owing to wear on the negatives from which motion picture films are made, they are in time rendered unfit for further use, in which case when advised of the fact we mark the subject with a star (*) until the catalog is reset, at which time it will be removed from the list.

MOTION PICTURE FILMS.

Military—Cuban-Spanish-American War.

MY MULES SWIMMING ASH RE, BATQURI, CUBA. (G) M
ay of discharging four-footed passengers. Surf is running

This is an exact reproduction of the light as it occurred, and it inspires you to see how big our soldier boys drive the Spaniards off the beach. NAME, LENGTH 60 feet. Price \$8.50

DEATH OF MACEDO AND HIS MEN. (N) This is a memorable occurrence, and it has caused indignation throughout the civilization. The poor Gauls are caught in a trap, and they defend themselves, and they get shot down in their tracks. Code, NAMELESS. Length 60 feet. Price \$8.50

THE BURNED INVINCIBLES. (N) Here is the famous color of the so-called inmates, who went away from the world very much zealously their white brethren. The field was exact, if not superior to the best of the white companions. Code, NAMELESS. Length 60 feet. Price \$8.50

Military—Filipino War.

CHICAGO PROJECTING CO.,

MOTION PICTURE FILMS.

THE BATTLE OF MT. ARIAT—Philippine Islands. (C) The insurgent 25th Infantry, colored, under Gen. A. S. Burt, charging; insubordinate treachery at the foot of Mt. Ariat. Major-General Freckle D. Frank is seen in the foreground during the operation. G. GACKERY. Length, 53 feet. Price, \$3.25.

WATER BUFFALO—Manila. (C) A train of water buffaloes, carrying from the insurgents by the United States troops at Angeles, Philippine Islands. Code, GACETAS. Length, 54 feet. Price, \$3.25.

GOING INTO ACTION—Near Angeles, P. I. (D) Capt. C. W. Hill, Light Battery K, Third Artillery, going into action upon the Philippine Islands near Angeles. Code, GABYHUS. Length, 53 1/2 feet. Price, \$3.25.

INTO THE WILDERNESS—Philippine Islands. (D) This is a new variety of Gen. Bell's expedition. It shows the men breaking through a jungle, directly in front of the camera. It gives a very good view of Bell himself, and the officers who accompanied him in this famous expedition. Code, GAXENSEPHE. Length, 51 feet. Price, \$3.25.

UNLOADING LIGHTERS—Manila. (D) Illustrating the work of the Quartermaster's Department in the Philippines. Coolie laborers and water buffaloes lend a picturesque aspect to the scene. Code, GABELLMAN. 25 feet. Price, \$3.25.

Military—Miscellaneous.

INITIATING A NEW RECRUIT (C) Is a splendid subject, full of action, and shows what fun the boys have with a new recruit after he has been mustered in. The picture shows a crowd of soldier boys, many of whom are holding a blanket by the edges and tossing high in the air the victim of their sport. Price, 25 feet, \$3.25. Price, 50 feet, 6.00.

REVIEW OF OFFICERS (C) Shows Col. Greenaway at Camp Meade reviewing officers of Seventh Regiment. The Colonel stands between the American flag on one side and the regimental colors on the other. As each officer presents himself for review, he salutes and steps aside for the next one. Code word, REVIEW. Length, 53 feet. Price, \$3.25.

OFF FOR THE WAR (C) Shows the Seventh Regiment, Illinois Volunteers marching down the street, through the city; very fine. Code word, WAR. Length, 50 feet. Price, \$3.25.

MARCHING SCENE (C) Shows the First Regiment, Illinois National Guard in full uniform, on the march. The band can be seen in the background. The picture is full of action, has good detail and an excellent score which is always appreciated, and which much appeals. Price, 25 feet, \$3.25. Price, 50 feet, 6.00.

LIFE OF AN AMERICAN SOLDIER (N) A highly interesting drama in eight chapters. Code, AM SOLDIER. 600 feet. Price \$16.00.

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

CHARGE THROUGH INTERVALS OF SKIRMISHES—Ft. Ethan Allen. (C) In this scene the horses are brought to the ground by their riders, as in a charge under severe fire. Code, MONMOUTH. 53 feet. Price, \$3.25.

DAILY MARCH OF REGIMENT AT CAMP THOMAS (U) A very clear, sharp picture. Code word, DAILY. Length, 50 feet. Price, \$18.00.

SOLDIER'S DREAM (T) 150 feet. Price, \$18.00.

COL. THEODORE ROOSEVELT AND OFFICERS OF HIS STAFF—Camp Wikoff, Montauk Point, L. I. (C) This picture shows Col. Roosevelt, accompanied by Lieut. Greenway and other prominent officers of the Rough Riders, galloping up to his headquarters, where he dismounts and walks into his tent in the camp with the Rough Riders. Code, ZUMONETER. Length, 29 feet. Price, \$3.48.

SCALING WALLS IN RETREAT, WITH WOUNDED AND DYING—Fort Sigsbee, N. Y. (D) Showing the remarkable facility with which United States soldiers are able to carry their wounded to the rear. Code, MORCHISO. 27 feet. Price, \$3.24.

UNITED STATES TROOPS IN YELLOWSTONE PARK (C) A lively parade picture of troop E, Third Cavalry U. S. A., on duty in Yellowstone Park. Code word, CAVALRY. Length, 61 feet. Price, \$9.15.

WASH DAY IN CAMP (TU) This is a good clear film, and a good subject, which shows the soldiers standing in the river, washing their own clothing; others are on the bank hanging up their clothes to dry. Creates much amusement, especially among the ladies. Code, WASH. Price, 25 feet, \$3.25. Price, 50 feet, 6.00.

SOLDIERS AT PLAY (U) Showing them in a game called Cock Fight, in which they hop around on one foot with their arms folded. The whole affair is very laughable. Code word, PLAY. Length, 50 feet. Price, \$6.00.

INFANTRY CHARGE (U) This is one of our best and most exciting war films. It shows the soldiers running anxiously from their tents with guns in hand, ready for action, and as they pass by it seems to the audience that trouble is really close at hand. It is, however, a false alarm, and soon the soldiers are seen coming back to their tents. Price, 25 feet, \$3.25. 40 feet, \$4.80.

BATTERY CHARGE (C) This is a very rare film showing an artillery battery charging. The galloping horses dragging the ponderous guns, riders urging their steeds to greater exertions and the wonderful speed attained at the time the picture was taken render this most exciting. Code word, ART. Length, 50 feet. Price, \$6.00.

TEACHING CAVALRY TO RIDE (U) The thoroughly drilled and constant practice. A very interesting sight to be seen in any fort is the daily drill of the young recruits drilling a squad of recruits shows the sergeant, king of rough riders drilling a squad of recruits who will some day be turned out as finished cavalry men. The actions of the horses, the occasional blunders of the men and the stant life and motion render this a highly interesting film while the comic element adds to its acceptability. Code word, ACHEZ. Length, 75 feet. Price, \$9.00.

MOTION PICTURE FILMS.

HIS MASTER'S VOICE. (D) It is hardly necessary to describe this film, as the subject is known all over the world. Our picture shows a Talking M. collie, through which the Master's voice calls a little dog. We see the dog puzzled, jumping up to the machine and running around the room until he gets angry, takes hold of the horn, and breaks up the whole machine. Length 80 feet. Price.....\$8.80

HIS MASTER'S BREATH. (N) This film is the counterpart of the film "His Master's Voice." We first see the master indulging in a few glasses of whiskey, and he puts a funnel upon the bottle to inhale the fumes of the drink. He then leaves the room while the dog enters. The dog, jumping upon the table, smells what he thinks is his master's breath, coming out of the whiskey bottle. He tries to jump in the bottle. The breath, however, is too strong, and we see the dog laying dead upon the table. A very funny film, which in connection with the film "His Master's Voice" will make a big hit wherever exhibited. Length 80 feet. Price.....\$8.80

EVERYBODY WORKS BUT FATHER. (F) The picture opens with a laughable "Jumble" amusement. Mother and all of the children hurriedly eating breakfast and rushing off to work. Mother calls Father repeatedly, but gets no reply. The next scene shows Father in bed. His slumbers are disturbed by a horrible dream. In his dream, which appears as a vision, he is seen carrying the hod up a ladder. He gets into an argument with a bricklayer, who throws him off the scaffold and pelts him with bricks, which he tries to dodge. Suddenly he wakes and finds his wife standing beside his bed with a cup of coffee. The next scene shows Mother and Daughter working in the kitchen. Father enters with his shoes in his hand and sits down by the fire to smoke. Mother sends him out for wood, while he sits down and puts on a pair of blinders, so he cannot see the man work. Mother comes along and the man shows her the big pile of wood he has chopped. Mother gives the man a drink and carries the wood into the house. The next scene shows a carpet on the floor. Father instead of beating it, crawls into it. Mother and daughter now start in to beat the carpet, and Father gets covered with dust and a good beating before they discover him. The final scene shows Father seated in a chair in the kitchen. Mother and Daughter are washing. Father's chair gets caught in soap suds. In the wash tub, and he is thrown to the floor and the entire contents of the wash tub

THE SERENADE. (T) In twelve scenes of cyclonic activity and bewilderment. The picture is as full of action as a Japanese torpedo boat. It is not a case of one or two laughs, but a roar at the start with spasms at the finish. Read the synopsis, and then place your order at once, and be the first in the field with the most exasperating subject ever accomplished in animated photography. SCENES:

- 1-Freddie "Home-o" serenades his Fannie "Juliet" in bedchamber. "Old Man" turns loose deluge of water—and the dog. Chase begins.
- 2-Freddie with dog hanging to his basement terrace, takes to the "fall timber." Old man and Fannie roll down hill in attempting to follow.
- 3-Freddie with Nellie as a half-Nelson attachment, gains street, and eludes old man by doubling tracks around telegraph pole.
- 4-In a mad scramble through the bushes "Dad" and Fannie fall into a deep hole.
- 5-Freddie attempts to scale 12-foot stone wall, but Miss Bull-Terrier is a heavy weight. An amusing struggle.
- 6-The modern Romeo manages to elude canine foe long enough to get ladder and climb wall.
- 7-Foxy Nellie skirts the wall and Freddie drops into her waiting jaws. "Dad" and Fannie scale the wall and "hit the trail."
- 8-With every ray of hope and 66 per cent of his trousers gone, Freddie makes for the lake. A high parapet halts him long enough for the old man and the girl to catch up and the whole bunch roll down the sandy hill.
- 9-Excitement increases. Freddie hurdles parapet and takes a flying leap into the waters that brought Capt. Streeter to Chicago.
- 10-Dad neck and neck in race. Leaps into lake and fierce struggle takes place.
- 11-With the dog still clinging to him, Freddie escapes the old man and a watery grave, with Fannie's aid and a fish pole, and the chase is resumed up the street. Hatch arrives in the scene in an "auto" and picks up Fannie.
- 12-Final scene shows the tenacious old man pursuing his would-be son-in-law to the middle of the street. Hatch and Fannie race by him. Freddie is lifted into the "auto." The old man falls exhausted while the youngsters reach the wharf in time to endark for St. Joe. Code word, SERENADE. Length, 500 feet. Price.....\$60.00

NERVY NAT KISSES THE BRIDE. (C) Scene 1—Nervy Nat, a hobo, enters waiting room of railroad depot, discovers Farmer asleep and steals ticket from his pocket and leaves room without being detected. Scene 2—Interior of passenger coach; bride and groom spooning; Nervy Nat enters; bride becomes very mad when groom leaves for smoking car. Nervy Nat takes advantage of the situation and sits alongside of sulking bride, who is looking out of the window. She does not look around, but thinks her hubby has returned. Nervy puts his arms around her and kisses her. When she discovers who it is she screams, and the groom, conductor and porter come to her assistance, and grabbing Nervy Nat they hustle him to rear end of train. 140 feet. Price.....\$21.00

Comic—Chase.

A DOG LOST, STRAYED OR STOLEN. (N) Copyright 1905. Mrs. Brown soon misses her dog. She goes to the advertising department of the Daily News and inserts an advertisement: "A dog lost, strayed or stolen. \$50.00 reward. Apply to Mrs. Brown." When the afternoon paper is out, a big crowd begins to call at Mrs. Brown's who, frightened at so many dogs, starts to run away. Now begins the funny chase, going up hill and down, over fences, through the city streets and the country lanes. Mrs. Brown in the lead, over 100 people with so many dogs following. Finally Mrs. Brown reaches the back door of her residence, enters quickly and closes the two iron gates just before the crowd with the dogs are upon the spot. The disappointed people leave one by one. Code, DOG-OLEN. 225 feet. Price.....\$24.75

THE LOST CHILD. (C) An exceedingly humorous comedy chase, following a story of actual occurrence in Brooklyn and with but few changes. A fond mother comes out and leaves her little boy on the lawn to play. She goes back into the house, and the youngster, after playing about a bit, climbs into a dog kennel and goes to sleep. The mother comes out, misses the little boy, and starts a frantic search. She is unable to find the child, but as she sees a man passing the house carrying on his arm a large basket, it occurs to her that he is a kidnapper, and she violently assaults him. The astonished man breaks away from her and starts to run; the woman follows him, and close at her heels comes her colored cook and an old wau-wau. The group of pursuers is increased from time to time by various comedy characters—an old fat old gentleman in an invalid chair pushed by a colored boy, a "dago" with his junk cart, a farmer's family who have been out shucking corn, several girls who have been gathering wild flowers, policeman, etc., until the man is pursued by a regular mob, in one instance the flight goes over a high embankment and many funny falls result. The innocent man, frightened out of his wits, is finally captured and taken back to the house, followed by the crowd of people, where the little boy is seen coming out of the dog kennel and joyfully playing with a pup, while the basket of the supposed kidnapper is found to contain nothing more alarming than a pet guinea pig. The photographic quality of this subject is perfect and the action very exciting and laughable throughout. Code, RETALIATOR. 506 feet. Price.....\$46.32

MEET ME AT THE FOUNTAIN. (N) A funny comedy chase, very much on the order of "Personal." Code, MTFOUNT. 475 feet. Price.....\$24.25

THE ESCAPED LUNATIC. (C) This is one of the most exciting and at the same time one of the most laughable subjects ever made. A lunatic confined in a barred cell, labors under the delusion that he is the Emperor Napoleon. In the first scene we see him in an altercation with his keepers over the quality of food furnished him. The keepers set upon him and beat him unmercifully and leave him unconscious.

225 DEARBORN ST., CHICAGO, ILL.
MOTION PICTURE FILMS.

conscious. He comes to and determines to escape. Wrenching a log from a table he bursts the bar of a window, smashes the glass and crawls out. The next scene shows him dropping a distance of 30 feet to the ground below. He picks himself up and starts off at a run. The faces of the keepers appear at the cell window for an instant, but quickly they come running out of the main entrance to the asylum and start in pursuit of the escaped lunatic. Then follows a series of thrilling and ludicrous chases, through the most picturesque scenery. The lunatic is cornered on a bridge over a waterfall, but manages to overcome the keeper and hurls him into the rapids below. In another scene he crosses a torrent on a slender wire cable swinging loose above it. Time after time the lunatic succeeds in circumventing his keepers. Finally, however, he tires of the chase and is seen running back to the asylum. He leaps the 30 feet back to the window and when the keepers, all blown and covered with mud, rush into the cell, Napoleon I is calmly reading a newspaper. Code, GAUNACA. Length 617 feet. Price.....\$74.04

PERSONAL. (D) The original comedy production founded on an advertisement in the New York "Herald," in which a Frenchman states that he would like to meet a handsome American girl with the object of matrimony. The rendezvous is at Grant's tomb. When the hour of the appointment approaches, and he sees the great crowd of young girls waiting for him, he flees in dismay across the country, being followed, however, by the levy of girls, and is finally captured at the point of a revolver, and carried triumphantly to the nearest clergyman. This is in all respects probably the funniest chase picture that has ever been made. Code, RETALIATOR. 371 feet. Price.....\$44.52

Cramp.

SUBSTANTIAL GHOST. (F) Three tramps assemble in a graveyard, and using one of the graves as a card house, play cards for the money they managed to beg. They also have a bottle with them, from which they indulge at intervals. The keeper enlists the services of a policeman. A sheet is placed over the grave, and he crawls along the ground toward the tramps. The cop stands up behind the grave stone in front of the intruders, and they, thinking it a real ghost, run for their lives, leaving money, cards, bottle, etc. behind. The ghost removes his glowing garments and spies the bottle. He makes a quick grab for it, but finds it empty. He then

Mysterious.

LOVE BY THE LIGHT OF THE MOON. (G) Two lovers appear and lean over the garden gate, where the moon throws a shadow upon the ground. The young man invites the young lady to a settee, when the moon's face begins to winks into a very pronounced grin. As the pair begin to make, the moon winks one eye and then the other, and finally, as the lovers become more interested, the moon comes down from the sky with a grin on his face. When the couple discover the moon so close to them, the young lady faints in the arms of her escort. This is a highly amusing picture. Code word, UNEDONEM. Length, 70 feet. Price, _____ \$8.40

ADINNER UNDER DIFFICULTIES. (C) Showing the interior of a dining room of a best cottage where to enter a young couple to partake of the meal which is being served up by the maid. Suddenly the legs of the table are extended to three times their height, the dinner being elevated to this extent; in order to reach same they climb on to the chairs. The table suddenly vanishes, but it makes its appearance at another section of the room. The table disappears a chase between them and the table, this is followed by disappearing altogether, and in its place is seen a glass bottle of "Scotch." Further surprises appear. Code word, BUTCHER. Length, 75 feet.

AMUSING CHANGES. (D) A magician enters, and after bowing to the audience, performs a number of acrobatic feats, during each of which his entire make-up is mysteriously changed. He tumbles over tables, turns somersaults, jumps through windows and every time he faces the audience they apparently see a different person. Length, 14 feet. Price.....\$13.68

A BUTTERFLY'S METAMORPHOSIS. (D) First the caterpillar is seen crawling over a leaf; gradually it changes to a butterfly and then to a dancer, who performs the "Butterfly Dance" on a pedestal. We recommend this film in colors. Length, 14 feet. Price.....\$13.68

STUNNING ORATIONS. (D) This very pretty hand-colored film shows us a magician performing some very stunning tricks. We can recommend this film and assure a success. Length is feet. Price.....\$10.60

THE FOUR TROUBLESOME HEADS. (C) This film introduces some very ingenious tricks. The magician approaches, and after the usual bow, proceeds with the trick of taking off his own head, placing same on a table at his side. He is immediately supplied with another head, and in order to show the audience that there is no illusion about the trick, he crawls under the table upon which is supported his first head. A second head is also removed from his shoulders, and finally a third, all being exact likenesses of the first. He is supplied with a fourth head, and converses with the first several heads on the table. Being musically inclined, he takes up a banjo and commences to play. The three severed heads are seen bobbing, much to the discomfort of the magician, who, observing the banjo, gets off them, causing them to disappear. The third head is treated likewise, whereupon he throws his fourth head into the air, which again descends onto his shoulders. The magician then makes his bow and retires from the scene. A surprising and marvellous illusion. Code word, BELT. Length, 75 feet. Price.....\$10.60

WHEN DOES HE COME? (D) We see a man jump out of the water. His trousers, hat, coat, feet follow him. At last his umbrella appears, the turning point is seen, and when he is ready to leave his little dog jumps out of the water. It is nothing left to us but to ask: When does he come? Length, 14 feet. Price.....\$13.68

LOVE WILL FIND A WAY. (C) A young man calls on his best girl in response to the call of the day his sweetheart's mother appears and upon seeing the young man she has not to show his face again. Here the girl appears, and exchanges glances with her lover. The mother commands her daughter to go to her room. Upon leaving this the lover declares a war against outside. Soon his girl appears at a window on the top floor of the house, and they arrange a method of meeting. A victrola pole which is located in front of the house is used as a means of going to this point. The scene now changes to a view of the top of the house, and the girl is seen at her window. Soon the young man is seen at the pole. As he reaches the top and is directly opposite the window, the girl seizes a broom and endeavors to help him reach her. Without thinking about the girl's strength, the lover, in his anxiety to reach her, catches the head of the broom and swings free of the pole. His weight is too much for his sweetheart, and she lets go of the broom, precipitating the young man to the sidewalk, many feet below. As he strikes, he finds his body is knocked to pieces. The ambulance is called and the remains carefully laid on a stretcher, but as no orders are about to place them in a wagon, they suddenly become jointed together and the young man sits up. This frightens the ambulance attendants, police, and the girl's mother, and they all flee in all directions. Upon looking around the lover sees his sweetheart and hastily jumps to her, embracing and kissing her rapturously. Code word, VARGULAI. Length, 10 feet. Class B. Price.....\$16.60

MYSTIFIED BATHER. (C) A young man comes to the bank of a stream to cool himself in its water, and, as he starts to remove his clothing, he finds another vest on him, which he proceeds to remove. Before he gets it off, he finds two more on him. This continues until he finally succeeds in getting down to his bathing suit, walks toward the water and is about to dive in, when he finds he is fully dressed again. He again removes his clothes and he hastily into the water, but things are hastily reversed, and he jumps back wards out of the water with another suit on him. This disdresses him, and he leaves the place. Code word, VARELLA. Length, 15 feet. Class B. Price.....\$17.00

ASTRONOMER'S DREAM. (C) Here is shown an observatory, with telescope, star charts and all accessories. The old Astronomer is at work over his calculations. Through the aperture in the dome the full moon is visible. First there appears a beautiful vision of a lovely lady, who disappears again. Then follow a number of startling events in rapid succession. She has eyes that move and a thesy, right into the observatory. All sorts of strange things comes out of the Moon's mouth, and the old Astronomer is so frightened that he throws chairs and books and instruments into the big slit. Suddenly the moon disappears into the middle distance and takes the shape of a crescent. Perched upon one of the horns of the moon is a lady in scanty attire. Then the old Astronomer awakes—alas! It is all a dream. Code word, BEAR. Length, 200 feet. Price.....\$24.00

We can also furnish this film in 100 feet. Code word, BACIOV. Price.....\$12.00

DOG FACTORY. (P) On the walls of the factory different varieties of frankfurters are hung. Each is marked with the breed of dog it is made from. A combined dog and human machine is on in the foreground of the picture, and two Germans are working industriously over it. A tramp enters with about a dozen dogs of various types, and sells them to the Germans. They are soon transformed into sausage, a duke, and he wants a special cash. Next one enters as a customer, a duke, and he wants a special cash. The dog is made and sold, and chappie disappears. A number of customers follow and are supplied with dogs that suit their fancy. Finally a tough enters and wants a bull dog. A Boston bull is produced, but this does not suit him. He wants a fighting bull. The fighting bull is made, and as it jumps from the machine, it grabs the tough by the pants and dog and man pay up in a rolling match all over the floor. The tough finally releases himself and disappears, leaving the fighting bull dog to be again turned into a Bologna. Code word, VALETANT. Length, 20 feet. Class A. Price.....\$20.00

LACHIMERA. (C) Our friend, the magician, first steps forward, and produces an ivory billiard ball from space. With the wave of his hand he changes it into a full size bowling ball, and in order to show that there is no limit to his ability make some more change and holds in his hand a large cloth, known in magic circles as a "fool and". Finally he produces a stock and proper looking rabbit, and then, apparently from nowhere, the stage is filled with the appearance of a charming lady in fancy costume, holding the fool and in front of the lady, but allowing her head and shoulders to appear. Gradually raises the lower part of the cloth, when it is seen that he visible means of support have entirely disappeared, leaving only the head and shoulders pendant in the atmosphere. These in

DEADWOOD COACH. You have all heard of the famous coach running through the Black Hills in the early days; this is a picture of it as it was drawn along the streets of Chicago during Buffalo Bill's Wild West parade. Code word, COACH. Length, 50 feet. Price, \$45.00

CUTTING AND CANALING ICE, GILTON ICE FIELDS. (F) This shows the ice ploys in operation, drawn by horses and guided by men on skates. The ploys are first operated in one direction and then crosswise, cutting to within four inches of the bottom, after which there are men who go along with saws and cut the ice entirely off in about twelve foot squares which are then drawn along the canal by horses. In a point where they are picked up by the ice carriers and run into the ice houses or on the cars. Code word, ICE-FIELDS. Length, 90 feet. Price, \$10.00

WESTERN "BAD MAN" SHOOTING UP A SALOON. (F) 215 feet. Price, \$32.25

Robberies.

THE GENTLEMAN HIGHWAYMAN. (C) Code, HIWAY. 412 feet. Price, \$37.44

CHICKEN THIEVES. Two crows are raiding a henney, when the farmer appears on the scene with his hired man and a gun. He shoots at the disappearing darky. Fine smoke effects. Code word, T.M. HARRIA. Length, 15 feet. Price, \$5.40

THE KIDNAPPED CHILD. (M) Copyright 1904. Somewhat similar to the "Lost Child" in ten scenes. Code, KIDNACHIL. 300 feet. Price, \$33.00

THE EPIPODOMANIAC. (F) In two acts, ten scenes and tableau, which includes the Epitomaniac (Mrs. Banker), Store detective, female detective, superintendent department store, the thief, police court, judge, justice, shoppers, salesladies, cash girls, policemen, prisoners. The object of this film is to show the results of influence on justice. The Banker's wife who is caught at shoplifting is discharged while the poor women who steals bread to feed her hungry child is sentenced to jail.

Act I consists of SCENE 1—Leaving home. SCENE 2—Arrival at department store. SCENE 3—Interior department store. SCENE 4—Superintendent's office. SCENE 5—Under arrest. SCENE 6—Police station.

Act II consists of SCENE 1—The home of poverty. SCENE 2—The thief. SCENE 3—In the patrol wagon. SCENE 4—Police court. The last

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

scene is a tableau of the figure of Justice. On one side of the scales is a bag of gold, and on the other a loaf of bread. The balance shows in favor of the "good." The handage on the brow of Justice, dis-closes one eye. Code, VARIFORMED. Length, 60 feet. Price, \$100.50

THE KIDNAPPER—"AT WORK." (C) The first of an intensely dramatic series of three pictures. Here we see the kidnapper entering the home. The mother is felt by a blow and the child seized and carried off. The father returns just too late to catch the villain. Code, GASBRANDER. Length 46 feet. Price, \$5.52

IMPORTANT: All Films
12 CENTS PER FOOT
Some of the Prices in this list
are incorrect.

THE KIDNAPPER—"IN THE DEN." (D) Here we find the little child on a pallet of straw. The kidnapper, intoxicated, catches the little boy in an attempt to escape and cruelly thrushes him with a heavy whip. Code, GASBUIIS. Length 54 feet. Price, \$6.48

THE KIDNAPPER—"THE RESCUE." (D) The kidnapper is continuing his abuse of the child, when the father, who has discovered whereabouts, rushes in. A fierce fight ensues, in which the kidnapper gets his just deserts. The mother arrives on the scene, and her meeting with the child is very effective. Code, GASBUIITZEN. Length 52 feet. Price, \$6.24

THE GREAT TRAIN ROBBERY. (M) Copyright 1904. Synopsis of scenes—SCENE 1—The chief and his band. SCENE 2—The interior of railroad telegraph office. SCENE 3—At the waiting stop. SCENE 4—The interior of the express car. SCENE 5—Flight on the tender. SCENE 6—The engine ahead. SCENE 7—Looking the passengers. SCENE 8—The flight on the locomotive. SCENE 9—The escape. SCENE 10—Crossing the river. SCENE 11—The signal for help. SCENE 12—The operator's daughter. SCENE 13—The law is avenged. SCENE 14—After the handits. SCENE 15—In a western dance hall. SCENE 16—The chief of the handits, as he takes aim and fires into the audience. Code, GREANERY. 600 feet. Price, \$66.00

THE GREAT TRAIN ROBBERY. (C) This sensational and highly tragic subject has made a decided "hit" wherever shown. It was posed and acted in faithful duplication of the genuine "holdups" made famous by various outlaw bands in the far west. While this film has probably been by far the greatest selling film ever made, and was when taken perfect from a photographic standpoint, it is no longer possible to make films from it that are satisfactory, hence we would recommend in its place "THE TRAIN WRECKERS." Code, VACUN. Length, about 740 feet. Price, \$111.00

[illegible]

THE BURGLAR'S SLIDE FOR LIFE. (G) The interior of a room in an apartment house. A burglar enters and seeing a portable vapor

THE BOLD BANK ROBBERY. (M) Sense I—The opening of the picture shows the robbers in gentlemen attire. They are short of money and decide to rob a bank.

SCENE II.—The robbers are seated in a restaurant.

SCENE III.—After the plans have been fully talked over, the two exit.

depart to carry out their bold undertaking.

SCENE IV.—The exterior of the cafe. The waiter, leaving the cafe in a carriage for their own apartments, to prepare for

SCENE V—The carriage has arrived at an apartment house in one of the streets above the robbers' den. They

of the finest resident sections of the city where the route

SCENE VI—The robbers don long coats and masks and are seen

ing their room. A fine automobile has been ordered to bring the 103

bers to their destination. They take their seats and the action

SCENE VIII—With most beautiful scenery in the background. The

automobile with its five occupants comes down the path.

SCENE IX—A lonely spot on the road is reached, and the road

make the unsuspecting chauffeur stop, take him to the

251

CHICAGO PROJECTING CO.,
MOTION PICTURE FILMS.

blind and gag him and throw him into a ditch beside the road. They enter the automobile and drive away leaving their victim beside the lonely road.

SCENE X—The robbers have reached their destination. They quickly break in the building and enter the interior of the bank when the night watchman discovers them, takes his six-shooter and fires. The robbers return the fire, killing the watchman on the spot.

SCENE XI—The interior of the bank. The robbers search for the vault. The light effect of this scene is fine.

SCENE XII—The robbers come to the vault and prepare to dynamite the doors. After drilling holes, they fill them with dynamite, light the fuses and the next moment the doors are seen flying open.

SCENE XIII—Two of the robbers enter the vault while two others keep watch on the outside. They take as much money as they can carry and prepare to leave.

SCENE XIV—We see the robbers loaded with sacks of gold making their escape through a window, past where the dead watchman lies.

SCENE XV—The robbers bring to a stolen treasure in the automobile which is seen standing outside the bank.

SCENE XVI—They quickly enter the automobile and make good their escape. We see the automobile flying down the road through beautiful scenery.

SCENE XVII—Two young lovers strolling through the park, discover the senseless form of the chauffeur, and while the young lady tries to revive the unfortunate chauffeur, the young man runs away to call the police patrol.

SCENE XVIII—The young man has arrived at the police station. The next moment a squad of police men headed by a sergeant enter the patrol wagon which immediately dashes down the street to bring help to the unfortunate victim and to pursue the robbers.

SCENE XIX—The robbers have reached their home. They are just going to divide the spoil when they are surprised by the police. After a fierce struggle, three of the robbers are overpowered while the fourth one makes good his escape through the window, quickly followed by two of the policemen.

SCENE XX—Now begins a lively chase. The robber jumps from roof to roof, from building to building, closely followed by the two policemen.

SCENE XXI—The next moment he is seen jumping down to the street from the roof of a four story building. Still the two policemen are in hot pursuit.

SCENE XXII—While the policemen come nearer and nearer, the fleeing robber tries an old trick on his pursuers which helps him to once more make his escape.

SCENE XXIII—In his anxiety to get away from the two brave policemen the robber runs through the fields and tries to wade through a river thinking that he might escape his followers, but the two policemen without hesitating go in the deep water where a fierce struggle encounters between the robber and the two policemen and again the robber escapes.

SCENE XXIV—The robber now jumps on a quickly passing street car and as the policemen are on his heels, he leaves from the other side, runs down the street up to the railroad station still closely followed by his pursuers.

SCENE XXV—He boards an outgoing train and succeeds in getting away from the two gallant policemen who came too late to be able to board the train.

SCENE XXVI—Thus outwitted by the robber, the policemen do not give up the chase. They enter the train dispatcher's office and send a telegram to the next station to capture the robber there when the train arrives.

SCENE XXVII—At the next station, the robber not suspecting that his pursuers are there, makes a dash from the train but jumps directly

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

into the arms of the two waiting policemen. He struggles fiercely to get away but is at last clubbed and led away.

SCENE XXVIII—The three robbers are sentenced to 40 years imprisonment. We see them among the so-called "chain-gang" just as they are led to work.

SCENE XXIX—The three convicts who are sentenced to hard labor are seen working in the stone quarries of the Southern Penitentiary.

SCENE XXX—In the final scene, the three convicts are seen discussing the failure of their Bold Bank Robbery and putting the blame one to another. Length 600 feet. Price.....\$66.00

CAPTURE OF "YEGG" BANK BURGLARS. (C) This film is made up of 15 exciting scenes, showing life and methods of the "Yegg" bank burglars, which are as follows: Scene I—"Yegg" camp. Scene II—"The 'gay cat'". A name given to the spy or information seeker. Scene III—"The gay cat's return. Scene IV—Off to town. Scene V—Entering the bank. Scene VI—At work on the vault. Scene VII—Surprise. A citizen shot down. Scene VIII—Pose in pursuit. Scene IX—Escape by the river. Scene X—Taking to the woods. Scene XI—Steal horse to further assist in their escape. Scene XII—Entering a dive. Scene XIII—Shadowed. Scene XIV—Trapped. Scene XV—Death of the burglars. Code, VAPLUBANT. 80 feet, Class A. Price.....\$144.00

WATERMELON PATCH. (F) The opening scene shows a typical southern watermelon patch, with the customary scarecrow figures scattered among the vines. A number of darkies are seen picking out the best melons. Later we see them in the cabin enjoying the feast. They are tracked and located by blood hounds, farmers smoke them out by nailing up the windows and covering the chimney, after which they are punished for their theft. Code, VASTWOLES. 25 feet. Class A. Price.....\$108.75

PRESIDENT, American.

PRESIDENT AND MRS. MCKINLEY—Holbrook, Mass. (C) Showing the arrival and departure of President McKinley and wife, at the Summit House, Mt. Tom. Code, FUSICOLLE. 31 feet. Price, \$4.08

PRESIDENT MCKINLEY. (C) Is considered a fine picture of our President. He is accompanied by Hon. Carter H. Harrison, Mayor of Chicago. Code word, BOARDMAN. Length, 50 feet. Price, \$6.00

PRES. ROOSEVELT, EX-PRES. CLEVELAND. (T) and Ex-Gov. Francis, Pres. of the St. Louis Exposition, arriving at the exposition grounds, followed by the carriages of the foreign diplomats. Pres. Roosevelt and Ex-Pres. Cleveland escorted to the reviewing stand. This film is unusually fine, being very sharp and clear. Code word, VENT. Length, 200 feet. Price.....\$24.00

PRESIDENT ROOSEVELT'S HOME COMING. (D) A view of the arrival of the President on an ordinary passenger train at President Roosevelt's summer home, Oyster Bay, showing the democratic arrival of the United States President and his reception by the village folk of Oyster Bay, where the President takes his vacation. PRESIDENT ROOSEVELT'S FOURTH OF JULY ORATION. (D) 84 feet. Price.....\$25.25

Travel—United States—Alaska.

BIRD'S-EYE VIEW OF DAWSON CITY ON THE YUKON RIVER, ALASKA. (M) This film shows the low-land Yukon River in the Alaska gold mining regions. Also a steamer trying to plow its way through the ice. Code, SACRED. Length 50 feet. Price.....\$6.50

CHICAGO PROJECTING CO.,

MOTION PICTURE FILMS.

FIRST SNOW STORM OF THE SEASON. VALDEZ. (D) Here we show dog teams, sleds, school children, miners, prospectors, sports, camp followers and loaders on McKinley Street, Valdez. The men, with their dog teams, and their "best girls" turn out in numbers, while others are pelling each other with snowballs. Code, GARROFANO. 1008 feet. Price.....\$12.36

PANORAMA OF TAKU GLACIER-Alaska. (C) A mammoth mountain wall of white, shimmering ice, a mile and a half wide, and from one hundred to one hundred feet high. With its columns and domes, spires and minarets reflecting the sun's iridescent glow, it is a thing of imposing beauty. An altogether unique subject. Code, GARROFANO. 65 feet. Price.....\$11.46

LEAVING SKAGWAY FOR THE GOLDEN NORTH. (C) This shows a train on the famous White Pass & Yukon Railway leaving Skagway, Alaska, with miners and their wives for the Land of the Golden Fleece. Code, GARROFANO. 38 feet. Price.....\$3.12

TUNNEL SCENE ON THE WHITE PASS ROUTE. (C) Showing a trestle three hundred feet long with a tunnel through the mountain. From the tunnel, a train emerges, and two operators are shown on foot in the tunnel making a moving picture of the beautiful scene. Very effective when used in connection with the following subject. Code, GARROFANO. 65 feet. Price.....\$7.80

THROUGH TUNNEL ON THE WHITE PASS ROUTE. (C) From the pilot of an engine the operators make a fine film through three hundred foot tunnel, 14 miles north of Skagway, Alaska. Old Saw Tooth Mountain, snow capped and towering, is seen in the background, while below can be seen the location of the terrible White Pass trail and Dead Horse Gulch, where before the railroad was built, thousands of horses and many men perished from fatigue. Through the tunnel we dash, and out across trestles, and around the sheer bluffs where men had to be suspended by ropes from above while making the shift for the railroad. Code, GARROFANO. 139 feet. Price.....\$16.68

TWO MILES OF THE WHITE PASS & YUKON RAILROAD. (C) The most expensively constructed railway of its length in the world. It is 114 miles in length, and contains more cuts and fills, trestles and bridges, tunnels and snow sheds, than any 114 miles of continuous track in existence. Code, GARONTOLO. 154 feet. Price.....\$18.48

THROUGH MILES CANYON ON A CATTLE SCOW. (C) Miles from a quarter of a mile wide, down to 60 feet. It has a drop of 18 feet in a mile and a quarter, and a current of 16 miles an hour. The scows going through the dangerous stretch of water must be steered by large sweeps from front and back, each sweep handled by two men. Without doubt one of the greatest interest-sustaining subjects of natural scenery ever made. Code, GAROSSELLA. 186 feet. Price.....\$22.32

PANORAMA OF "MILES CANYON". (C) Made down in the bow view of the whirling impact of waters through the narrow confines of the canyon, and shows a great scow hurried past like a chip, with men holding on and waving their hats. A most stirring subject. Code, GARONTOLO. 52 feet. Price.....\$6.24

WHITE HORSE RAPIDS. (C) Many daring and venturesome miners have lost their lives in attempting to shoot these rapids, a party of miners in a boat, make their way over one of the roughest spots. As they are tossed about by the mad current, the waves and spray dash high into the air, and at times entirely envelop the boat and gold seekers. A very realistic and exciting picture. Code word, UNCOYBLED. Length, 50 feet. Price.....\$7.50

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

CAPTAIN ALLARD SHOOTING WHITE HORSE RAPIDS. (C) Before the construction of the White Pass & Yukon Ry., there were thousands of dollars worth of supplies and many lives lost in these rapids every year. The famous Alaskan voyager, performs the perilous feat of shooting these treacherous rapids in a 14-foot skiff. Code, GAROTILLIE. 51 feet. Price.....\$6.48

PANORAMA OF WHITE HORSE RAPIDS. (C) A short, swinging view made from the shore of this whirling tumbling mass of foam and water. Code, GAROTILLIE. 25 feet. Price.....\$2.88

STEAMER "YUKONER" LEAVING DAWSON. (C) An immense stern-wheeler pulling away from Dawson Wharf with all flags flying and crowded with happy people bound for their homes in the States. Gold dust carried on this trip was estimated at about six million dollars. The wharf is black with people waving and answering fond farewells. Code, GARPA. 43 feet. Price.....\$5.16

STEAMER SUSIE EXCURSION TO MOOSEHIDE. (C) There are women and children, you find excursions, balls, parties, picnics, and things to amuse. This picture shows the steamer "Susie" with a gay crowd of excursionists, backing away from the Dawson Wharf and then passing under a full head of steam, bound for the St. Lawrence Indian village of Moosehide. Code, GARPA. 100 feet. Price.....\$12.00

OLD METHOD OF MINING. No. 10 (C) Shows the process of saving the gold after the water is turned off. It consists of lifting the "rifle-boards" and scooping up the gold with an ordinary end shovel. The two great pans full of gold as it is piled up in view, and the plentiful \$10.00 and \$150.00 nuggets handled by the men in the picture are enough to arouse envy in the heart of a stone henge. Code, GARACHAO. 77 feet. Price.....\$9.24

OLD METHOD OF MINING. No. 11 ELBORADO. (C) Called "drifting and windlass" work. A fire was built to blow out a quantity of pay dirt; this was hoisted to the surface by means of a hand windlass, and then dumped into the sluice boxes. Code, GARACHAO. 51 feet. Price.....\$6.84

AGEN PLAY IN THE KLONDIKE. (D) Illustrating a gambling scrape in a Klondike bar-room. A quarrel arises over a card game and promiscuous shooting follows. Code, GARACHAO. Length 28 feet. Price.....\$3.36

WINTER SPORT ON SNAKE RIVER. KOME. (D) Snake River runs through the great boom city of Nome, Alaska. It springs to a population of 5,000 in thirty days in 1900. This view was made in the middle of winter, and shows "Malamoot" and "Huskie" dog teams; also skaters, cyclists, women on skis, and Eskimo women fishing for cod through holes in the ice. Nome City is seen in the background. Code, GARAFONES. 54 feet. Price.....\$6.48

Travel-United States-Miscellaneous.

SUMMIT OF MT. WASHINGTON. Mt. Washington, N. H. (C) panoramic view in front of the hotel, showing the arrival of the railroad train. Code, FUSSELL. 28 feet. Price.....\$3.36

SHOOTING THE LONG SAULT RAPIDS-St. Lawrence River. (D) Taken from the pilot house of the steamer "New York" of the Long Sault line, through one of the most turbulent stretches of the Long Sault Rapids. At one point the waves dash completely over the bow of the boat. Code, ZANYISM. 52 feet. Price.....\$6.24

SOUTH GATE OF THE HIGHLANDS-East shore of Hudson River. (D) A view from front end of locomotive over one of the most picturesque bits of scenery on the New York Central Railroad. The train runs over a number of reverse curves; through a tunnel; and finally through the rock cut which gives its name to the picture. The Fallands are seen on the opposite side of the river. Code, FUNGICO. 55 feet. Price.....\$6.60

*Discontinued. See "Note", Page 195.

THE DELLS OF WISCONSIN. (T) panoramic view full of life and action, showing the far famed and beautiful dells of Wisconsin on the C. M. & St. P. Code word, BLOOD. Length, 50 feet. Price.....\$6.00

Travel—United States—New York.

A SWEEP ACROSS NEW YORK. (C) Panoramic view from the North River to the Brooklyn Bridge from the roof of the St. Paul Building, 25 stories high. Code, GARNSACK. 46 feet. Price.....\$5.52

GREATER NEW YORK—N. Y. Harbor. (D) A panoramic view of Brooklyn Heights, Brooklyn Bridge, and the lower end of New York City, from a tug in the harbor. Code, FURCULOSIS. Length 54 feet. Price.....\$6.48

SCENE IN NEW YORK HARBOR—New York. (T) Showing ferryboats, tugs, etc., passing Governor's Island. Code, MORDEVATE. Length 22 feet. Price.....\$3.12

FIFTH AVENUE, NEW YORK. (G) The famous parade ground of Metropolitan fashion. Exquisitely gowned women, club men, actresses, millionaires pass by on their afternoon stroll. Code word TUORIO. Length, 45 feet. Price.....\$5.10

PANORAMA OF NEW YORK. (D) Taken from roof of Times Building. Code, PANYOIK. 22 feet. Price.....\$14.76

SKY-SCRAPERS OF NEW YORK CITY, FROM NORTH RIVER. (G) A beautiful panoramic view of lower New York from Barclay Street to Battery Park, showing a beautiful stereoscopic effect of the skyscrapers in the business sections of the city. Old Castle Garden, at which place hundreds of thousands of emigrants have landed from time to time, but now used as an Aquarium, is also seen in the picture. A fine panoramic picture. Code word, URANEUX. Length, 105 feet. Class B. Price.....\$23.10

25 STORIES UP. (D) A view of Broadway, New York, from the roof of the St. Paul Building, one of the most noted of the metropolitan skyscrapers. Code, GARNHOLLE. 48 feet. Price.....\$5.76

BROOKLYN BRIDGE. (F) Shows the entire trip from Brooklyn to New York, in which the immense towers stand out clear and distinct against the sky. Code word UNCLAIMED. Length, 150 feet. Price.....\$18.00

ACROSS BROOKLYN BRIDGE—New York. (D) This picture is very novel and interesting. It gives the complete trip from station at the New York City end of the bridge to the station at the Brooklyn end, as seen from the front of the third rail car running at high speed. The entire trip consumes three minutes of time, during which abundant opportunity is given to observe all the structural wonders of the bridge, and a far distant river panorama below. Code, PUOCARA. Length, 138 feet. Price.....\$16.66

NEW YORK CITY GHETTO FISH-MARKET. (G) A fine panoramic view of this busy market on a Friday morning. Immense throngs of people are seen passing along the stand and making their selections of fish. A great character-study. Code word, URAMILQU. Length, 165 feet. Class B. Price.....\$19.80

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

PANORAMIC, THE GHETTO, NEW YORK CITY. (G) This picture shows the Hebrew quarter of New York City, which is so graphically described in the Zangwill play. Code word UNOAGH. Length, 100 feet. Price.....\$12.00

PANORAMA OF NINTH AVE. ELEVATED R. R. (M) Another New York street scene, showing views of the elevated railroad. Good, clear and distinct in detail. Code, LATITY. 89 feet. Price.....\$8.80

THE EIGHTH WONDER, THE PLATIRON BUILDING. (D) A view of New York's latest sky-scraper, the remarkable Platron Building, at the junction of Broadway, Fifth Ave., and 23d St., New York, with a panorama of the surroundings. Code, GARSHINIS. 55 feet. Price.....\$6.96

A WINDY DAY AT THE PLATIRON. (C) This remarkable picture was taken at the foot of New York's famous sky-scraper, The Platron, and shows men and women being blown about like chips. One woman is flattened against a shop window and is utterly unable to walk. Code, GAUDERY. Length 125 feet. Price.....\$15.00

AROUND NEW YORK IN FIFTEEN MINUTES. (C) Into this film is crowded as many of the principal sights of New York as is possible. Code, BOUNYORK. 90 feet. Price.....\$104.50

LOWER NEW YORK—N. Y. Harbor. (D) A panoramic view of the lower end of New York City, showing the Brooklyn Bridge and various sky-scraper, as seen from the deck of the Steamer "Columbia" of the Hamburg-American Line. Code, GARBANCERA. Length 40 feet. Price.....\$5.52

NEW YORK CITY IN A FLIZZARD. (G) A realistic panoramic view taken February 17, 1902. A portion of the Fire Department tries to make their way to a fire through the immense snow drifts. A few pedestrians, immense piles of snow and a snow plow hard at work. The view takes in Madison Square, Madison Square Garden, looks up Broadway from South to North, passes the Fifth Avenue Hotel, and ends looking down 23d Street West. Code word UNCLAIMED. Length, 175 feet. Price.....\$21.00

EMIGRANTS LANDING AT ELLIS ISLAND. (G) Shows a large open large loaded with people of every nationality, who have just arrived from Europe, disembarking at Ellis Island, N. Y. A most interesting and typical scene. Code word, URICILE. Length, 140 feet. Class B. Price.....\$16.80

THE HAYMARKET. (D) It depicts in six scenes, six lively hours at New York city's famous Tenderloin dance hall, "The Haymarket." The first scene shows the sidewalk crowds of girls and men. The second is the dance, showing the various forms of the waltz in vogue in New York. Then comes a fight in the wine room, then the eviction of the riotous young men, and finally a boisterous encounter with the police. Code, GARTENROSE. 70 feet. Price.....\$36.75

BOWTIE ENTERTAIN STRANGERS IN NEW YORK. (C) A burlesque on the work of highwaymen. An elderly gentleman is sandbagged and robbed by a thug, who does not get all of the victim's money. A policeman happening along, takes the money and passes by. Code, GADITANO. 26 feet. Price.....\$3.12

New York—Coney Island.

LOOPING THE LOOP AT CONEY ISLAND. (F) A new view of this exciting and hair-raising sport. Two views are shown. In the first part the entire loop is shown at close range and many cars are seen following each other in quick succession down the steep slope and whirling with wonderful rapidity around the circle. The second view gives a still closer view of the cars as they leave the circle and go shooting out towards the camera. Code word, UPRAD. Length, 75 feet. Class B. Price.....\$9.00

MOTION PICTURE FILMS.

THE LEAP FROG RAILWAY. (C) A striking picture of Coney Island's latest and most hair-raising novelty. "The Leap Frog Railway," in which two trains meet in head on collision, one passing over the other. Code, RETOCANDO. 121 feet. Price.....\$14.50

So much has been said of Niagara Falls and its surrounding beautiful scenery that it is unnecessary to enlarge on it. The following films are taken from the best portions of the Falls and shows them to an advantage. The panorama of the Gorge Route is beautiful beyond description.

MOTION PICTURE FILMS.

NIAGARA FALLS—N.Y. (C) The American Falls as seen from Goat Island. A very fine picture of this magnificent spectacle. **\$1.00**
CODE: MOLECOLE. Length, 55 feet. Price—**\$1.00**
CLIFF TOP—N.Y. (C) A view of the American Falls, taken from Goat Island beginning with the Rapids above the Horseshoe Falls, rotated from left to right, shows the entire Horseshoe, and the Canadian side of the falls. The Horseshoe Falls, the American Falls, shows the Suspension Bridge; passes the American Falls, and ends looking up the Rapids above the American Falls. This picture is taken from Goat Island. **\$1.00**
CODE WORD: UNTERIO. Length, 100 ft. Price—**\$12.00**
PANORAMA LOOKING DOWN NIAGARA FROM NEW SUSPENSION BRIDGE. (C) Taken from the Suspension Bridge, looking down the American Falls, and the Horseshoe Falls. **\$1.00**
HORSESHOE FALLS FROM AMERICAN SIDE. (M) **CODE: GABA.** Length, 75 feet. Price—**\$8.25**
AMERICAN FALLS FROM CANADIAN SIDE. (M) **CODE: GABA.** Length, 75 feet. Price—**\$1.00**
AMERICAN FALLS FROM L'ISLE ISLAND. (M) **CODE: GAB.** Length, 100 feet. Price—**\$1.40**
RAPIDS ABOVE AMERICAN FALLS FROM BRIDGE TO GOAT ISLAND. (M) **CODE: GABT.** Length, 50 feet. Price—**\$5.50**
GREAT GEORGE R.R. NIAGARA. (M) **CODE: GABE.** Length, 400 feet. Price—**\$4.40**
WHIRLPOOL RAPIDS. (D) Showing the Whirlpool Rapids, taken from a car on the Great George Road. **\$1.00**
FISSIONAR. Length, 54 feet. Price—**\$6.48**
HORSESHOE FALLS. FROM CANADIAN SIDE. (C) **CODE: GABA.** Length, 75 feet. Price—**\$8.25**
RAPIDS ABOVE AMERICAN FALLS FROM AMERICAN SIDE. (M) **CODE: GAIN.** Length, 75 feet. Price—**\$8.25**
WHIRLPOOL RAPIDS. (M) **CODE: GAFB.** Length, 100 feet. Price—**\$11.00**
LOWER RAPIDS OF NIAGARA FALLS. (C) Taken from the front of a moving car on the Great George Road. **CODE: FLSIOA.** N.Y. **\$6.48**
NIAGARA FALLS IN WINTER. (C) Taken at Niagara Falls, N.Y., in the winter from Goat Island, showing the American Falls, including their cascades, and the Horseshoe Falls, and the surrounding country. The much talked-of ice-bridge is shown at its best. **\$1.00**
CODE: FUNNYMAN. Length 41 feet. Price—**\$1.00**
PANORAMA, HORSESHOE FALLS IN WINTER. (C) This subject shows the Horseshoe Falls from Goat Island, showing the surrounding shores covered with ice and snow. The dazzling effect of the sun on the snow is very noticeable. A magnificent spectacle. **\$15.00**
YALABAN. Length, 100 feet. Price—**\$1.00**
SLIDING DOWN ICE MOUNDS, NIAGARA FALLS. (C) Thirsty winter scenes shows young people sliding down the ice mounds of the Horseshoe Falls in great numbers. The height is 100 feet. This is the favorite winter sport at Niagara during the cold spell and visitors from all over the world come to enjoy it. **CODE: WINTER.** Length, 100 feet. Price—**\$24.00**

THE ROYAL GORGE (PANORAMIC.) (U) Everybody who has read or heard of Colorado knows about this wonderful piece of railroad. Many years ago there was a fight between roads for possession of this narrow canon at that time believed to be the only way through the front range of mountains toward Leadville and

CHICAGO PROJECTING CO.,

MOTION PICTURE FILMS.

the golden west. The Arkansas river rushes like a mill race between two walls of rock 2,000 feet high. Nearly or quite four miles of track are displayed in this picture and that includes not only the best portion of the Royal Gorge but the wonderful hanging bridge as well. Code word, GRIFFIN. Length, 150 feet. Price.....\$18.00

PIKE'S PEAK TOBOGGAN SLIDE. (T) One of the sights of the Cog Road is the little toboggan the workmen use for coming down the road after the trains have all departed for the day. This toboggan is simply a board with a fin that runs between the two rack rails. A piece of pipe extending across the outer rails acts as a sort of guide or outrigger. A friction brake runs between the racks. When a man is seated on this flimsy affair he can drop down the slide three miles a minute if he so desires. A trail of fire shoots out behind him and instant death with horrible mauling would follow a single hitch. The run was made by the general manager of the road in person. A fine film photographically and artistically. Code word, TOBOGGAN. Length, 100 feet. Price.....\$12.00

ARRIVAL ON SUMMIT OF PIKE'S PEAK. (U) No more wonderful road exists in the world. The engines push the cars up the mountain and proceed them coming down. The rails serve only as a guide. Two rack bars into which cogs fit give a crisp for applying the power. The camera was placed on the summit, and shows the train slowly climbing over the edge of the mountain. When the train stops the people rush out and walk toward the camera. Very interesting. Code word, ARRIVAL. Length, 50 ft. Price.....\$15.00

PANORAMA OF COG RAILWAY. (T) A very clever picture made from the front end of a cog train and showing the remarkable scenery between the half-way house and Hell Gate. One of the best of the Cog Road series and a good picture to have if you can't afford to get the set. Code word, UPWARD. Length, 100 feet. Price \$12.00

LAVA SLIDES IN RED ROCK CANYON. (U) Taken from a car placed ahead of the two engines on a regular express train which was pushed around the sharp curves at sixty miles an hour. The scenery seems to spring right at the audience and causes everybody to hold their breath. On the left of the scene are the lava slides, great masses of broken rock piled down the side of the mountain. The Frying Pan river with millions of trout rushes by on the right. The track twists and curves and seems to run directly into the mountain, but turns just in time and the camera catches a new and even more beautiful view.

Code word, RED. Length, 200 feet. Price.....\$24.00

Code word, ROCK. Length, 10 feet. Price.....\$16.00

Code word, LAWN. Length, 70 feet. Price.....\$8.40

FUN IN THE GLENWOOD SPRINGS. The largest hot water pool in the world. Men and women are swimming, jumping, diving and walking on the banks. A toboggan slide and spring board furnished chafe and cut up queer antics as they strike the water. Nothing objectional to any audience. Code word, GLENWOOD. Length, 100 feet. Price.....\$12.00

PANORAMA OF THE PASS. (T) Five miles of the most sublime of Rocky Mountain scenery taken under exceptionally favorable circumstances. The Pass extends from Manitou through the mountains at the base of Pike's Peak. The narrow gorge was the pathway down which the Indians brought their sick and infirm out to the healing springs at the base of the peak and legend declares that no matter how fiercely the tribes fought and struggled elsewhere there was never any trouble while the pilgrims were in the pass. This picture was taken from the pilot of a special train running nearly fifty miles

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

an hour down a grade of 225 feet to the mile around sharp curves of sixteen degrees curvature and through nine tunnels. The track winds around the precipitous sides of the gulch over a roadbed blasted out of solid rock. Below, hundreds of feet are the little stream and the wagon road over which millions of dollars of treasure were brought from Leadville in the early days. This was the famous sort of stage rubbers. Code word, DOLOMITE. Length, 155 feet. Price.....\$22.20

HYDRAULIC GIANTS AT WORK. (T) Hydraulic placer mining is an attractive subject for people who have read of the early days of California. At Telluride Colo. in the heart of the Rockies, are shown two giant nozzles at labor ripping down the side of a mountain and our picture shows the enormous streams of water in very realistic manner. Code word, PLACER. Length, 55 feet. Price.....\$10.20

FALLS OF MINNEHAHA. (F) The "Laughing Waters" of Long fellow's "Hiawatha." A beautiful view of this picturesque and celebrated waterfall. Code word TUGENBUND. Length, 30 feet. Price.....\$7.20

THE DEADWOOD COACH. (U) You have all heard of the famous coach running through the Black Hills in the early days; this is a picture of it as it was drawn along the streets of Chicago during Buffalo Bill's Wild West parade. Code word, HARVE. Length, 50 feet. Price.....\$6.00

ARRIVAL OF TOURISTS AT THE HOTEL YELLOWSTONE PARK. (C) Showing a number of four and six horse coaches driving up to the broad hotel verandah where the guests alight and are received by the host. Code word GAUGRAFTEN. Length, 30 feet. Class A. Price.....\$16.15

ON YELLOWSTONE LAKE. (D) Showing the only excursion boat plying on this picturesque body of water many hundred feet above the level of the sea. Code word GAUGEILICO. Length, 34 feet. Class A. Price.....\$8.10

SNOWALMIE FALLS. (F) Located near Seattle, Wash. It is 285 feet high and furnishes power for lighting all the towns and cities near Seattle. A beautiful scene and an excellent piece of photography. Code word UNSCALING. Length, 55 feet. Price.....\$8.25

PELLING AND SHIPPING HUGE TREES. (G) It shows the wood choppers felling enormous trees. As each tree falls, it is seen to carry with it all the small trees and many branches of the taller ones. After the trees are cut down they are hauled to the river by dunnies. A chute of heavy logs is built from a point high up on the banks of the river to a distance of about thirty feet out in the water. The logs after being trimmed are cut into great logs, are shot down the chutes into the water, where they are coupled together and floated down stream to a landing place near the saw mills. As the logs strike the water when leaving the chutes, they throw the spray high in the air, presenting a beautiful effect in the picture. The landing place above referred to is next shown. Here is another chute up which the logs are hauled and loaded on cars specially constructed for this work. The next and last scene shows a train load of logs being hauled to the saw mill. An excellent piece of photography. Code word UPCLIMBING. Length, 35 feet. Class B. Price.....\$15.00

BURNING WASTE TIMBER AT PORT BRANLEY. (D) Largest lumber mill in the world. Shows the disposition that is made of the slabs and waste of this plant. The fire is fed by overhead pulley trains, and is never allowed to die out. Code, FARKERENT. 32 feet. Price.....\$3.84

LOG ROLLING CONTEST. (F) Picture secured at Lake Washington, near Seattle, Wash. A favorite sport in that section. Prices

CHICAGO PROJECTING CO.,
MOTION PICTURE FILMS.

are offered to those who stay on the logs the longest. Some men roll long distances before falling into the water. Very funny. Code UNSCIENCE. Length, 50 feet. Class A. Price..... \$10.00
HYDRAULIC MINING IN OREGON. (D) Two great hydraulic giants are seen playing nine inch streams of water on high banks of pay gravel. A very interesting subject. Code, GARRIBANT. 50 feet. Price..... \$8.50

Travel—United States—California.

THE PAIDADEF ROSES. (K) Many people have had the opportunity of seeing this, the grandest sight of California in mid winter, when the inhabitants behold the various vehicles with fest of roses and, forming in line, proceed to different localities. A novel and most beautiful subject; realistic. Code word, RAY. Length, 50 feet. Price..... \$6.00
FOURTH AND MARKET STREETS, SAN FRANCISCO. (D) One of the busiest thoroughfares of the Western metropolis is shown with its sky-scrapers. Code, GARRIBAL. 30 feet. Price..... \$3.50

Travel—United States—Chicago.

TRIP AROUND THE UNION LOOP. (T) This is a very clever film taken from the front of a train moving around the celebrated Union Loop, Chicago. In passing over the loop the elevated train portrays the principal business streets of Chicago, incidentally showing the tall buildings, the massive structures and the various objects of interest which have made Chicago the subject of conversation the world around. Short of an actual trip through the city with a guide you could not gather such a realistic and complete idea of this great city. Code word LOOP. Length, 200 feet. Price..... \$3.00
VIEW OF STATE STREET. (T) From a street car, on a bright, warm, sunny day. This picture takes in both sides of the street and shows the thorough going and coming. The people crossing the streets the various sky-scrapers, teams, the immense stores, the elevated railroad and the famous dead man's curve corner State and Madison

Seaside.

PANORAMIC VIEW OF ATLANTIC CITY BEACH. (N) Shows no less than a thousand persons bathing. Also shows the fresh young man exhibiting his acrobatic feats. Code, T.A.H. 100 feet. Price.....\$1.00
BATHING AT ATLANTIC CITY. (M) Shows the waves breaking on the shore, people walking around and bathing, and the usual scenes and incidents familiar to visitors at Atlantic City. Code, T.A.H. 50 feet. Price.....\$5.00
ATLANTIC CITY LIFE RESCUE. (M) A woman swimmer is carried out with the tide. The life guards, at the risk of their lives, bring her to the shore where she is resuscitated. Every movement in this subject is plainly seen and shows the mode of treatment given by the life-savers at Atlantic City. Is also an excellent picture of the beach. Code, T.A.H. 75 feet. Price.....\$8.50
BABY SHOW—Atlantic City. (M) The baby show on the Boardwalk is very interesting in that you can see them in endless variety. One who dives overboard, but is immediately rescued by one of the crew who dives after it. Code, G.A.T.A.H. 50 feet. Price.....\$5.50
LIFE RESCUE AT ATLANTIC CITY. (G) Illustrates the perils of summer bathing on the Atlantic coast, and also of the admirable manner in which the life-savers perform their duty at our great summer resorts. The beach at Atlantic City is shown, one of the swimmers gets caught in the undertow, and is being rapidly carried out to sea. An extremely heavy surf is running, and the life-savers launch the life boat with great difficulty and battle on through the enormous breakers. Several times the boat appears to be standing almost on end and it is with difficulty kept from swamping, but finally reaches the vicinity of the drowning man, where one of the life-savers dives overboard and rescues the victim from the watery grave. He is brought ashore and the work of resuscitation commenced. Code word, UPBEATHE. Length, 110 feet. Class B. Price.....\$13.50
SURF SCENE. (G) An excellent picture of the surf breaking higher scenes ever secured in animated pictures. Code word, VAKTEL. Length, 65 feet. Class B. Price.....\$7.50
A HEAVY SURF AT ATLANTIC CITY—Atlantic City, N. J. (C) A panoramic view showing a large crowd of bathers enjoying the surf. An unusually good seashore picture. Code, G.A.T.A.H. Length, 51 feet. Price.....\$6.12
THE BEACH AT ATLANTIC CITY—Atlantic City, N. J. (D) Another and nearer view of the bathers in the surf at America's most popular summer resort. Code, G.A.T.A.H. Length, 25 feet. Price.....\$3.00
A CAKE WALK ON THE BEACH. (C) A typical crowd of Coney Island bathers in a very ludicrous cake walk on the sand. Very amusing and fine photographic picture. Code, RETAVERUNT. 135 feet. Price.....\$15.00
BEACH SCENE—Coney Island. (N) The famous Manhattan Beach at Coney Island, N. Y. An interesting and refreshing view. Code, T.A.H. 50 feet. Price.....\$5.00
SNAP THE WHIP—Rockaway Beach. (D) A company of pretty bathing girls in fetching suits playing this popular game on the beach. Code, G.A.T.A.H. 27 feet. Price.....\$3.24

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

"LEAPFROG" ON THE BEACH—Far Rockaway, N. Y. (C) Here we find the pretty bathing girls playing "Leapfrog." The incoming surf makes a very effective background to the scene. Code, T.A.H. 27 feet. Price.....\$3.24
AT BRIGHTON BEACH. (H.L.D) Code, B.A.T.Y. 100 feet. Price 12.00
THE ADVENTURE OF SANDY McGRIGOR. (C.L.G.) We can recommend this as very funny. A seashore scene, with a large rock in the foreground. A young Scotchman in kilts struts up the beach, and finding a convenient place where he can bathe, proceeds to disrobe behind the rock and throws his garments to the front. A couple of young lasses come up, and finding the clothes proceed to look for the man. Sandy dodges them around the rock, and some comical amusing incidents ensue. Sandy finally escapes from his dilemma by some clever reversed printing. Code, SANDGRIGOR. 250 feet. Price.....\$54.80

Bathing—(see also Seaside.)

BATHERS WITH HIGH DIVING. (U) Full of life and action and shows expert diving and swimming. It was taken in the bright sunlight and is an excellent picture. Code word, DIVERS. Length, 50 feet. Price.....\$6.00
BATHING SCENE NO. 2. (T) Shows bathers or tubogang slide shooting down into the water, diving from spring boards, etc.; good film. Code word, BATHERS. Length, 50 feet. Price.....\$6.00
FANTASTIC DIVER. (R) A gentleman jumps, completely dressed into the water. To our great surprise he jumps back to his place, but being dressed in a fine bathing suit. He gives us a performance of jumping which is specially interesting, as we cannot understand how he can jump out of the water. The last time he reappears from the water he is dressed again in his best suit. Length, 11 feet. Price.....\$13.68
A HOT TIME ON THE BATHING BEACH. (C) Showing the famous bathing beach near Chicago (known as Alaska Beach), for a bathing and swimming picture this is the real thing; lots of ladies and gentlemen in swimming with real bathing suits on. Code word, BACON. Length, 40 feet. Price.....\$4.50
REVERSED BATHERS. (C) Two swimmers appear on the edge of a beautiful river, evidently having come prepared for a swim as, upon removing their clothing, they are seen to be attired in bathing suits. They dive head first into the water. From this point on the action of the film is reversed, producing very comical effects. The bathers spring backwards out of the water, feet first, and each article of clothing jumps up from the ground and flies into its place, causing shrieks of laughter. Code word UNBREAKING. Length, 100 feet. Price.....\$15.50
MIDWINTER BATHING. (C) This astonishing picture was made at the "T" Street bath, Boston, in mid-winter, the temperature being only a few degrees above zero. A number of sturdy men in bathing trunks are first shown playing on the ice, some of them having skates attached to their bare feet and others playing hand-ball. After their exercise they run along the shore, upon which the ice hummocks are piled up and plunge from the end of the ice-covered pier into the freezing waters of the bay. During the entire picture the frosty breath of the men is plainly discernible. The film is of the very best photographic value, and the subject in every way one of the most remarkable ever made. Code, RETENIDAS. 350 feet. Price.....\$16.32
DIVING THROUGH PAPER SCREENS—Bath Beach, L. I. (D) A novel form of aquatic sports at Bath Beach. This has a very humorous effect in reversed motion. Code, FITTEREAS. 34 feet. Price.....\$6.48

CHICAGO PROJECTING CO.,

MOTION PICTURE FILMS.

DOWN THE SLIDE. (U) A number of young ladies and gentlemen are at the swimming school, when they propose the game of "Poller the Leader," and such sights and scenes will hardly be repeated again in that swimming school. They slide down the toboggan ramp, play leap-frog and do various other things they would like to do in action. This picture is suitable for any class of audience. Code word, SLIDE. Length, 50 feet. Price.....\$6.00

FANCY DIVING.—Bath Beach, L. I. (C) A large company of expert swimmers diving from a high platform at Bath Beach, and swimming toward the camera. Code, PUTTERGELD. 54 feet. Price.....\$6.48

Railway Trains.

OVERLAND FLYER. (U) Showing a scene at the depot at La Junta, Colorado, upon the arrival of the famous Overland Flyer of the A. T. & S. F.; showing the people alighting, the baggage truck being loaded, the engineer leaving engine to receive orders, the people clustering aboard, the conductor's signal to start, and then they leave—fine. Code word, OYER. Price, 25 foot lengths.....\$3.25

THE PIONEER LIMITED. (T) Showing the fine train of the C. M. & St. P. at Morton's Grove. The speed register showed that the train was running at the rate of 78 miles per hour when picture was taken. Code word, BLISS. Length, 50 feet. Price.....\$6.00

PENNSYLVANIA LIMITED. (T) Running between New York, Pittsburg, Philadelphia, Washington and Chicago. A fine specimen of the art of motion photography. The train was running at a high rate of speed through the famous Fairmount Park in Philadelphia. The engine on the train was specially built for speed and safety, and the cars are full vestibuled. The upper part of coaches is light, while the body of the train is dark. The windows in the train are large French plate glass. When colored this picture is truly beautiful. Code word, BLUE. Length, 50 feet. Price.....\$6.00

PIONEER LIMITED (Panoram). (U) This picture was taken from the Pioneer Limited as it comes along the shore of the Mississippi river. It shows steamboats, small boats and shore line. An interesting picture, showing the contrast between the old river style of travel and the more modern railway trains. Code word, BLOCH. Length, 50 feet. Price.....\$6.00

ARRIVAL AND DEPARTURE OF TRAIN. (C) Length 98 feet. Price.....\$11.76

THE ROCKY MOUNTAINS LIMITED. (TU) A good picture of a superb train of the great Rock Island Route, showing the famous train full vestibuled, tearing across country en route to Denver at the rate of 60 miles per hour. Code word, BLACK. Length, 40 feet. Price.....\$4.80

THE CALIFORNIA LIMITED OF THE SANTA FE ROUTE. (T) A fine view of one of the grandest and most beautifully and fully equipped trains in the world. This picture was taken near Los Angeles, California, and shows the foliage of that section of the country. The train is full vestibuled, electrically lighted, and is running at the high rate of 65 miles an hour. Code word, BLAKE. Length, 50 feet. Price.....\$6.00

*Discontinued. See "Note", Page 195.

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

PIONEER LIMITED. (T) Showing, as it does, a most wonderful train under most wonderful circumstances, at Morton's Grove, traveling at the rate of 78 miles per hour. You see it in the distance, then suddenly, with a swish and a swirl, it is past; then you see it again crossing the track, when—look out—here comes a train on the other track, going in the opposite direction; will it hit the wagon? No, it is a very narrow escape. Code word, LIMITED. Length, 75 ft. Price.....\$9.00

ARRIVAL OF TRAIN AT GARDNER. (D) Showing the arrival of the regular train at Gardner at the entrance of Yellowstone Park, and the detraining of the passengers. Code word GAUGRA. Length, 97 feet. Class A. Price.....\$14.06

PANORAMIC VIEW OF SWITCH BACK RAILROAD MATCH CHUNK. (F) A fine picture taken from the front end of a rapidly moving train, showing a steep ascent up the celebrated switch-back incline then rushing at a high rate of speed through beautiful scenery around cliffs, mountain gorges, etc. Very thrilling and realistic. Length, 100 feet. Price.....\$22.80

CLIMBING JACOB'S LADDER.—Mt. Washington, N. H. (D) Showing the train with its peculiarly constructed locomotive climbing up the steep trestle work of the cog railroad on Mt. Washington. Code, FUSSPUS. 53 feet. Price.....\$6.24

SNOW-PLOW BUCKING A 15-FOOT SNOW SLIDE. (D) This illustrates one of the great dangers and difficulties of railroading in the mountain districts. Code, GARREVOLE. 68 feet. Price.....\$8.16

BUCKING THE BLIZZARD.—Near Watertown, N. Y. (C) During the great blizzard of 1898, the railroads of northern New York were buried in snow for days, and it became necessary to use giant rotary snowplows in order to keep the tracks clear. The plow is pushed by two of the heaviest type of locomotives, and throws the snow with great velocity hundreds of feet. Code, FUNNILY. Length 25 feet. Price.....\$3.00

Steamships.

AN OCEAN FLYER.—N. Y. Lower Harbor. (D) The steamship "St. Paul" of the American Line, running at full speed in the narrows of New York Harbor, as she starts on her regular voyage to Southampton. Code, GALGHOUF. 35 feet. Price.....\$4.50

S.S. "DEUTSCHLAND" LEAVING HER DOCK, HOBOKEN, N. J. (P) A fine picture, taken from the forward bridge of the "Deutschland" as she backs away from her wharf in Hoboken. In the foreground is the bow of the ship with the great army of stearage passengers waving adieu to their friends on the wharf. Thousands of people are congregated on the fine pier of the Hamburg-American line, waving good-bye to friends on the ship. Numerous tug boats and river craft are gathered around the great vessel, making an interesting marine view. Code word, UNKLARHEIT. Length, 50 ft. Price.....\$6.00

THE SUMMER EXODUS.—Hoboken, N. J. (C) A first-class picture of the twin-screw express steamship "Columbia" of the Hamburg-American Line, leaving her pier with a great crowd of travellers aboard. Code, GARAVIM. 53 feet. Price.....\$6.24

PILOT LEAVING S. S. PRINCESS VICTORIA LOUISE. (SANDY HOOK, N. J.) (G) Shows the pilot climbing over the rail and down a rope ladder. A rowboat, pulled by two men, comes alongside. The pilot jumps in and they pull away. Code word UPLIFTING. Length, 50 feet. Price.....\$7.20

A HEAVY SEA. (R) Length, 49 feet. Price.....\$6.88

Launching Steamer. (T) 50 feet. Price.....\$6.00

FROM MONTE CARLO TO MONACO. (D) Panorama taken from the pilot of a locomotive, and is unusually interesting. Covers the complete trip from the station at Monte Carlo, around the curves overlooking the harbor to the station of the city of Monaco. Many beautiful villas are passed en route. Code, FRODEREBBE AND FRODEREMO. 100 feet. Price.....\$13.00
STEEPLECHASE. (Q) We are at the famous race track of Anteuilh near Paris, France. It is a beautiful spring day, and a large crowd has assembled to witness the event of the season, the great steeplechase. A jolly party of four, two ladies and two gentlemen, are watching through their field glasses the most interesting parts of the track, and we follow them from the grand stand, crowded with spectators of both sexes to the large row of vehicles, most of which are coupes. From the busy betting ring we arrive at the paddock, just in time to see twelve spirited horses canter up to the start. The starting machine works splendidly and off they are, to take in their course, hurdles and fences, ditches and walls. But a creek proves fatal to four of the contestants, and only one rider is able to remount his horse. Two men are carried from the place, the riderless horses following the leaders. The pace gets sharper and sharper but the favorite, through badly handicapped by his fall, creeps up to the other horse and under great enthusiasm of the excited crowd, he gains at every jump. The signs at the judge's stand shows us that "Gagant" has won the trophy. Length 475 feet. Price.....\$57.00

SHOOTING RAPIDS, KILLARNEY, IRELAND. (P) Taken after series of heavy showers, this picture shows the world-famed Rapids at a moment when they are really dangerous. After seeing the interesting and arduous operation of getting a boat up the rapids against the stream and under the picturesque old ruined bridge, we take our stand at one side of the Rapids, looking towards the bridge, and see boat after boat come rushing and twisting under the bridge and whirling past the camera, upon the tumbling, eddying waters. Then we have the actual shooting of the Rapids as seen from the boat. A complete illusion, which for the audience has the same effect as if they were actually undergoing the risk of being in the boat. In the foreground are the anxious faces of the boatmen, straining every nerve to keep the boat straight and steady, and prevent her being tossed against the bridge or boulders of rock on either side. Code word, VARIABLY. Length, 155 feet. Class B. Price.....\$18.00

THE RIVER SHANNON. (D) A beautiful panorama of the River Shannon at Tilloo, Ireland, including the weir, salmon leap, cathedral, hotel, etc. Code, RIVONNON. 100 feet. Price.....\$12.00

MOTION PICTURE FILMS.

Travel—Foreign—Italy.

TRIP THROUGH ITALY. (Q) A very realistic film, which shows different cities of Italy, the Vesuvius and other interesting points. Length, 85 feet. Price.....\$94.44

GLIMPSES OF VENICE. (P) A series of five representative view of Venice. The first shows an Italian battleship anchored and other craft plying over the waters leading to the Grand Canal. A panorama view taken from a fast moving steamer and shows many characteristic Venetian architectures. A view of St. Mark's the Doge's Palace with a sectional panorama of the Grand Canal, the Doge's Palace and the prison. A circular panorama of St. Mark's the Doge's Palace and the prison, followed by another interesting square and its numerous pigeons. Code word URE section of the upper portion of the Grand Canal. Code word URE. Length, 150 feet. Class B. Price.....\$16.60

FEEDING PIGEONS IN STREETS OF VENICE. (T) Showing the natives of Venice in front of that old famous St. Mark's church, feeding the pigeons. This is a most beautiful picture. Nothing is more beautiful in motion pictures than flying birds. Code word, BELL. Length, 50 feet. Price.....\$6.00

FEEDING PIGEONS IN FRONT OF ST. MARK'S CATHEDRAL, VENICE, ITALY. (S) A pretty scene, showing a party of ladies and gentlemen feeding a large number of tame pigeons, which eat corn from their hands and show no sign of fear. Code word URANKALK. Length, 60 feet. Price.....\$7.20

EATING MACARONI, STREETS OF NAPLES, ITALY. (P) There is more comedy in this picture than if it had been posed for. Men and boys are seen eating steaming dishes of macaroni, the favorite food of the poor. Code word URANOION. Length, 80 feet. Price.....\$9.60

PANORAMA, TIVOLI, ITALY, SHOWING SEVEN FALLS. (G) Tivoli is one of the most picturesque and one of the oldest towns in Italy. The picture shows the town, which is situated on a high hill covered with olive trees. A fine view of the Seven Falls is given. Code word URANOUS. Length, 50 feet. Price.....\$6.00

MOONLIGHT, LAKE MAGGIORE, ITALY. (P) This is something never before attempted in motion picture photography, and it has proven to be successful beyond expectation. The beautiful ripple of the water with the glitter of the moonlight on same, makes it so realistic that one can almost imagine they hear the happy voices of the people in the gondolas as they pass by. Code word UNEXTNIS. Length, 65 feet. Price.....\$7.80

ROME AND THE VATICAN. (P) Panorama of Rome, showing the capital, Spanish Staircase, St. Peter's Cathedral, the Vatican and the Fountain of Trevi. Code word URENKEL. Length, 145 feet. Class B. Price.....\$17.40

ELECTION OF POPE PIUS X. (N) A rare picture, and one that will interest those of all denominations. The conclave of cardinals is seen in the opening, and after the final vote is taken they disappear, and the newly elected Pope is seated on a platform and carried about on the shoulders of his guard. The picture is good in every particular, and the photography is excellent. Code word ELECTION. Length, 125 feet. Price.....\$13.43

LAPLANDERS AND REINDEER. (G) Shows first a family of Laps outside their hut, then a life-sized picture of two men holding antlers; afterwards two women (one of whom is smoking) with a pretty little Lap child. The picture shows the facial expression of this marvelous race of people who smear their bodies with oil, dress in skins, and live on the flesh of the reindeer, which they slaughter. After many objections had been overcome, they were persuaded to photograph, when a picture was obtained of a herd of over 200 reindeer. A unique picture and one of much interest. Code word, FROM CHRISTIANIA TO NORTH CAPE. (R) After admiring the most beautiful streets of Christiania and its magnificent port, the excursionists board motor boats and are taken to the whalers anchored in Ramsdale Harbor. They are now in the open sea, surrounded by a panorama of every variety, and at a distance is seen the helms. This picturesque excursion terminates with a visit to the sun and pile them up one upon another. They then drive in a herd of reindeer, while others are seen at their huts attending their daily seen above the horizon casting its rays of light in the beautiful still waters. Length 426 feet. Price.....\$51.12

RUSSIAN ANTI-SEMITIC ATROCITIES. (R) A very interesting film showing Russian soldiers demolishing a synagogue and ill-treating the Jews. Length, 114 feet. Price.....\$15.08

ASSASSINATION OF THE GRAND DUKE SERGIUS. (Q) The first scene shows the nihilists at their secret council, plotting against the

279

CHICAGO PROJECTING CO.,
MOTION PICTURE FILMS.

life of the Grand Duke Sergius. They draw lots to decide at whose hands he shall meet death. In the next picture the Duke is shown riding in his carriage before the Royal Palace. The conspirators appear suddenly and one of them throws the bomb, which demolishes the carriage and kills the occupant. A crowd forms and the murderer is seized by the police. Length, 14 feet. Price, \$1.30.

REVOLUTION IN ODESSA. (R) This is a very interesting film showing us three recent events in Odessa. We see first the battle ship "Prince Potemkin" in the harbor. The second scene is as they bring their complaints, and in a few minutes the ship is in the hands of the mutineers. They are headed now by an officer whom they encourage them and promises to stick to them. Odessa is bombarded and through the glasses of the officer we witness the plundering and burning of the city. Length, 22 feet. Price, \$3.10.

THE Nihilists. (D) Copyright 1905. A magnificent production in seven sensational scenes, illustrating the awful conditions as they exist in Russia at the present time. SCENE 1—Betrayed by a government spy. SCENE 2—Russian justice—the dungeon of a military daughter. SCENE 3—The vain plea to the governor by the two sons and maid. SCENE 4—On the way to Siberia chained in a line of criminals. SCENE 5—Joining the Nihilists, and plot to kill the governor not killed by a bomb from the hand of the sister. Included in the foregoing scenes are, two terrible explosions of dynamite bombs, the bombing scene in Russian dungeon, across the snow-clad Siberian steppes, the underground headquarters of the Nihilists, the outer gates of the Grand Duke's palace, grand ball room of the Governor's palace. Code, NH. 84 feet. Price, \$100.97.

FASHIONABLE DRIVING, PALACE QUAY, ST. PETERSBURG. (F) Scene secured on the Palace Quay, at St. Petersburg, Russia, and shows a large number of peculiar equipages used by the people of that city. Code word VALERIOS. Length, 55 feet. Price, \$8.25.

The above films include a series of eighteen pictures covering all the interesting climbing scenes, incidents and experiences of a party making the ascent of this, the highest mountain in Europe. The various scenes are as follows: 1—Preparations for the ascent and descent of party. 2—Crossing a mountain torrent. 3—Party leaving the Pierre Pointe Inn, 6,800 feet. 4—Crossing Glacier des Bossons, the Pierre Pointe Inn, 6,800 feet. 5—The "junction" of glaciers de Tacoumaz and des Bossons. 6—Traversing the glacier de Tacoumaz. 7—Climbing two chamoises on the same glacier. 8—Reaching the Grand Mulets, 10,125 feet. 9—Arrival of the party at the Grand Mulets. 10—Life at the Grand Mulets. Partaking of refreshments. 11—Sunset panorama from the summit, 15,000 A. M. 12—Leaving by moonlight from the Grand Mulets. 13—Ascending the snow slopes towards the Petit Plateau, 3 A. M. 14—A cloud sea from the Petit Plateau, 4 A. M. A wonderful sight photographed from above the clouds. 15—Crossing a snow bridge near the Grand Plateau, 15,000 feet. 16—Finding a way over a great crevasse near la Tourrette, 15,300 feet. 17—Ascending the slope below the summit over a snow bridge during a snow storm, 15,500 feet. 18—The summit of Mont Blanc, 15,781 feet.

A TRIP ACROSS THE ALPS. (R) These beautiful views are seen from the rear of a train crossing the Alps, presenting you with some of the most wonderful mountain scenery. Length, 161 feet. Price, \$19.68.

ENGADIN IN SWITZERLAND AT MOONLIGHT. (Q) This picture was taken in the most frequented part of Switzerland, between Chamonix and the Montblanc. It shows the region of perpetual snow, and before reaching his destination the traveler must wind his way through numerous tunnels and over many chasms. The scenery is unsurpassed, and its beauty and grandeur have to be acknowledged by even the most skeptical. To display this scene more effectively we have given this film a special blue tint. Length 341 feet. Price \$44.28.

COASTING IN THE ALPS. (CUL-C) Code, BOAY. 125 feet. Price, \$15.00.

PANORAMIC VIEWS OF THE ALPS, SWITZERLAND. (T) A most magnificent scene. The audience is carried through all the varieties of beautiful scenery. First a chain of snow-covered mountains then descending into the valley past cascades, over viaducts and through cuttings the traveler is whirled at a tremendous rate and shown beautiful glimpses of snow covered mountains, and woods, finally pulling into the town of Chamonix where it stops. This film is a continuation of the above and together make a grand show of Swiss scenery. Code word ALPS. Length 165 feet. Price, \$19.80.

PANORAMA, DESCENDING MT. BLANC. (T) This is a fine view of Alpine scenery and gives a grand view of the Alps, showing glaci-

MOTION PICTURE FILMS.

fers in the distance as the train rushes down the mountain, past houses, over large viaducts, giving a beautiful view of the valley below. Very clear and sharp pictures, showing great distance and sure to please. Code word BLANC. Length, 105 feet. Price, \$1.90.

ASCENDING MOUNT PILATUS (SWITZERLAND) (R) Spread out before us is the great panorama of snow-clad mountains. These pictures are taken from the engine of a cog railway, which finally arrives at the top of the Mount Pilatus, bringing us to the famous hotel which is visited by thousands of tourists. Length, 506 feet. Price, ... **\$1.00.**

Travel—Foreign—Samoa and the Fiji Islands.

SAMOAN CHILD DANCE. (T) This dance was taken at one of the remote mountain villages on the Island of Tutuila. A sprightly little girl of nine years, inspiring by her hand music (hand clapping) of a dozen of her youthful playmates, leads the dance in a unique and graceful fashion. Code word, ABERN. Length, 75 feet. Price \$9.00

CANOERACE. (T) A party of four young Samoan boys, in native outrigger canoes (dugouts) start out at sea and race to the beach. When the canoes touch the white sand, each canoeist strikes a low log or outrigger out of the water and passes close to the camera. Code word, ABE. Length, 40 feet. Price \$4.00

PIJAN BAYONET DRILL. (U) The Pijian standing army consists of about 100 men, all told, and the private soldiers receive the princely salary of \$1.75 a month and board. Near the close of the picture one awkward soldier drops his gun during the action, and is obliged to take several steps out of the ranks to pick it up. Code word, ABEL-BOD. Length, 55 feet. Price, \$4.80.

MAORI DANCE, NEW ZEALAND. (T) A party of ten young men and women, in all their savage splendor, dressed in leaves and flowers, go through a spirited dance to the accompaniment of drums and weird songs. The dance consists of rhythmical and graceful swaying of the arms and body and clapping of the hands. Code ABERD. Length 60 feet. Price \$6.63

SAMOAN DANCE. (U) A party of fifteen or twenty young men and women go through a lively "Siva Siva", or native dance. With a background of tropical shrubbery, such as can only be seen in Samoa, combined with the exceptionally rapid and graceful movements of the pretty young Samoan women, make this a film of unusual interest.

Code ABLEPSY. Length, 50 feet. Price\$6.00
FILJIAN FIRE WALK OR FIRE DANCE. (T) Taken on Island of Viti
 Levu. Walking on burning hot stones with bare feet seems incredu-
 lous, but the Fijian islander knows how to do this. Following the fire
 walking, the almost naked attendants run wildly about, piling leaves
 on top of the hot stones, from which great clouds of smoke are driv-
 en, and

crowd' and around which the curious mob of spectators surge and crowd. Code, ABLETS. Length, 40 feet. Price \$4.80

CEREMONIAL PROCESSION AND FOOD OFFERING. (T) Ceremonial procession attending a "food offering" at Mulinu, near Apia, Samoa. A Talolo, or food offering, is one of the most interesting of native customs, and is given only when high honors are rendered to the gods.

[illegible]

925 DEARBORN ST., CHICAGO, ILL

MOTION PICTURE FILMS.

FUJIAN WARDANCE OR MEKE. (15) About two hundred warriors, armed with ponderous war clubs and spears, danced in the traditional costumes of their forefathers, go through a swift drill or dance, executing a series of rhythmic and elaborate foot movements and bringing fans and war clubs into surprising climaxes. Such functions as this always and were always important in the life of the old days, when humans were accompanied the cannibal feasts of the old days, when humans were roasted and eaten. Many of these dances are still performed. Length 55 feet. Code: A 110. Price: \$4.95. **\$6.60**

SOLOMON ISLAND DANCE. (T) In the Solomon Islands, which lie off the north coast of Australia, is a race of one-time cannibals, who were as depraved as the Fijians. Only eight or ten years ago a party of missionaries were murdered and eaten by them. This shows about fifty men carrying idols and crude ornaments, as they execute a wild and jerky dance which has the cannibalistic touch in every step. **\$4.80**

DIVING SCENE BY 35 SAMOAN BOYS AT APIA. (T) The Samoan is very fond of the water, and he is a bold and expert swimmer and diver. From a high spring-board the leader dives into the pool, and then the air is filled with a steady line of his fellows, who dive, leap or turn somersaults as they go down; and once in the water they splash and churn the water, while their bright faces express the fun they are having. Code. A.B.O.C. Length, 55 feet. Price. \$6.64

SURF SCENE, FIJI (U) This picture opens with the great waves dashing against the huge black rocks, beating itself into a white foam at the bottom, producing a soul-inspiring effect, and also giving a grand idea of the rocky coast of these islands. Code, ABLING. Length, 50 feet. Price.....\$6.00

WATERFALL, SAMOA. (U) The scene shows one of the many prett falls in the small streams of Samoa, giving a fair idea of the scenery in that country. Code. ABORDER. Length, 35 feet. Price...\$4.2

HAWAIIAN DANCE. (U) The Hawaiians are noted for their love of music and dances. This shows a party of young men and women in native costumes performing some of their native dances. Code. ABORDER. Length, 35 feet. Price...\$4.2

ABORD. Length, 65 feet. Price, \$7.80.

HAWAIIAN DANCE No. 2. (T) This is similar to the above only that the dancers are seated upon the ground at the opening, and stand up towards the end. Code, ABORDANT. Length, 55 feet. Price, \$6.00.

THROUGH SAMOA AND THE FIJI ISLANDS. (T) This series of slides shows the people of all of the islands of the South Pacific.

A TRIP THROUGH SAMOA AND THE FIJIAN ISLANDS. This film is made up from the following named films, and they cover all of the principal points of interest through these wonderful islands. 1—Canoe race. 2—Samoa child dance. 3—Maori dance. 4—Diving scene. 5—Ceremonial procession and food offering. 6—Fijian war dance. 7—Bayonet drill. 8—Fire walk. 9—Solomon island dance. 10—Sunset. **GIAMA. Length, 600 feet. Price, ... \$72.**

Travel—Foreign—West Indies.

STREET CLEANING IN PORTO RICO. (T) This picture shows the black Porto Ricans washing down the street in a novel manner; perfect in every detail. Code word, **BANKER**. Length, 50 feet. Price.....\$6.00

Price.....
MT. PELEE SMOKING BEFORE ERUPTION (IMITATION) (V) A
 comprehensive view before the bursting of the crater, and the bury-
 ing or smothering of the entire population of St. Pierre. The pic-
 ture shows the city and harbor with the ships riding peacefully at
 anchor. Code word, UNLUSTIG. Length, 75 ft. Price..... **\$11.25**
 ...ST. PIERRE.

ERUPTION OF MT. PELEE AND DESTRUCTION OF ST. PIERRE.
(IMITATION) (G) Vivid and exciting from start to finish. It shows accurately the great volcanic disaster, including the explosion of the crater, the falling of the ashes and cinders, the destruction of

CHICAGO PROJECTING CO.,
MOTION PICTURE FILMS.

the buildings and lighthouse, and the sinking of the ships in the harbor. Code word, UNMADENLY. Length, 100 ft. Price \$15.00
NATIVE WOMEN COALING A SHIP, ST. THOMAS, D. W. I. (G) Women (natives of the Danish West Indies) are here seen, coaling ship by means of bushel baskets which they carry on their heads. They walk up a long gang plank, and dump their loads into a coal chute on the side of the ship. This picture was taken very close, showing the women to good advantage. Code word, UPOREST. Length, 85 ft. Price.....\$10.20

Dances.

BUTTERFLY DANCE. (G) As performed by Annabelle, the famous premier danseuse. A charmingly graceful representation of the light and airy flight of a butterfly. Beautiful when colored. Code word, TURBOLENTO. Length, 55 feet. Price.....\$4.20
SERPENTINE DANCE. (G) Two of the most popular dances ever presented. Beautiful costumes and startling effects with the calcium light. Extra fine when colored. Code word, TURBIDITY. Length, 50 feet. Price.....\$6.00
FIRE DANCE. (F) As danced by La Lolo Fuller. A very artistic and interesting film. The dance is executed with the famous ten-yard skirts invented for the wonderful fire dance which had such a phenomenal run at Koster & Blais, New York City. This is the most suitable film for coloring, and when colored it produces all the wonderful effects that are seen in the original fire dances. Code word, UNEASINESS. Length, 50 feet. Price.....\$6.00
SERPENTINE DANCE. (F) In giving a description of this picture it will suffice to say that this is a late picture of the greatest of all serpentine dancers; the one who has set the tongue of the theatre-going public wagging as it never wagged before. Code word, DANCE. Length, 50 feet. Price.....\$6.00
BUTTERFLY DANCE. (D) A very graceful dance with voluminous draperies, by Annabelle Moore, well-known on the metropolitan stage. Code, MISERICOORS. 55 feet. Price.....\$3.12

CAKE WALK. (TU) A fine film and very popular. Code word CAKE. Length, 50 feet. Price.....\$6.00
BLACKVILLE AFTER DARK. (D) Shows a "coon" dance in full swing; all the boys have their best girls; the old fiddler and orchestra are shown seated upon a raised platform; the dance is on. Six coons are shown. A bad coon starts a fight. Razor drawn, girls faint, coon with razor starts to do some fearful execution, when little

MOTION PICTURE FILMS.

coon lets fly with a large 45 gun; finale; coon seen jumping through window; big bass viola broken and dance ends in general row. Code word, BAXTER. Length, 50 feet. Price.....\$6.00
ARABIAN JEWISH DANCE. (F) A native dance taken at Beyruth, Syria, showing the Arabs, decked with picturesque costumes. A weird dance, very interesting. Code word URBAREN. Length, 55 feet. Price.....\$10.50
BLACK SERPENTINE. (D) Same as above, by same artist, but every thing is in black, making a most mysterious and weird effect. Code word, BUZ. Length, 50 feet. Price.....\$6.00
GERMAN DANCE. (T) This is a picture of the very beautiful German national dances danced by Miss Marie Shubert of the German Extravaganza Co. Berlin; it is in native costume; very catchy and sure to please. Code word, CABLE. Length, 50 feet. Price.....\$6.00
BIRTH OF A FAIRY. (U) A very pretty film which we class among the dances, although more strictly speaking it belongs to the order of Pantomime Tableau. It shows seven beautiful children surrounding a gigantic lily with fancy dancing. The lily suddenly unfolds, revealing a beautiful child in the midst of a most gorgeous transformation scene which takes the spectators back to the Christmas pantomimes which they have seen in their younger days. A complete entertainment in itself. Code word, FAIRY. Length, 150 feet. Price.....\$18.00
TOUGH DANCE. (F) "Kid" Foley and "Sailor" Lil doing the popular dance of the brewery in which they claim to be the champions. Code word, UNGETRUBT. Length, 80 feet. Price.....\$9.60
RUFFIAN'S DANCE. (R) Length 141 feet. Price.....\$15.72

CANOE FIGHT. (G) Shows two young athletes engaged in a canoe fight, one of the national sports of Canada. The picture was taken at Lachine Falls, Lachine River, Canada. Each of the contestants is standing in a canoe, and armed with two long poles, on the end of which is a pad. They fight each other vigorously with these poles, the object being to capsize the other's canoe and throw his adversary in the water. Code word, ENSCREW. Length, 75 feet. Class B. Price.....\$9.00
FOX AND RABBIT. (R) The film shows us a fox stealing into a rabbit-quarry. He quickly kills one of his helpless prey, and is in turn finished off by a fox terrier. Length 65 feet. Price.....\$7.80
BOAR HUNT. (Q) Arrival at the rendezvous. The attack. Tally-ho. Length, 328 feet. Price.....\$39.36
DEER HUNTING IN ENGLAND. (M) This is one of Old England's popular sports indulged in by the nobility. It is most exciting and full of animation. The hurdle jumping is particularly fine, and the picture ends by one of the spirited horses throwing one of its riders over his head. Code word, DEERHUNT. Length, 110 feet. Price.....\$12.10
COLLEGE SPORTS IN ENGLAND. (H-L-D) Code, BAYO. 75 feet. Price.....\$5.00
DEVONSHIRE HUNT. (H-L-D) Code, BAYU. 144 feet. Price 17.28

285 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

FOX HUNT. (F) As they start forth from the kennels, expectation is apparent in every motion. The vaulting of the steeds over bars and the loping of the hounds as they start tend at once to interest all in the exciting chase for the brush that must occur later on. Next comes the triumphant return, where the horses leisurely trot along and the hunters discuss the mishaps and incidents of the day's sport, while the brush at the saddle bow is the trophy in evidence of the enjoyment that they have experienced. Code word, UNCOVERED. Length, 125 feet. Price.....\$15.00
GOING TO THE HUNT—Hempstead, L. I. (C) This is a companion picture to Meadowbrook Hunt. It shows the members of the hunt galloping on their way to the meet, headed by the pack of hounds, with the master of the hunt and the whippers-in. The riders are followed by a large number of well-known society people riding in carriages. Code, FURFURESTI. Length 94 feet. Price.....\$6.48
FOLLOWING THE HOUNDS. (G) Taken at a stag-hunt. Shows the hounds rushing through a hedge, with the huntsmen following. Each horse comes on with a rush and clears the hedge with the exception of one. This one goes to his knees, throwing the rider head-on to the ground. Fortunately, neither horse nor rider is hurt. A fine picture of one of the greatest of sports. Code word, UTILESIMO. Length, 95 feet. Class B. Price.....\$11.40
MEADOWBROOK HUNT—Hempstead, L. I. (C) The famous Meadowbrook Hunt Club in full cry. The hounds appear first in the distance hot on the trail, followed by the huntsmen in force. Two high fences are cleared in magnificent style, and the whole scene is full of dash and spirit. Code, FURFURESTI. Length 98 feet. Price.....\$5.76
HIGH HURDLE JUMPING, AT MEADOWBROOK HUNT CLUB—Hempstead, L. I. (D) Taken during the annual contest at the Meadowbrook Hunt Club, and showing some of the most noted horses belonging to members of this organization jumping the high hurdles. Code, FURFURESTI. Length 41 feet. Price.....\$4.92
SHOOTING CRAPS. (T) Bunch of colored gentlemen engaged in an interesting and exciting dice game popularity known as "craps." A blue coated officer of the law, suddenly breaks in upon their speculative operations, creating a panic "on change." A laughable scrimmage occurs, resulting in a general rout of the "Monte Carlo" element. Code, BROWN. Length, 50 feet. Price \$6.00
BUCKING BRONCHO CONTEST. (U) Nobody who has not actually seen a real bucking broncho on the western plains can have any idea of what it means to undertake to ride one of them. The bucking broncho has no eastern cousins. The mankiller and terror of eastern farms is a toy and household pet compared with the real article and woe be unto the tenderfoot who tries to get astride this bunch of terror from Sheol. The cowboy maintains a supreme contempt for a man who can't ride anything that moves on four legs. Periodically at Sheridan, Wyo., Cheyenne, Wyo., and Denver, Colo., the cow-boys get together the worst examples of vicious horse flesh holds tournaments,—and then the champion of the world is selected. The picture shows every buck and twist of a fierce beast who tried to throw his rider and kick him to death in an instant. Once he almost succeeded—but the plucky rider finally wore the horse into submission and won the day. Code word HICKNAX. Length, 125 feet. Price.....\$15.00
DOWN THE SLIDE. (U) A number of young ladies and gentlemen are at the swimming school, when they propose the game of "Follow the Leader," and such sights and scenes will hardly be repeated again in that swimming school. They slide down the toboggan, jump, play leap frog, and do various other things they would little dream of doing had they known the motion picture machine was in

CHICAGO PROJECTING Co.,
MOTION PICTURE FILMS.

action. This picture is suitable for any class of audience. Code word, SLIDE.
 Price, 25 foot lengths.\$3.25 Price, 50 foot lengths.\$6.00
PUSH BALL. (W.L.D.) A splendid and most interesting picture of a new game by two teams, using a ball 6 feet in diameter. Taken at the Crystal Palace, London. Code, PUBALL. 17 feet. Price \$21.24
RUNNING OF THE BROOKLYN HANDICAP, 1904. (D) One of the most interesting horse race pictures ever made, and the race was one of the greatest ever run in the United States. 1st, The horses leaving the starting post and the parade to the post. 2nd, Efforts of the start proper. 3rd, The pack coming down the stretch on the first time by, well hunched and racing at tremendous speed. 4th, All the horses on backstretch, with Hermit and Irish Lad, the two favorites, homestretch, with "The Picket" creeping up on the inside. Then the finish, with "The Picket" winning by a neck. A close view is then given of "The Picket" in the hands of the rubbers. Very good views are given of the enormous crowd. Code, RETAJARIA. 32 feet. Price.....\$45.36
A MOOSE HUNT IN NEW BRUNSWICK. (C) Shows departure wagon ride up a branch of the Canadian River and the arrival at the guide's camp. Scenes on the portage, an open-air dinner, the beginning of the hunt, the party stationed in the "crow's nest," the call of magnificent specimens lying on the ground where they fell. This England 1903-4. 865 feet. Price.....\$103.92
DEER STALKING WITH A CAMERA. (D) This picture is one of the best. 529 feet. Price.....\$63.48
QUAIL SHOOTING AT PINEHURST, N. C. (C) Shows the kennels, scenes on the road as the hunting party rides to the covers which are set and pointed, as they come upon the game. Several birds are shot and retrieved by the dogs, quail and pheasant being included in the bag. Taken for the Sportsman's show, 1903-4. 1,028 feet. Price.....\$123.36
WILD TURKEY SHOOTING IN VIRGINIA. (D) A noted hunter of wild turkey appears in front of his cabin with his old muzzle-loading gun, and proceeds to load it. He next appears in the edge of the wood, and sits down to give the turkey call. Soon the call is answered, and a monster bird appears to meet his fate when the old muzzle-loader is discharged. Taken for the Sportsman's show, 1903-4. 286 feet. Price.....\$34.32
GREAT BUFFALO CHASE. (F) 125 feet. Price.....\$20.25

MOTION PICTURE FILMS.

SKI-RUNNING. (R) These pictures were taken in the Engadina (Switzerland) and give a lifelike representation of fun on the snow-clad mountain slopes. Length 131 feet. Price.....\$15.72
SKI JUMPING COMPETITION. (D) A wonderfully successful film taken in Switzerland and showing experts in the great annual competition. In three parts: 1—Jumping from a stage. 2—The descent and mix-up in the snow. 3—The race down hill of the successful jumpers. Code, SKIJUM. 147 feet. Price.....\$17.64
SKIING, QUEBEC, CANADA. (F) A perfect picture of a great winter sport in Canada. A number of skiers are seen going down the hill at a terrific rate of speed. A hurdle of snow is erected in the middle of the path, which they must jump on their way to the foot of the incline. An excellent piece of comedy is here brought out, due to the fact that nearly all of the jumpers fall in the ground in a heap after taking the hurdle. Code word, UNIMPAIRED. Length, 60 feet. Price.....\$7.20
RIN OF A SNOW SHOE CLUB—Quebec, Can. (C) A Quebec club in characteristic uniforms in a cross country run. Introducing also a husky dog team. Code, GAPIARA. Length 33 feet. Price.....\$3.96
CROSS-COUNTRY RUNNING ON SNOW SHOES. (G) A typical exhibition of the winter carnival in Canada. A fine piece of photography and an amusing and educating subject, showing a large number of people on snow shoes racing across the fields. A piece of comedy is introduced on the end by twelve men testing one of their companions high in the air. On account of his being unable to keep up with the rest, he was awarded the bonning as a punishment. Code word UNMITEE. Length, 100 feet. Price.....\$12.00
"BOYNOTING"—Quebec, Can. (C) Members of a Canadian Snow Shoe Club initiating a new member in characteristic fashion. Code, GAPIRING. Length 25 feet. Price.....\$3.00
TBOGGANNING, MONTREAL, CANADA. (C) Here we show a toboggan Canadian winter sport, tobogganning. Our camera is stationed at the foot of a toboggan chute which is nearly one mile long. The toboggans are seen coming from over the top of the chute, up to peering as if a more speak on the screen. As they come closer and the camera, they grow in size and finally appear clear, distinct and life size upon the screen. They pass our camera in rapid succession and it is estimated that they sometimes attain a speed of forty miles an hour. Code word, UNIMPORED. Length, 200 feet. Price.....\$30.00
Code word, UNIMPOSED. Length, 100 feet. Price.....\$15.00
HOCKEY MATCH ON THE ICE, MONTREAL, CANADA. (F) Shows 200 boys playing a hockey match. Some of them exhibit remarkable skill. One of the boys has only one leg, but by the use of a crutch, skates about and puts up a very successful game. Code word, UNGEFASST. Length, 50 feet. Price.....\$6.00
SEIHING PARTY AND TBOGGANNING. (C) Length 37 feet. Price.....\$15.24
INTERNATIONAL WINTER SPORTS. (CUL-OD) A grand series of exciting and unique pictures, photographed in the United States of America, Canada, Norway, Sweden, and Switzerland. Code, WINX. Length 750 feet. Price.....\$90.00

289

CHICAGO PROJECTING CO.
MOTION PICTURE FILMS.

ICE YACHTING—Sackel's Harbor, N. Y. (C) The picture was taken on Lake Ontario, showing a large number of very swift boats, and a number of daring manoeuvres. One of the boats is put through the trick known as "spinning" in the course of which the yachtman is thrown out of the boat on to the ice, on his head. Code, FUXILIFORM. Length 41 feet. Price.....\$4.02

ICE BOAT RACING, RED BANK, N. J. (F) An American flag sets a stake in the race, and is placed in the center of the ice. The yachts with their great white sails are seen running toward and rounding the stake. They go through some very remarkable manoeuvres. One yacht nearly capsizes. At this particular race it is estimated that some of the yachts made as high as forty miles an hour. This scene gives a remarkably good idea to any one not acquainted with ice yachting. Code word, UNDUTIFUL. Length, 100 feet. Price.....\$12.00

SKATING IN CENTRAL PARK—N. Y. City. (D) An animated winter scene on one of the largest lakes in Central Park, in the height of the skating season. Code, GABERDINES. Length 51 feet. Price.....\$6.48

WINTER SPORTS ON THE LAKE. (D) Shows the skaters, the boys, the girls, the men and the ladies, all enjoying life immensely. A fine view of the famous Grant monument in the background. Code word, HANK. Length, 50 feet. Price.....\$6.00

A BRUSH IN THE SNOW (D) Lively scene on a fine metropolitan boulevard after a heavy fall of snow. We see a test between two rivals speeding up the boulevard at break-neck pace, scattering snow and slush in all directions. Full of excitement and action. Code word, SNOW. Length, 50 feet. Price.....\$6.00

Fishing.

CODFISHING WITH TRAWL—Kittery Point, Me. (C) United States Fisheries Exhibit. Illustrating cod fishing at sea from a small boat. Fisherman using hand trawl lines. Code, GALLOZZA. 27 feet. Price.....\$3.24

SPEARING SALMON. (F) Picture taken on a rapidly flowing shallow river of Canada, and shows a number of salmon fishermen coming down the stream to a fishing spot. They stand in a row about twenty feet apart, and as the salmon come down the stream, spear them. If the first man in the row misses a fish, the second makes an attempt to catch it. Very often the entire row of men try to catch the same fish and miss it. A very lively sport. At the end of the picture one of the fishermen is seen to spear the same fish several times, lifting it out of the water each time, and finally it gets away from him. His antics, while trying to catch this particular fish are very funny. Code UNFILLED. Length, 175 feet. Class B. Price.....\$21.00

LEAPING TROUT. (G) A pretty scene. Numerous trout are seen jumping high out of the water at feeding time. Pretty water effects as the fish splash about. Code word, URCHILIA. Length, 45 feet. Class B. Price.....\$6.10

SPEARING SALMON IN THE RIVERS OF THE NORTH WEST TERRITORY. (Wk.L-D) Code, OIVE. 175 feet. Price.....\$21.00

TROUT FISHING, LANDING THREE POUNDER (Wk.L-D) Code, COXA. 75 feet. Price.....\$9.00

DRAWING A LOBSTER POT—Kittery Point, Me. (C) United States Fisheries Exhibit. Two fishermen in a dory at sea. One man manages the boat, while the other draws a lobster pot and empties its contents into the boat. A well arranged and thoroughly characteristic picture. Code, GALLOGLASS. 24 feet. Price.....\$2.38

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

SHAD FISHING. (N) On the Delaware river, showing the hauling in of the nets full of fish, assorting, etc. Code, SHADISHL. 250 feet. Price.....\$27.50

HIGH-SEA FISHING. (R) This is a very interesting subject in which we see the different phases of deep-sea fishing. First there is the boat out on the heavy sea with the fishermen casting their nets. Their full nets are drawn up by hand and hauled aboard by means of a derrick. When the contents of the net are displayed, they find a shark, which is quickly killed. Other fish which are of no value are thrown overboard and the birds devour them. The boat reaches port safely and the basket of fish are brought ashore. At the home of one of the fishermen we see the nets repaired by the family. Part of this film is tinted. Length, 325 feet. Price.....\$39.50

HERRING FISHING IN THE NORTH SEA. (C) Shows the fishermen casting their nets. The camera is placed on the stern of the ship looking forward. The second scene is a view looking at the ship's broadside and shows twelve stalwart fishermen hauling in the nets in which thousands of herring are unmeshed. The third scene is a close view of the fishermen on the deck of the ship, showing the nets coming aboard and the fish being shaken from them. A gentle swell prevails and beautiful water effects are secured as the ship rocks and pitches. Code word, UNREIF. Length, 115 feet. Class B. Price.....\$13.80

SALMON FISHING IN NEW BRUNSWICK. (C) Several prominent eastern fishermen appear on the rocky bank of the Nepisiguit river and proceed to show how a ten-pound salmon is hooked and landed with a fly rod. Taken for the Sportsman's show, 1905-6. 114 feet. Price.....\$53.28

TROUT FISHING AT THE RANGELY LAKES. (D) Shows the arrival of a little steambot at Upper Dam, the journey to Middle Dam, and fly casting from row boats by three prominent eastern anglers, giving a vivid idea of life in the woods in the fishing season. Taken for the Sportsman's show, 1905-6. 722 feet. Price.....\$86.65

Automobiles.

THE GREAT INTERNATIONAL AUTOMOBILE RACE FOR THE VANDERBILT CUP. (D) A most exciting picture throughout, showing the most dramatic features of the event. As a picture it is much more interesting than any automobile race that has ever been made, as apparently no effort was made to keep the great crowds off

CHICAGO PROJECTING CO.,

MOTION PICTURE FILMS.

the road, and as each car comes along the spectators press back on either side, forming a narrow lane through which the machines race at a speed of seventy miles an hour. In looking at these pictures it seems a miracle that more people were not injured. The photographic quality of the film is all that could be desired, and even when close to the camera the race was clear and sharp. Code, RETEN. DIE. 12 feet. Price.....\$23.00

Automobile Parade, very fine. (T) 90 feet. Price.....\$10.00

TRIALS AND TROUBLES OF AN AUTOMOBILIST. (N) The film is sufficient for the description of this film, except to say that it is humorous throughout. Code, TRIMOBIST. 400 feet. Price.....\$14.00

Athletic.

A SATURDAY AFTERNOON WITH THE NEW YORK ATHLETIC CLUB AT TRAVERS ISLAND. (D) The opening scene shows the arrival of the New York trains at the suburban station near the grounds and the departure of the busses and private rigs. Next the crowd of city folks are shown pouring in the main gates of the attractive grounds on Travers Island. A panoramic view of the water front and the athletic field is given, showing interesting events such as one hundred yard dash, hurdle jumping, hammer throwing, high jumping, polo vault, swimming, etc. After the races another view is given of the crowd, showing various parties having luncheon on the lawn. Is of extraordinary photographic value, and the whole production good. Code, RETENS. 180 feet. Price.....\$58.00

THE YALE CREW—New Haven, Conn. (D) Showing the "varsity" crew of 1899 in a practice spin. The camera was placed on the bow of the Yale launch and followed the crew at close range so that a very good idea of the famous Yale stroke is given. Code, FULCIN. CIBUS. Length 28 feet. Price.....\$35.00

YALE-PRINCETON FOOTBALL GAME. (G) First is shown a fine panoramic view of the grandstand at the Yale field, showing the enormous gathering of football enthusiasts who have come from far and near to witness the giants struggle for the college championship. The Tigers are next seen entering the field on a run, closely followed by the Yale men. The principal plays of the game are next seen. Some of the good work of Captain DOWIE of Princeton, and Hogan of Yale, is also shown. Code word, VACUTIST. Length, 230 feet. Class B. Price.....\$57.00

POLE VAULTING AT COLUMBIA UNIVERSITY—New York City. (D) A remarkably fine picture photographically, showing a group of trained athletes pole vaulting at the Columbia Athletic Field. Five ten-foot vaults are included in the negative. Has been used with great success in reverse motion, the effect of the men leaping backward over the bar, and catching the pole in mid-air being extremely ludicrous. Code, PURASSINO. Length 50 feet. Price.....\$6.00

THROWING THE SIXTEEN-POUND HAMMER. (G) This interesting picture was taken at the Caledonian games, and shows a hammer-throwing contest between some of the leading athletes in the United States. As each man steps forward, grasps the hammer and whirls it around his head for the throw, his muscles stand out in bold relief. Code word, UVOSO. Length, 100 feet. Price.....\$12.00

FRENCH BOXERS—Paris, France. (C) Two French experts in the art of Savate, in an interesting exhibition of their system of self defence which employs both the hands and the feet. Code, FIFT VOIE. Length, 30 feet. Price.....\$3.00

SANDOW. (C) Showing the great athlete in full length figure occupying the entire size of the film, in a display of his enormous muscular development. Code, MISPREGIO. 19 feet. Price.....\$2.00

BAG PUNCHING BY SADIE LEONARD. (C) The female Fitzsimmons in the exercise of bag punching. Code, MUJERILES. 25 feet. Price.....\$3.00

WRESTLER AND BULL. (D) A wrestler succeeds in throwing a heavy bull after hard struggling. Length, 131 feet. Price.....\$16.75

Prize Fights.

Gans-McGovern Prize Fight. The Real Fight taken by Electric Light. 600 feet. Price, per 100 feet.....\$12.00

JEFFRIES EXERCISING IN HIS GYMNASIUM. (C) This is considered the best picture of the world's heavy weight champion James J. Jeffries ever exhibited. Jeffries walks into the gymnasium at his quarters in Oakland, Cal., accompanied by Billy Delaney, he begins the weight lifting, facing the camera, and during the exercises his back is turned to the audience, when his great muscles stand out in bold relief, and as he strains and tugs at the weights, they give one the impression of huge bands of knotted cords. Code word, UNEXTOMBED. Length, 70 feet. Price.....\$10.50

FIRST ROUND; GLOVE CONTEST BETWEEN THE LEONARDS. (C) An exciting boxing bout between a man and a woman. Code, MUJERONA. 25 feet. Price.....\$3.12

SECOND ROUND; GLOVE CONTEST BETWEEN THE LEONARDS. (C) Wind-up, including knock-down blow. Code, MULACCA. 27 feet. Price.....\$3.24

GANS-MCGOVERN FIGHT. (D) With the exception of this film there are absolutely no genuine moving picture films representing genuine prize fights on the market. The prize fight films, so called, are either taken by the fight promoters and retained by them for exhibition, not for sale and cannot be procured, or else they are fake reproductions made up the day following the fight by imitators, who endeavor to the best of their ability, to reproduce that which occurred during the evening before between the genuine principals. This is a genuine picture taken while the fight was in actual progress, and represents one of his most famous fights. The Gans-McGovern fight took place in Chicago in the month of November, 1900. The enormous arena was brilliantly lighted by over 600 electric arcs, making the scene as bright as day and every detail from figures to the remotest corner of the auditorium, as well as the prize ring itself, is accurately and truthfully depicted in this wonderful film. The complete set embraces 800 feet of film, shows all the preliminaries of the fight, the care of the principals by their seconds and two rounds of the fight, and furious fighting as was ever seen in the prize ring. McGovern pursues his usual tactics, went in to knock out his opponent without delay, and as Gans was clever on his part, one of the most brilliant and wonderful exhibitions of sparring ever witnessed was caught by the camera and is here reproduced for the benefit of our patrons. Code word, MCGOVERN. Length, 600 feet. Price, \$75.00

What The Fighters Say.

The picture shows the fight well—FRANK ESTE.

The best I ever saw—MCGOVERN.

COBBETT-MCGOVERN FIGHT. (C) A thoroughly realistic and very hotly contested representation of the original contest, clear, sharp and distinct. Sold by rounds if desired. Code, GARRY LOT 2. Length 25 feet. Price.....\$6.75

THE JEFFRIES-SHARKY FIGHT—Coney Island, N. Y. (D) The greatest and longest moving picture film ever made. Code word, SHARKY. Length, 1000 feet. Price, \$100.00

*Discontinued. See "Note", Page 195.

MOTION PICTURE FILMS.

ering as it does the entire period of the 25 rounds. And intermissions at this cost for the champions of the world between the champion Jim Jeffries and Tom Sharkey. May be ordered by rounds of 200 feet in any lengths desired. The introductory ceremonials take up 600 feet and the scenes after the fight 25 feet. It is magnificent throughout, the fighters being clear and sharp in every movement, and the crowd's shouting and cheering on a grand scale. The ring, Code, SABELINKS. Length 5575 feet. Price per 50 feet. \$24.00

BULL FIGHT. (R) Grand entrance of bull fighters, including matadors and banderilleros. Picador is seen, tending a bull. Suddenly the enraged animal charges at the horse, and pierces his long sharp horns into him. The picador dismounts, removes bridle and saddle, and shortly the horse staggers from loss of blood and drops dead. The matador is next seen. The bull charges at him, but he quickly steps aside and plunges his sword into the unfortunate animal between the shoulder blades. It reaches the heart and the bull drops over dead. He is then dragged from the ring by the Vaqueiros. Very realistic. Code **UTS-ENDING.** Length, 15:21.00. Class, **B**. Price.

BULL EIGHT WITH THE MATADORES SENOR DON LUIS A MAZZANTINI AND ROMAITA. (Gigs) This bull fight, which leaves far behind all those represented up to the present date, is the most complete that exists. The spectator sees in turn all the incidents of the fight. Entrance of the cuadrilla, pleadores on horseback, setting of banderillas, estoqueada, death and removal of the bull. The particular character of this one is more justifiable than any other, and it most especially was so, as it was the only one of strong emotions will be satisfied. Length, 40 feet. Price, \$4.25.

A LIVELY COCK FIGHT. (T) The interior of a room, showing two Bantam cocks fighting. Of the many cock fights heretofore exhibited, this is probably the liveliest and best, being full of action. From a photographic standpoint it is certainly perfect. Code word, CHAMPRELL. Length, 50 ft. Price on application.

A COCK FIGHT. (C) A lively contest between two game birds in a pit. 50 feet. Price.....\$6.00

A LIVELY COCK FIGHT. (U) The interior of a barn, showing two Bantam cocks fighting. Of the many cock fights heretofore exhibited, this is we believe, the liveliest and best, being full of action. From a photographic standpoint it is good. Code COMPLETE. Length, 75 feet. Price.....\$9.00

BURLESCOCK FIGHT. (M) You see a little Bantam rooster pitted against a supposed bird fully as large as an ordinary man. They fight all around a pit, but the little fellow is victorious, and deals his huge adversary a solar plexus blow without seeming difficulty. Code 15. **YAWN.** Length 65 feet. Price \$1.15

INDIAN FIRE DANCE, (U) This dance is usually held at night, the Redskins dancing around with blazing pine knots in their hands. But as the government authorities would not permit the festivities at night they gave it in daylight. It is especially interesting and strong enough to draw a crowd every night for a week. Code word **PYROTECHNIC.** Length, 100 feet. Price..... \$12.00

MOTION PICTURE FILMS.

MOQUILINDIAN SADDLE DANCE. (C) A most valuable record of the third and unique ceremonies of the Moqui, Zuni, Navajo and Crow Indians. Many of these dances take place at very rare intervals; then for the most part they are guarded very jealously from the eyes of the carter. The Moqui and Navajo Indians take part. They are arrayed in the most gorgeous trappings of their tribe. On their heads are enormous gourd-squas heavily decorated with paint and feathers. The dancers are dressed in the skins of the goat or the head the dance. In the shadow of the noble horses sit the old men of the tribe beating time with their tom-toms and rattles. This picture is appropriate music and a most impressive word GAUFFE.

CLARA Price.....\$17.00

RAIN DANCE AT ORABI. (C) A sacred dance by the Zuni Indians, in full festival attire. Several hundred of the Indians take part, dancing in unison in a long line at the foot of a terrace of characteristic Zuni mud houses, from the tops of which the squaws wrapped in gaudy blankets watch the mysterious ceremony. Code word **GALGAMELIA.** Length, 216 feet, Class A. Price.....\$32.40

INDIAN HIDEOUS DANCE, (I) Large body of Indians dressed in the most hideous costumes imaginable hold dance in the middle of Main Street in Sheridan. Government officers prohibited this dance and on prairie and insisted that it be held in the city. An amusing feature is the fact that the usual crop of Indian dogs is present and some canines—half coyote—get very prominently into the picture. The Indians are the most strange and weird Indian tribe in the picture. The Indians say this dance is their idea of the kind of fun the Great Spirit enjoys and they imagine he is sitting on his throne of gold above them. He laughs heartily at the antics of the children down below. **Cole's word.** \$6.00

CROW INDIAN WARDANCE. (C) This is an exceedingly picturesque scene taken in the midst of a Crow encampment with typical Indian tipis in the background. Four old Indians sitting cross-legged upon the ground beat upon their tom-toms, while the warriors, gay in their war paint and eagle feathers, dance around them. Code word GAUKELPUHR. Length, 51 feet. Class A. \$7.61

CROW INDIAN FESTIVAL DANCE. (D) Taken amid the same surroundings as the previous picture and showing the same lot of Indians in a different dance. Code word GAUKELMANN. Length 11 ft. Price \$8.50.

51 feet. Class A. Price \$9.60

SIOSHONE INDIANS IN SCALE DANCE. (C) Uncle Sam has been
 bidden any more of this kind of ceremonies that stir up all latent
 hatred in the Indian mind. The squaws were not permitted around
 while the dance is going on. The dancers did not like to have the
 photographer around and one—the most evil looking of the bunch—
 fired several times to shoot an arrow into the camera. He was pulled
 away by the agent who stopped the dance and compelled the
 Indians to disperse. Code word SIOSHONE. Length, 80 feet
 \$9.60

Price.....
UPE INDIAN SNAKE DANCE. (U) Never before have the Utes permitted the photographing of their snake dance. This weird ritual is performed only once a year after the harvest has been good and is a time when the snakes, who are supposed to bring plenty of rain next season, are danced around once or twice the chief puts his head in the snake's mouth. Some of the Indians drop their rattles on the ground and tease them with feathers to get them to strike. The film is clear and bright and is not only fine photographically but is a most interesting subject. Code word SNAKES. Length, 37.25 feet. Price.....\$7.25

CHICAGO PROJECTING CO.

MOTION PICTURE FILMS.

THE PIONEERS. (C) This frontier picture taken in the wilderness shows the massacre of a settler and his family by the Indians, the burning of his cabin, the captivity of a little girl and her final rescue by Kit Carson and his scouts.

1. **THE HOME IN THE WILDERNESS.**—Here we see the settler with his wife and babies in his rude log cabin in the wilderness. A pretty scene of domestic felicity.

2. **BURNING OF THE CABIN AND MURDER OF THE SETTLERS.**—A little girl runs in with alarm. The door is quickly locked and barred and the long rifle appears at the loop-hole and is frequently fired. The Indians gradually close in on the ill-fated home, and finally have it ablaze from a fire of brushwood. The door is then battered down and the entire family, with the exception of the little girl, cruelly murdered.

3. **DISCOVERY OF THE BODIES.** THE OATH.—Kit Carson and his scouts come upon the scene, find the ruins of the cabin and the mutilated bodies, and vow an oath of vengeance. A very impressive scene.

4. **CROSSING THE MOUNTAINS.**—The Indians, with the captive girl, are seen crossing a mountain trail.

5. **THE TRAPPERS ON THE TRAIL.**—The same scene as No. 4, showing Kit Carson and his men following the trail. The scenery is very wild and picturesque.

6. **RESCUE OF THE CHILD FROM THE INDIANS.**—This is the last picture of the series, and shows Kit Carson and his scouts in a fierce fight with the Indians, and the rescue of the little girl. Code, GAT-FESCHE. 60 feet. Price.....\$73.20

STAGEHOLD-UP. (D) Indians attack stage coach. One of the passengers is shot and falls off the coach into the dust. Indians follow, shouting and yelling. Cowboys to the rescue. Indians driven off in confusion. Code word **BANDITS.** Length 50 feet. Price.....\$6.00

NAVAJO INDIAN TUG-OF-WAR. (D) An amusing contest between about twenty Indians, ten to a side. They are dressed in the motley garments of civilization, and their long black hair tossed by the breeze gives them a very picturesque appearance. Code word **CAPTURE.** Length 35 feet. Class A. Price.....\$6.25

INDIAN HORSEMANSHIP. (C) A Crow Indian riding and subduing a bucking broncho. Code word **GAUKELHILE.** Length, 27 feet. Class A. Price.....\$4.05

NAVAJO INDIAN FOOT RACE. (D) An exciting foot race, between seven naked young bucks of the Navajo tribe. These men are trained runners and with nothing but their breech-clouts to impede their movements, they race across a desert plain, studded with sage-brush. Code word **GAUGALIN.** Length, 24 feet. Class A. Price.....\$3.15

NAVAJO INDIANS WRESTLING. (C) This scene shows a wrestling bout between two lively and muscular young bucks stripped to breech-clouts. They are urged on by a number of other Indians, some of them mounted. Length, 32 ft. Class A. Code word, **GAU-FRUIL.** Price.....\$4.80

INDIAN PARADE. (D) Indians mounted on their ponies ride toward the camera and go toward their homes on the Crow agency. Chiefs with gorgeous head dresses plainly seen. Good, clear, picture. Code word **HOMEWARD.** Length, 50 feet. Price.....\$4.00

NAVAJO SQUAW WEAVING BLANKET. (D) A near view of the primitive loom upon which the women of the Navajo tribe weave the wonderful blankets which are prized so highly by art connoisseurs the world over. Code word **GAUFREDO.** Length, 47 feet. Class A. Price.....\$7.05

INDIAN BOYS, ALBUQUERQUE SCHOOL. (C) A parade of the boys of the school, all in neat military uniform and maintaining a creditable military organization. Code word **GAUFOU.** Length, 30 feet. Class A. Price.....\$5.55

296

235 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

OROW INDIANS HARVESTING. (D) This scene offers a sharp contrast to the others of the series, for here we see the well educated and civilized Indian with modern machinery and stock, well-fod horses gathering in his wheat on a thoroughly up-to-date farm. Code word **GAUKEL.** Length, 35 feet. Class A. Price.....\$5.25

GIRL'S DEPARTMENT, ALBUQUERQUE SCHOOL. (C) A procession of the Indian girls of the school, including representatives of practically every well-known tribe in the country, from Florida to Alaska. The girls range in age from five or six years to fifteen or sixteen, and are a splendid evidence of the good work which the government is doing at this school. Code word **GAUFFERING.** Length, 23 feet. Class A. Price.....\$3.45

Farms and Farming.

CORN HARVESTING. (U) This wonderful machine performs the same functions for corn as the ordinary harvester does for small grain. Owing to the greater weight the successful harvesting of corn has presented many difficulties; the latest type of machine, however, has overcome the difficulties, and in this picture is clearly seen the almost human-like ability with which the machine cuts, gathers and binds the corn. Code word, **COIKX.** Length, 100 feet. Price.....\$12.00

Husking Corn. (D) 50 feet. Price.....\$6.00

ALLIGATOR FARM. (M) During the summer of 1903 at Atlantic City, N. J., the famous summer resort, there was an Alligator Farm, on which thousands of these huge monsters were bred. We succeeded in obtaining the only moving picture ever taken of a large number in captivity, and it is full of animation. The figures are large. Very interesting. Length, 75 feet. Price.....\$8.25

PANORAMIC VIEWS PIGEON FARMS, LOS ANGELES, CALIFORNIA. (G) In this picture we show the largest pigeon farm in the world, consisting of hundreds of pigeon houses of all sizes. One of the attendants at the farm throws out feed to the pigeons. Immediately the air is filled with hundreds of thousands of flying birds. This is a most remarkable subject and bound to please the most exacting audiences. Code word, **UNIEHME.** Length, 75 feet. Price.....\$20.25

Code word, UNIEHMENT. Length, 100 feet. Price.....15.00

EGGS HATCHING—Ridgefield Park, N. J. (D) A remarkable picture, taken at the Red Dovecote Henneries, showing a number of chickens in the actual process of hatching. The chickens are seen bursting through their shells and tumbling out. Code, **FUSUKIS.** Length, 27 feet. Price.....\$5.48

TWO HOURS AFTER HATCHING—Ridgefield Park, N. J. (D) This is a companion picture to the above and shows the same lot of chickens two hours after they have emerged from the shell. Very lively and cunning. Code, **FUSUKIUM.** Length, 27 feet. Price.....\$3.24

THE GIRLS IN OVERALLS. (T) The story briefly told. Regis Vidal settled on a 25-acre ranch near Gunnison, Colorado. Eight daughters and one son were born. As the family grew up times became hard and the father was compelled to borrow \$15,000 on the ranch. He fell into the clutches of a money-lending shark and the worry caused his death. A year later the mother died, leaving the children even more deeply in debt. With true Western spirit the girls and boy decided to work the ranch themselves. The girls donned overalls and took up the heavy drudgery in the field. Like true French maidens they lost none of their graces or charms. Neither could they forego the habit of wearing high-heeled shoes while at work. The film shows the girls at work and at play. Code word, **GIRLS.** Length, 30 feet. Price.....\$12.00

297

CHICAGO PROJECTING CO.,

MOTION PICTURE FILMS.

PLOWING, THE MODERN WAY. (T) Shows the old farm, under the manipulation of the Twentieth Century plowing system. We all remember how we used to plow but the picture shows us the modern idea of plowing. Both fascinating and instructive. Code word, PLOW. Length, 50 feet. Price.....\$6.00

HARVESTING SCENE. (G) Taken in Eastern Washington. Short combined reapers and threshing machines drawn by thirty eight head of horses, working in the fields. These machines cut a swath of wheat twenty-five feet wide and sack the wheat as they go. Code word, UNSHILLED. Length, 170 feet. Price.....\$8.00

Code word, UNSHILLED. Length, 50 feet. Price.....\$6.00

Code word, UNSHILLED. Length, 100 feet. Price.....\$12.00

THE HARVESTERS. (T) This picture shows the modern way of harvesting with a number of machines at work in the great wheat fields of Dakota. A very interesting and instructive subject. Code word HARVESTER. Length, 100 feet. Price.....\$12.00

ROUTING AND BRANDING WILD HORSES. (CUL-C) Code, IVAY. 100 feet. Price.....\$12.00

FUN ON THE FARM. (M) On a large farm, the farmers are seen at their work, plowing, sowing and harrowing. A fine picture. Coming home from their work, they find the dairy maids at the wash tub. One of the farmers tries to kiss a pretty maiden. There seems to be no objection on her part, and the fun begins. The farmers are seen sacking corn of immense size. While the farmers are in the field, a dork visits the chicken coop. Seeing some pumpkins, he also takes a few of these, and quickly escapes. The farmers pursue the fleeing chicken thief. After a long and lively chase, they catch him, tar and feather him, and carry him riding on a rail down to the water, where he gets a good ducking. The dairy maids are seen milking the cows. One of the farmers tries to kiss the prettiest of the maidens, but is punished, to the great delight of the audience. After work is over, boys and girls go for a straw ride to a husking bee. They have lots of fun. Having arrived at their destination, they sing, play games, and enjoy all kinds of merry-making. One of the farmers tries to kiss the dairy maid, but she laughingly runs away. Husking bee. While husking corn, one of the men finds the red ear, which gives him the privilege of kissing the girls. He tries to kiss the dairy maid, but she again runs away. The last scene shows the farmer sitting by his sweetheart. In his hand he holds the red ear which he shows her, asking for the kiss due him. First she acts somewhat shy, but she soon seems to enjoy the kissing game, and one of the liveliest kissing scenes ends the picture. Length 325 feet. Price.....\$67.75

Children.

THE PUPPIES AND THE LITTLE TEASER. (T) This picture shows what a tease a healthy, lively child can be. She has taken six little puppies away from their mother and lets them play a few minutes in a can of milk, so as to see what they would do. She takes care away from them; then there is trouble and lots of it. Code word, BOCK. Length, 50 feet. Price.....\$6.00

CHILDREN FEEDING DUCKLINGS—Wrentham, Mass. (D) Taken on a duck farm, and shows a series of feeding pens, in which are ducks of various ages. The children walk from one pen to another feeding the ducks with corn, a very pretty and interesting sight. Code, FUSCINARUM. 25 feet. Price.....\$3.12

HEY DING DIDDLE. (M) This picture is made after the old rhyme of: Hey ding-diddle, the cat and the fiddler, The cow jumped over the moon; The little dog laughed to see such sport, And the dish hopped away with the spoon. All this and more is seen in this interesting picture, and it is very funny. Code, QACCHUP. 50 feet. Price.....\$6.50

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

YOUNG AMERICA CELEBRATING DEWEY'S RETIRED. (D) Shows a lot of small boys of all shades and colors celebrating the return of Admiral Dewey, shouting fire-crackers, cannons, etc., etc.; fine smoke effect; Code word, BARBER. Length, 50 feet. Price.....\$6.00

IMPORTANT—All Films are now 12 CENTS PER FOOT Some of the Prices in this List are incorrect.

AN IMPARTIAL LOVER. (D) A cunning little three-year-old chap sitting between two little girls and making love to them impartially. One of the little girls is exceedingly shy, and her actions are extremely ludicrous. A very fine subject. Code, GAI-DENZIO. 77 feet. Price.....\$9.24

BABY'S DAY. (C) An amusing series of incidents in the daily life of a baby girl from her awakening in her little crib in the morning until she is tucked in snugly at night. In seven striking scenes: 1—Good Morning, 2—Dressing, 3—Play Hour, 4—Dinner, 5—Going Bye-Bye, 6—The Bath, 7—Good Night. This dainty production covering a feature of home life so dear to us all, is offered as a novelty and a pleasant contrast to the dramatic scenes so much in the popular vogue at present. As the illustrations indicate, the film is of a very superior photographic quality. Length 45 feet. Price.....\$4.84

BABIES AND PUPPIES. (T) Four little children sitting on edge of their bed dressed in their night robes. Three of them leave the room and in a moment appear with three fat little puppies, which they put down to a pan of milk. In their childish glow they are picture of sweet innocence. Code word, PUPPIES. Length, 50 feet. Price.....\$6.00

BABES AND KITTENS. (T) A fine picture, showing two children playing with frisky kittens; a simple subject, showing to ladies and the feline as well as the human race; appeals strongly to. Code word, BACIL. Length, 50 feet. Price.....\$6.00

A BABY MERRY-GO-ROUND—Conny Island. (C) A miniature merry-go-round for the little folks, a crowd of whom are whirling around on the different animals and enjoying themselves to the utmost. Code, TESTIFICHI. 53 feet. Price.....\$6.36

THE SAND BABY. (D) Here a child is seen busily making pies with his pail and shovel in the sand on the beach. Figure large. Code, GASSIE. 55 feet. Price.....\$6.00

THE BABIES' QUARREL. (T) A fine picture; showing two infants seated in high arm chairs; both playing nicely until one takes a notion it wants the other baby's toys; reaches out, gets one, then there is trouble. Code, BABDOCK. Length, 50 feet. Price.....\$6.00

CHICAGO PROJECTING CO.,

The Holy City In 38 Motion Picture Tableaux

Very Pathetic, with Fine Effects
Length, 350 Feet. (M) Price, \$38.50

Last night I lay a sleeping,
There came a dream so fair;
I stood in old Jerusalem
Beside the Temple there;
I heard the children singing,
And ever as they sang
I thought the voice of Angels
From Heav'n in answer rang;
Methought the voice of Angels
From Heav'n in answer rang!

Jerusalem, Jerusalem,
Lift up your gates and sing,
Hosanna in the highest,
Hosanna to your King!

And then methought my dream
was changed,
The streets no longer rang
Hush'd were the glad Hosannas
The little children sang,
The sun grew dark with mystery,
The morn was cold and chill.
As the shadow of a cross arose,
Upon a lonely hill,
As the shadow of a cross arose,
Upon a lonely hill,

Jerusalem, Jerusalem,
Hark! how the Angels sing,
Hosanna in the highest,
Hosanna to your King!

NOTE—The above words are only a part of the entire song which is covered by the motion picture illustration.

MOTION PICTURE FILMS.

Religious. Films of the Passion Play, or Life of Christ.

Moving Pictures of the Scenes and Incidents in the Life of our Lord, Jesus Christ.

The Passion Play has become so well known as a reproduction of the life of Christ, and has taken such a prominent place for the education and entertainment of the public, that its value from that standpoint cannot be compared with any other motion picture film that has ever been produced. Several attempts have been made to render a satisfactory reproduction of this sacred drama, but with most of them numerous inaccuracies and lack of dignity subjects them to more or less criticism which detracts much from their value, and is a source of considerable annoyance, both to the audience and the lecturer.

We have selected the only set that we believe to be entirely satisfactory, and are able to submit a complete set covering the entire series of Passion Play films. This reproduction is based on strictly authentic sources, showing the birth, life, sufferings and death of the "savior." The parts taken by the disciples, the soldiers, and the multitudes, are exceedingly well portrayed.

Without doubt these films represent the highest point of art in photography and the finest ever placed on the market. To those who are not prepared to purchase the complete set of films, we can furnish as many as they want, as all subjects are sold separately.

Any of the Passion Play Films can be had in 50-foot lengths.

- 1—THE ANNUNCIATION. (U) Showing Mary seated at a table in meditation. An angel appears, slowly coming to her side with outstretched arms, announcing that she would give birth to a son whom she should call "Jesus." Then blessing Mary, the angel with outstretched wings slowly disappears. Code word ABRAZ. Length, 50 feet. Price..... \$6.00
- 2—SHEPHERDS WATCHING THEIR FLOCKS. (U) This film represents the plains near the city, showing the shepherds watching their flocks. An angel appears by their side, telling them that the Messiah is born. A star appears and passes over the heavens, and the shepherds, guided by the star, start for Bethlehem. Code word ABRAZIT. Length, 25 feet. Price..... \$15.00

Some of our incorrect

- 14-SCOURGING JESUS. (U) This scene shows Jesus dragged in by the infuriated mob. His clothes are torn from His body. He is then tied to a post and beaten. Code word ABSTENTR. Length, 50 feet. Price.....\$6.00
- 15-CROWNING HIM WITH THORNS. (U) After they had beaten Him they array him in a gorgeous robe, crown Him with a crown of thorns and revile Him. Code word ABSTENTION. Length, 50 feet. Price.....\$6.00
- 16-CHRIST BEFORE PILATE, AND CONDEMNATION. (T) This picture shows the mob waiting for the appearance of Christ after He had been scourged and crowned with a crown of thorns. Pilate pears and Christ is dragged before this hated of Jewish leaders, who would, if possible, release Him. The action here shows that Pilate unwillingly sentences Jesus. He washes his hands, saying: "I am innocent of the blood of this righteous man; see ye to it." The populace then revile Jesus, and He is dragged off for the Crucifixion. Code word ABSTENTIOUS. Length, 105 feet. Price.....\$12.60

CHICAGO PROJECTING CO.,
MOTION PICTURE FILMS.

17-CARRYING THE CROSS. (U) This scene shows the infuriated mob on the way to the place of Crucifixion. Jesus is assisted by Simon of Cyrene, but weary and suffering from the loss of blood by the Jews. Code word ABSTER. Length, 60 feet. Price, \$7.20
18-MIRACLES OF ST. VERONIQUE. (T) Loaded down with the cross and persecuted and beaten by the mob, Jesus is met by the holy woman, St. Veronique comes forward and offers the Lord her handkerchief. She places it upon His face, and, on removing same, the features of our Lord are seen imprinted upon it. Code word ABSTERED. Length, 60 feet. Price, \$7.20

19-CRUCIFIXION (T) This scene shows Christ on the Cross, between the other two crosses upon which are hanging the two thieves ABSTERGE. Length, 55 feet. Price, \$6.00
20-THE DEATH OF CHRIST. (T) This is a very effective scene. Jesus is seen in agony as the cruel soldiers pierce His side with spears and place the sponge with vinegar to His mouth. In the end the revilers were startled with the cry: "My God, my God, why has Thou forsaken me?" Then, with a look of forgiveness, He said: "It is finished," and the end came. Code word ABSTERGED. Length 50 feet. Price, \$6.00
21-TAKING CHRIST FROM THE CROSS. (U) Showing Jesus as He hangs to the Cross in death. Mary, the mother of Jesus, and Mary Magdalene are weeping at the foot of the Cross. Joseph and Nicodemus are seen taking down the body of Jesus and carefully wrap-

Series of nine pictures, several of them listed, put together in one containing 500 feet. Code, ALLAH. Price \$640.00. We can also make up any series that our customers may select.

Religious.

WONDERFUL DRAUGHT OF FISHES. (Q) The scene is laid upon the lake of Galilee with Jesus instructing Peter to cast his net yet another time. In spite of previous discouraging results. The last cast succeeds beyond his expectations, for Peter draws up so many fish that the nets are strained almost to breaking. 1st feet. Price \$15.72.

THE TRANSFIGURATION OF JESUS CHRIST. (Q) Jesus is seen praying on the mountain, while his disciples, Peter, James and John sleep. As they awaken, they see Jesus transfigured. His face as the shining sun, and His raiment white as snow. A luminous cloud appears upon the mountain, and the voice of God says: "This is my beloved Son, in whom I am well pleased. Follow Him." 65 feet. Price \$7.80.

ROCK OF AGES. (P) A sublime religious subject, illustrating the well-known hymn. A beautiful girl is seen clinging to a rock, over which huge billows are dashing, sending great volumes of spray and surf high into the air. As the maiden appears to be exhausted, and about to give up in despair, a cross appears on the rock, showing at first thinly, but gradually growing clear until it stands out in bold relief. The maiden then takes courage, and throwing her arms about the cross, clings to it in safety, while the waves continue to surge against her. Code word, UNPRIESTLY. Length, 50 ft. Price \$7.50.

CHRISTIAN MARTYRS. (T,R) Slaves are seen cleaning up the arena from debris of a carriage race. This done, an imposing parade of warriors, gladiators, soldiers and slaves enter the arena, and approaching before the throne of the dictator, the gladiators salute group or soldiers leading Christian captives before the throne are ordered to bind the victims to the post, and the multitude is waiting to see the lions and tigers devour them. We see a big lion jump at the helpless Christians and tear them to pieces, while the gladiators are ready to encourage the lions in their cruel work. 115 feet. Price \$13.80.

LEAVING JERUSALEM. (N) A panoramic view of the Holy City, taken from the rear end of a departing train. A very fine film. Code, LADY. 50 feet. Price \$5.00.

306

225 DEARBORN ST., CHICAGO, ILL.
MOTION PICTURE FILMS.

JOSEPH SOLD BY HIS BROTHERS. (N) This film depicts the biblical scenes when Joseph is sold by his brothers and taken to Egypt, where he finally landed in jail. He explains to his fellow-prisoners their dreams saying one will go free while the other will hang. His predictions come true. The King has some dreams which he wanted to have explained, and he had Joseph brought before him. Joseph explained his dreams and was made Governor. We see Joseph is tempted by Pharaoh's wife, and how he is crowned Governor. This picture makes an exceedingly fine show for church fairs. Code word, JOSEPH. Length, 625 feet. Price \$68.53.

THE LIFE OF MOSES. (T,Q) In six pictures. 1—Moses drawn out of the water. 2—The burning bush. 3—Passing through the Red Sea. 4—The Hebrews in the wilderness. 5—Upon Mount Sinai. 6—Warship of the golden calf. This very beautiful film shows us the whole life of Moses from his very infancy to the moment when he delivers the ten commandments to his people. The story of Moses is too well known to be repeated and we assure our customers that this film is the truest reproduction possible, its photography being superb. We feel convinced that this subject will soon reach the same high standard as our world-known "Life and Passion of Christ." Length, 521 feet. Price \$62.88.

BELSHAZZA'S FESTIVAL. (T,Q) Belshazza, the king of Babylon, and all his courts are seen enjoying themselves with wine and food. After having indulged all day and night men and women fall asleep. The king awakes and to his horror sees the unknown hand write. Famous words: "Mene, Thecel, Phares." He falls back to sleep, but soon after the walls of Babylon are taken by Cyrus and his army. Persians. Belshazza and his entire court are slain by the conquerors. They demolish the castle and plunder the burning city. Length, 110 feet. Price \$13.20.

JOSEPH SOLD BY HIS BROTHERS. (N) Scene in five pictures. 1—Sold by his brothers. 2—In prison. 3—Tempted by Potiphar's wife. 4—Explaining the king's dream. 5—Joseph's triumph. Methews. Length, 625 feet. Price \$71.76.

DANIEL IN THE LIONS' DEN. (T,Q) The story of the prophet is too well known to be repeated. We witness the scene where Daniel is bound to a post by Cyrus's soldiers. The lions, instead of devouring the prophet, lie down quietly and even lick his hands. Cyrus, who from the outside has been watching the scene, is so surprised that he orders Daniel to leave the den, and slowly and unharmed the prophet walks out of the den of lions. 100 feet. Price \$13.00.

MOTION PICTURE FILMS.

THE PRODIGAL SON. (M) The father presents a large quantity of jewels and money to each of his two sons. The "black sheep" of the family accepts his share very greedily and takes it away to squander it. The other son carefully turns his share over to his servants, instructs them what he wishes done with it, and re-enters his father's house. Here he shows the spendthrift at his pleasures in a wine garden. Next he is seen, after his share has been spent, on his way back home. Outside of the house he sees the pigs, and being very hungry, pushes them away from their troughs and eats their food. He is discovered by his father's servants and driven off. He returns to the stable after the servants have disappeared and, sitting down on a nearby stone, falls asleep. In his dreams he sees his anxious mother awaiting his return and his father endeavoring to comfort her. Upon waking he decides to go to the house. As he approaches the door he is stopped by one of his father's slaves and not being recognized, is refused admission. He induces the slave to send for his mother, and immediately she appears. She recognizes her son and they embrace each other. The glad news is sent to the father, and when he sees him there is great rejoicing. The fatted calf is killed and great is the joy of the entire household at the return of the lost one. Code word, PRODIGAL. Length, 475 feet. Price, ...\$67.50

ANCIENT GLADIATOR. (P.R) This picture shows us a strong gladiator engaged in a fight with a lion. Very often the beast kills the brave man, but in our picture we see the man getting the best of the lion. 75 feet. Price, ...\$9.00

THE SIGN OF THE CROSS. (O.D.) 150 feet. Price, ...\$21.00

JERUSALEM'S BUSIEST STREET. (G) An interesting scene taken in Jerusalem's busiest street. Shows the natives in their picturesque costumes going in all directions, and finally a herd of camels on the road to Mt. Zion, plainly visible in the distance. Code word URBANORUM. Length, 70 feet. Price, ...\$8.40

CHRISTIAN ENDEAVOR GREETING. (T) Gov. Orman meets Mr. Eberman on the steps of the Colorado capitol at Denver. The city and state officers of the society are also present, and received with cordiality. It was a most notable affair for Endeavorers. Mr. Eberman walked toward the camera, and bowed to the operator. His pleasant smile and cheery face will be easily recognized, for word, EBERMAN. Length, 35 ft. Price, ...\$4.25

MARTYRS OF THE INQUISITION. (R) One of the most realistic and vivid reproductions of this notable torture chamber of the middle ages in five scenes: 1 The Prison. Whence the prisoners are called out to undergo their trials and sufferings. 2 Torture Chamber. Where we see prisoners undergoing many of the well-known forms of torture used. 3 The Rack. 4 Torture on the Wheel. 5 Burning at the Stake. The whole is beautifully tinted, in new colors by a process of our own. 68 feet. Price, ...\$85.86

Temperance and Reform.

TEN NIGHTS IN A BARROOM. (N) From the celebrated play song "Father, Dear Father, Come Home With Me Now," may be either sung or played on an instrument behind the scenes while this subject is being shown. Code word SATIATE. Length, 50 feet. Price, ...\$5.00

TEN NIGHTS IN A BARROOM. NO. 1—THE FATAL BLOW. (P) First of the series of dramatic scenes from the popular play. In a drunken brawl in Slade's saloon, Slade throws a beer glass at Joe Morgan and hits his own child as she enters the door. Code, GAY-BOTA. Length 52 feet. Price, ...\$6.24

225 DEARBORN ST., CHICAGO, ILL.

MOTION PICTURE FILMS.

TEN NIGHTS IN A BARROOM. NO. 2—THE MURDER OF WILLIE. (D) A series of dramatic scenes from the well-known play. This is the second. Two men playing cards engage in a quarrel and one stabs the other. The murderer is arrested by Slade Switched. Code, GAMBOSUM. Length 30 feet. Price, ...\$3.60

TEN NIGHTS IN A BARROOM. NO. 3—VISION OF MARY. (D) Scene 3. Morgan has reformed and is shown with his wife in their happy home. The child Mary appears to them in a vision. Code, GAMBIREUM. Length 47 feet. Price, ...\$4.44

TEN NIGHTS IN A BARROOM. NO. 4—DEATH OF LITTLE MARY. (D) This is the fourth scene. The little girl is lying on her cot. Morgan, the father, has delirium tremens and strikes at imaginary objects with a chair. The child rises up during the excitement and falls back dead. Code, GAMBIRIES. Length 50 feet. Price, ...\$6.00

TEN NIGHTS IN A BARROOM. NO. 5—DEATH OF SLADE. (D) Slade is killed by his son, who hits him over the head with a bottle while Slade is in a drunken stupor. Code, GAMBIRINIS. Length 52 feet. Price, ...\$4.20

ALCOHOL AND ITS VICTIMS. (R) Drama in five pictures. Ask for special description. 1—Interior of a happy workman's home. 2 The first step to the public house. 3—His wife comes to fetch him. 4 In the garret—Misery. 5—The Asylum—Delirium tremens. Length, 48 feet. Price, ...\$55.08

CARDS AND CRIME. (G) A highly dramatic picture, opening with a party of friends playing a game of cards. Suddenly a quarrel arises, and one of them attacks another with a chair, and is shot down by a revolver in the hands of his friend. The others leave the room, and the murderer is left alone with his victim. Filled with remorse and after drinking at his rash act, he seizes a decanter of whiskey, and after draining himself upon the lounge and falls asleep. During his sleep he dreams the whole scene over again, and the dream is shown with maneuvers incontinently in a smaller moving picture on the wall over his head. Awakening suddenly he draws the body from its place of confinement, and hides it in the garden. He is then shown asleep again, when he has another dream, showing the supposed corpse coming to life in the garden. He jumps from the couch, and is delighted to find his friend only stunned, and helps him into the house. A startling picture only stunned, and helps him into the house. A startling picture carrying a fine moral lesson. Length 55 feet. Price, ...\$3.00

SUCH A HEADACHE. (G) Into a dollar-a-day room in a lowery hotel enters a New York drummer who has evidently been having a "good time." As soon as he is left alone he begins to "see things." His valise flies around the room in a startling manner, and upon

CHICAGO PROJECTING CO.,
MOTION PICTURE FILMS.

...ening it a huge demon's head arises therefrom and floats through the air. A bottle on the table changes into a little black dog, which springs to the floor as he reaches to take a drink; he rings for the chambermaid, but immediately kicks her out. She returns reinforced with the landlord and the bell boy. All four now engage in a most furious fight, in which bedclothes, chairs, water pitcher, etc., take an active part. The drummer wraps a towel around his head, and pouring the contents of the ice water pitcher upon it, wearily lies down again. After seeing the picture it is easy to see why we give it the title, "Such a Headache." Code word, UNDEISCORE. 23 feet. Price\$15.00

THE LIFE OF A GAMBLER. (12) Drama comprising eight pictures. (Highly recommended) The interior of a saloon is first shown. A man enters and after taking a drink, is introduced to some card players. He joins the game. Scene changes to a street with a gambling house in the background. As the victim seems to be a "good thing" in the game mentioned above, the gamblers lay in wait for him. He comes; is induced to go to the gambling house; submits, and is next seen entering the card room. He sits at one of the tables and plays a few hands. He loses all he has. The usurer appears and lends him money on his note. He still loses. After getting rid of all, he jumps madly from the table, and tossing the cards in the air, leaves the place. Scene now changes to the usurer's office. The gambler enters. The usurer demands payment of the note and the gambler refuses to pay, saying he knew nothing of having given a note to him. At this, the usurer goes to his desk to get the note and show it. The gambler, now seeing his chance to rid himself of the old money lender, picks up a knife from the table and stepping up behind the old man plunges it into him. He then scatters the papers all over the room in an attempt to find the note, but fails, and before leaving stabs the old fellow again. Next scene shows the murderer at home with his wife and child. Judging from the expressions on their faces, his wife is endeavoring to persuade him to give up his bad habits. Suddenly there is a knock at the door, which is answered by the child. The police arrive and arrest the murderer. A very pathetic scene is here shown as the gambler parts with his little girl. Next the courtroom is seen. The judge and jury are seated in their places, and the prisoner is brought before them. His wife and child appear, and he endeavors to reach them, but is held back, and they are induced to leave the room. The case proceeds; the prisoner is found guilty, and the death sentence imposed. Here he falls in a faint. Next scene shows the murderer in his prison cell. He is dreaming. A vision of his sick wife and child appears to him. He rises, gasps, and falls exhausted to the floor. Next is shown the death chamber. The rope is placed around the prisoner's neck, the trap spring and a wretched life is ended. This film depicts a very strong moral. Length, 55 feet. Price\$60.84

CARRIE NATION, SALOON SMASHER. (12) The interior of a saloon with customers is shown. Mrs. Nation and her crusaders come in with their hatchets and proceed to demolish everything in sight. Mrs. Nation knocks out the spittoon from a beer barrel and is deluged by its contents. Code, GALOPPASSI. 20 feet. Price.....\$5.12

.....32 OR 28 VIEWS WITH LECTURE.....

WE present herewith two sets bearing on the life of the Savior, the one containing 32 views, the other 28. Each set contains a short set being composed of the principal scenes illustrated in the regular series. These sets of pictures are of special interest to church workers, and the illustrations are the finest ever produced for a lecture of this title. It may be used by the traveling exhibitor, or by the minister, or Sunday School superintendent, who wishes to convey to his hearers, or scholars, the true life of the Savior, and to excite a deep and lively interest in church work and stimulate the attendance.

for Views

CHICAGO PROJECTING CO.,

HOLY LAND.

....61 VIEWS—WITH READING....

For further description and prices see preceding page

THIS set of views is in reality a travel set, but as it is associated with sacred history it is included in the religious series. The views comprising the set are all made from direct negatives, and illustrate in a graphic manner conditions as they exist to-day in Palestine, and exposing to view the most noted points of interest which are intimately associated with Biblical history.

THE PASSION PLAY.

A Wonderful and Magnificent Production
...OF A...

TOUCHING DRAMA ON THE LIFE OF CHRIST

A Cast Including Christ, His Disciples, Pilate, King Herod, and all ancient characters implicated, with

500 ROMAN SOLDIERS and CIVILIANS

Illustrating the Life of Our Saviour from Birth to the Ascension, as played at the last presentation in OBERAMMERGAU, BAVARIA.

Reproduced by means of Soul Stirring Panoramic Stereoscopic Pictures.

This Play is now produced but once in ten years, and is the sole survivor of those Mystic Plays, or Religious Dramas, which were in full vogue during the Middle Ages in Germany, France, Italy, Spain and England. It costs HUNDREDS OF THOUSANDS OF DOLLARS to produce the play, and people go from ALL OVER THE WORLD to see it.

EVERYBODY MAY SEE THIS WONDERFUL PRODUCTION which will be shown by a series of

Beautifully Illuminated Transparent Views

Magnified to Life Size, and as the views are shown a vivid and most interesting description of each will be given.

INTENSELY INTERESTING TO BOTH OLD AND YOUNG.

EVERYBODY SHOULD SEE IT.

CHICAGO PROJECTING CO.,

....Life and Customs of Palestine....

.....36 VIEWS-NO READING.....

THIS is an especially interesting set, as it differs radically from most sets of views relating to the Holy Land. In this series the manners, customs and habits of the present inhabitants are fully illustrated, which lends to the set an interest and variety not to be found in other sets of this kind, which deal mainly with the ruins and places of general interest, with which every one is familiar.

Complete Set of 36 plain and 10 colored views \$11.00 View box \$1.00 Sets will be made up in the above proportion of plain and colored views unless otherwise ordered.

For less than Complete Sets, plain views each 25c. Colored 50c

IN HIS STEPS.

.....48 VIEWS-BOOK FOR READING.....

PERHAPS no preacher of the present time has attracted more attention than the Rev. Chas. M. Sheldon, due to his justly famous book, bearing the above title. His splendid sermon is here illustrated, with a series of life model views, forming a set of great interest, and especially adapted to the requirements of those churches who work much among church audiences.

Complete Set of 48 plain and 10 colored views with view box..... \$15.50 Sets will be made up in the above proportion of plain and colored, unless otherwise ordered.

For less than complete sets, plain views each 25c. Colored.....50c Book for Reading.....60c

- 1 Introduction, with title
- 2 He was trying to finish his Sunday morning sermon
- 3 He settled down at his desk again
- 4 He rose and walked over to one of his windows
- 5 The two men stood facing each other
- 6 "Did you finish your sermon, Henry?" his wife asked of him
- 7 The anthem of the quartet choir was inspiring
- 8 I'm not drunk and I'm not not crazy and I'm perfectly harmless
- 9 The man gave a lurch and tried to steady himself
- 10 He fell on his face full length, up the aisle
- 11 The man lay on the couch breathing heavily
- 12 Henry Maxwell had to announce from the pulpit that the man was
- 13 He we understand full y what we have undertaken?
- 14 "Here's the press report of yesterday's prize fight," he said,
- 15 If Christ were editing a paper, do you honestly think He would
- 16 The Daily News that evening caused a terrible sensation
- 17 "Would Jesus advertise whiskey and tobacco in his paper?"
- 18 This will mean a great loss to The News. How long do you think
- 19 For Rachel, "What would Jesus do with her voice?" And for
- 20 Rachel spoke with a vigor and earnestness that surprised her
- 21 "Rachel, you are a fanatic, what can you do?" said her mother
- 22 Mr. Gray requests Mr. Maxwell to preach for him
- 23 The two men knelt together in the study, Mr. Maxwell prayed
- 24 The meeting in the tent was well attended
- 25 A drunken man interrupted the meeting
- 26 The people in the tent were all turned toward the singer
- 27 "This is a terrible spot," said Henry Maxwell, as they stood waiting
- 28 Henry Maxwell was stirred deeply by the events of the week
- 29 "I suppose I ought not to trouble you with my case," said young
- 30 Henry Maxwell briefly told the cause of their errand
- 31 Some friends drove up as Virginia was starting for the Rectangle
- 32 Out of the saloon a young woman came, singing, "Just as I am"
- 33 "You shall not touch me: Let me go to hell! The devil's waiting!"
- 34 When they arrived they were told that Mr. Gray was out
- 35 "Did you say she was a friend of yours?" she asked in a cold way
- 36 When the election day came there was great excitement
- 37 "Yes, she's dying," said Dr. West
- 38 "I am going to do something with my wealth to help these women"
- 39 One day Virginia met her brother
- 40 The Rev. Calvin Bruce, D. D., interviewing Henry Maxwell
- 41 He went to the window and opened it
- 42 He knelt down "What would Jesus do? What would Jesus do?"
- 43 His text was "Master, I will follow thee whithersoever thou goest"
- 44 Felicia arrived home, her father waiting for her
- 45 Henry Maxwell knelt to pray
- 46 The service at the Rectangle
- 47 What would Jesus do?
- 48 He saw the figure of Christ

.....61 VIEWS—WITH LECTURE.....

FOR temperance work we consider this set to be one of the strongest and most attractive ever produced. The series illustrates the mode of life, habits, etc. of the lower strata of society, and the surroundings within which they dwell. There has been an oft repeated assertion that one-half the world does not know how the other half lives, and in this series we reproduce the unfortunate half whose lives are passed in wretched hovels, in the breeding spots of vice and crime.

*** John Tregenoweth ***

THESE views made from life models form a beautiful series, the object of which is to contrast the virtuous with the vicious modes of life, and is an excellent set for use in temperance work.

1	The old man and I sat to-	1	She got out the paper and
2	gether.	2	wrote something down
3	I opened the door	3	He comes back and puts a
4	and suddenly there came an	4	bullet into my arms
5	awful blaze of light	5	She flings away the old coat
6	Light a candle, Mary, tis so	6	and puts on another
7	dark	7	Mary, lead me to a corner just
8	betwixt the washbowl and	8	the door
9	the bed, I have mysself tied	9	Follow me
10	Then the little maid wouldst	10	The donkey and cart
11	by my side	11	The new person
12	She was saying for me	12	Let nothing, Oh Lord, inter-
13	here's the old daddy	13	rupt
14	My hand rested upon the scar		
15	of the wound		

❧❧❧ Dan Dabberton ❧❧❧

THIS set like the one above by Tregenoweth is made from life models. The views are all clear and sharp, and they fill well their place in the temperance field.

1	I call on Mr. Dabberton for	11	The young man at his moth-
2	a song	12	er's grave
3	The stranger sings a song	13	The lovers
4	Dan listening to the bells	14	The snug little house
5	He entered the house	15	In comes the young woman's
6	Dan opens the case of the	16	husband
7	clock	17	O mother, I'm so tired and
8	He sleeps! He sleeps!	18	On one of the buds lies the body
9	Our Father!	19	of a middle-aged woman
10	Mother and son	20	He was broad awake now
	Waiting for the prodigal son	21	Mrs. Dabberton and Nellie
11	Her son comes home

The Yellowstone National Park
THE
WONDERLAND
OF AMERICA

And described in a most charming manner by one who has made the subject a special study

By common consent the term "Mendocino" has been applied to this MARVELOUS MEDIUM, where Mendocino captures and streams of being water & steam hundreds of feet in the air, magnificent. Truly a Great as the brilliant fairs of the rainbow, and invasions of other wondrous apparitions

PRESIDENT ROBERTSON SAYS: "The Mendocino Lecture Entertainments are the most interesting and instructive I have ever seen. They are the only ones of the kind in the world. They are the only ones of the kind in the world. They are the only ones of the kind in the world."

Go and observe them and you will say "IT IS SIMPLY THE ALMIGHTY MENDOCINO!"

This splendid illustrated Lecture Entertainment will be given at

Submission. Adults

The Yellowstone National Park

By common consent the term "Wonderland" has been applied to this marvelous region. This name is neither far-fetched nor an exaggerated one. One who could even approach the truth in vicarious description would lay himself open to the charge of wildest romance.

With its mammoth geysers, that send streams of boiling water and steam hundreds of feet in the air, its beautiful terraces presenting all the colors of the rainbow, and a thousand other wonders, it is not surprising one is unable to find words to express his opinion of it.

President Roosevelt says: "The Yellowstone Park is something absolutely unique in this world."

Rev. C. A. Payne, the well-known traveler and lecturer says: "It is simply the Almighty's masterpiece."

It must follow that with a set of magnificent colored views illustrating as they do the superlative beauty, the incalculable grandeur, the splendid majesty of this wonderful creation, and with a suitable lecture to accompany them, a most unusual opportunity is offered for public entertainment that is both entertaining and educational.

To the Land of Flowers, or

To the charm of the sunny Southland, by the side of the sparkling sea. Where the palmetto greets the orange, and the south winds wander free, Add a joy that is past all telling, in this magical pleasure zone. The southern summer dreamland, where the winter is never known.

This magnificent set of slides is something out of the ordinary, and should make a big hit wherever shown. It includes Jacksonville row streets, old Fort Marion, the quaint old city of St. Augustine with its nar- row streets, Palm Beach, the old Spanish houses and store- and Palatial Hotels, Palm Beach, the Paradise of the south, Daytona, Mi- ami, and other east coast attractions, the world-famed Nassau in the Bahama Islands, Key West, Havana and Cuba. Brimful of interest from start to finish. Advertising Posters in Colors, 12x24, per 100 \$1.00

CHICAGO PROJECTING CO.,

Lantern Slides from Original Negatives of 1906

The Grand Canyon of the Colorado in Arizona

No better description can be given than to quote Major Powell:

"The whole scene is forever reminding you of mighty architecture with lattice work and delicate carving. All of these architectural features are sublime by titanic painting in various hues—pink, red, brown, lavender, gray, blue and black. In some lights the saffron prevails, in other lights vermillion, and yet in other lights the grays and blacks predominate."

No painter can convey the impression of titanic immensity; no photograph can give more than an idea of the reality, but in the series of views we have selected for our lecture sets, it is possible to give the best possible presentation on a scale larger than by any other method. A set of these views with the lecture or reading that accompanies them never fails to interest any audience.

Lantern Slides From Original Negatives

Illustrating The Yosemite Valley
ONE OF THE WONDERS OF AMERICA

COMPILED 1981

A desire to visit the natural scene wonders of the world is common to all of us, but for those who are waiting patiently for the time to come when the trip is possible, as well as the business or family ties or the lack of spare means, the following impracticable, yet magnificent, description of the Yosemite Valley will serve as a substitute second only to the trip itself.

The Yosemite Valley has attained a fame not equalled by any point of interest anywhere, but for all that it has remained the last to be reached by the reach of the traveler whose time is limited, or who does not desire to experience the hardships of the early pioneers by taking a seventy mile trip by stage coach. Among the wonders

STUPENDOUS NATURAL SCENIC WONDERS

STUPENDOUS NATURAL SCENIC WONDERS	
of the Yosemite Valley is the mammoth water cascade, over a thousand feet high. The slides in this list are all made from the best of the original negatives. The slides in this list are all made from the best of the original negatives taken by one especially trained and experienced hand colored.	\$.50

Lantern Slides From Original Negatives
ILLUSTRATING THE SCENIC WONDERS OF OUR WEST

COPYRIGHTED 1906

NO COUNTRY IN THE WORLD can boast of the magnitude and great variety of

MARVELOUS SCENIC WONDERS

that are to be found within the boundaries of the western part of the United States. In this set we have combined the views of the most important points of interest to be found in the Yellowstone National Park, the Grand Canyon of Colorado, the Yosemite Valley of California, the Giant Trees, the Moqui and Navajo Indians, the Cliff Dwellings, the Petrified Forest, Garden of the Gods of Colorado, and others, the like of which is not to be found in any country.

The slides for this set of views are all from original negatives taken by one especially trained in this line, are of unusual merit and not to be compared with copied or poorly photographed views usually to be had. With this set of views an illustrated lecture may be given that is interesting, entertaining and educational. All of the views are beautifully colored by hand.

Every patriotic American citizen owes to himself at least a general knowledge of the scenic wonders of our vast country.

Lantern Slides From Original Negatives

Illustrating The Heart of the Rockies The Switzerland of America

COPYRIGHTED 1905

The wonders of nature contain nothing greater than the mountains, and no range of mighty mountains are more interesting, beautiful or impressive than the Rocky Mountains of North America. In the five thousand square miles that surround Denver, Colorado, there are opportunities to view scenic wonders that are unequalled anywhere in any country, and yet every year thousands of people go abroad to see scenery, while ignorant of the fact that they are going the wrong direction for that which is most superb. Among the things of interest in the Heart of the Rockies is the beautiful city of Denver, the capital of Colorado, the famous Georgetown Loop, Pike's Peak, the world-famed Colorado Springs, the Garden of the Gods, Seven Falls of Cheyenne Canyon, Salt Lake, Salt Lake City and the wonderful Yellowstone National Park. The views for this set are all from original negatives, been made by an artist who has made lantern slides his life long work, and knows how to procure good views, photographically correct and adapted to make an interesting lecture set.

A TRIP to PARIS

We hear so much about Paris, both by reason of its world famous expositions, and because it is generally conceded to be the **Most Beautiful City of the World**, that it brings an entertainment on this subject into popular demand. This set contains views of all the principal points of interest, and includes a few of the most important views of the late exposition. The views are made from original photographic negatives, are clear, sharp and artistic, and the artist has endeavored to make them as attractive as possible. It is less than gives one a good general idea of the capital of the French republic, and is equally interesting to the person who never expects to go, the one who does expect to go, and the one who has been there.

Sets will be made up in the above proportion of plain and colored views unless otherwise ordered.

1	The Cathedral of Notre Dame (Pacado)	25	Champs Elysees
2	The Cathedral of Notre Dame (Rivoli)	26	Cafe on the Elysees
3	The Cathedral of Notre Dame	27	Arce de Triomphe de L'Etoile

No. 7—London Bridge.

THE most famous of all the bridges which cross the Thames within the city limits is called the London Bridge and was opened to traffic by King William the Fourth in 1831. It is constructed of granite and the lamp posts on its sides are said to have been cast from cannon captured from the French during the Spanish War. The cost was about eight millions of dollars. During twenty-four hours it is estimated that an average of twenty thousand vehicles and one hundred and twenty thousand pedestrians cross here from one side of London to the other. Standing on this connecting link between the two great sections of the world's metropolis one realizes the immensity of London. The city's population is nearly five millions, to which twenty-five hundred are added per week by birth and two thousand taken away by death. If the entire population of London were placed in single file eighteen inches apart they would extend a distance of twelve hundred miles, or further than from Chicago to Boston.

No. 10—Paris Panorama.

A TRIP to Europe would be very incomplete if it did not include a visit to Paris, the capital of what has been by turns the Empire, the Kingdom and the Republic of France. It is a most beautiful city and of it the French are justly proud. For many centuries the City of Paris changed but slowly and to no great extent, but under the Bourbons and the Bonapartes the changes have been great and rapid, until to-day the population numbers full two million souls and the appearance of the city has been entirely changed. In her wide, well-built, well-paved streets, her broad boulevards, her parks, fountains, arches, churches and bridges, she presents an appearance of extent and splendor and completeness unequalled by any city on the globe.

No. 21—Church of St. Basil, Moscow, Russia.

ONE of the most extraordinary buildings, not merely in Russia but of the world, is the Church of St. Basil. It was erected by Ivan the Terrible about three hundred years ago, and was placed over the grave of St. Basil, who was regarded as the prophet and miracle worker at that time. The architecture of St. Basil's is most wonderful. It has eleven beautiful towers of different forms, which are crowned with cupolas resembling the turbans of oriental giants. It is painted in all the colors of the rainbow, its cupolas being finished in gold or with brightly tinted tiles, and the effect of the variety of coloring can hardly be exaggerated. It shows almost every variety of architectural form and decoration, and so delighted Ivan the Terrible that he caused the architect's eyes to be put out in order that he might never erect a rival to it.

No. 27—Pisa.

LIKE Florence and Venice the City of Pisa also has been famous. It was founded by the Romans 180 years B. C., but beautified by the erection of many temples, theatres and triumphal arches. The celebrated "Leaning Tower" is close to the cathedral and was commenced in the year 1174. It consists of eight circular stories, the uppermost containing seven sonorous bells, the largest weighing upwards of 12,000 pounds. The total height of the tower is 180 feet, with an inclination from the perpendicular of 13 feet; it is ascended by an interior flight of 290 steps. Nothing can exceed the grace and lightness of the structure and nothing can be more remarkable than the general appearance. This wonderful piece of masonry together with others draw the lovers of art from every land to look on them.

...Around the World in Eighty Minutes...

No. 28—Castle of Chillon, Geneva, Switzerland.

GENEVA is most delightfully situated, lying as it does at the southern end of the lake, which is 55 miles in length, and commanding a charming view of the snow-clad chain of Mt. Blanc and is within a few hours' drive of Chamounix. It is the most beautiful, as well as the most popular of Swiss cities. Close to Montreux and only a rod or two from the shore is the Castle of Chillon. Count Peter of Savoy did much during the thirteenth century to enlarge and strengthen, as well as to beautify the castle, and it now remains much as he left it. A feature of special interest in the castle are the dungeons where prisoners of state were confined, and many good men who dared to assert their independence with reference to their faith. Among the many objects of special interest in Geneva are its historic souvenirs, stately hotels and elegant jewelry shops. In the manufacturing of watches Geneva holds a very prominent position, and its products are known the world over.

No. 44—Pyramids and Sphinx.

THAT which most prominently claims the attention of the tourist is the Pyramids, whence forty centuries look down upon us. The origin of these monstrous masses of stone was undoubtedly the desire of the Rulers of Egypt to perpetuate their memory. The Great Pyramid was the Mausoleum of Cheops, who ruled in Egypt more than three thousand years B. C. Its length on each side was 764 feet and it covered an area of more than thirteen acres. In the interior of the Pyramid is to be seen in the King's Chamber after a slippery, suffocating, descent of 320 feet a battered sarcophagus which is said to have served as a coffin of the Cheops. Near the Pyramid is the Sphinx, the huge image of one of the deities of the Ancient Egyptian.

...Around the World in Eighty Minutes...

No. 50—Roadside Tea House, Japan.

EVEN though it has been but a few years since the cities of Japan have been thrown open to foreign travel they have during these few years lost no time in assuming many European characteristics. In fact, so rapidly have these changes been brought about that the traveler who sees Japan of to-day sees but little of what it once was. The foreign dress and mode of arranging the hair have been very extensively adopted and numerous buildings are constructed on the European style. Electric lights, telephones and street cars no longer excite wonder. There is, however, an old custom, which probably will for many years be retained, and that is the use of the Jinrikisha for the transportation of passengers. A man places himself between the shafts and plays the part of the horse for as many hours and as long a distance as the passenger cares to ride. In the foreground of this picture will be seen the Jinrikisha, while in the background is the Roadside Tea House, where tea and other dainties are served as refreshments.

225 DEARBORN ST., CHICAGO, ILL.

...Around the World in Eighty Minutes...

No. 77—Niagara Falls.

WHEN we consider that the Niagara River at the Falls has a normal width of nearly a mile, that it requires the drainage of half the continent to supply it, that its sources are some of them two thousand miles from here, and that eighty-five million tons of water are falling every hour a distance of 160 feet to the abyss below where it assumes a boiling, seething mass in its effort to pass through the narrow channel known as the Rapids, we have before us a subject which is too sublime, too grand, for minute description. The American Fall is about one thousand feet in width, which is about half the width of the Canadian Fall. The two are divided by Goat Island, which is reached from the American side by a bridge. As we stand on the edge of the precipice and view the mighty rush of water, the roar of which can be heard for many miles, we can scarcely realize that this wonderful spectacle existed before there were human eyes to see it.

CHICAGO PROJECTING CO.,

Japan and the Japanese.

.....70 VIEWS—WITH READING.....

CHIS series deals with one of the most interesting countries of the world, and is of peculiar interest at the present time, due to the fact that the Japanese are rapidly acquiring a form of civilization such as exists in all modern and progressive countries. So rapidly is this change taking place that the traveler visiting their country is amazed to note how the picturesqueness of their architecture and their dress is disappearing. We have here preserved in a series of views all of the quaintness, picturesqueness and romance that is characteristic of the people and their world, before the march of progress had worked its changes.

Complete Set of 55 plain and 15 colored views, including readings and view box.....\$21.75

Sets will be made up in the above proportion of plain and colored, unless otherwise ordered.

Mark Twain's Innocents Abroad

54 VIEWS—BOOK FOR READING.

CHIS SET is of a rather humorous character, illustrating Mark Twain's famous book of the same title. The series of pictures represents the great humorists' experience in Europe and Asia, and is described with his own pen. While of a humorous nature, the set is very instructive, and the reading contains much of interest regarding well-known places abroad.

Nansen's Polar Expedition.

52 VIEWS—BOOK FOR READING.

THE series of fifty-two beautiful photographic views illustrates the many interesting, exciting, and dangerous incidents of the noted explorer's expedition. These slides graphically illustrate the frozen North, and the hardships and privations endured by the hardy navigators, who risked their lives for the sake of science. As the set is very interesting, and treats of something very much out of the ordinary, it promises to become very popular.

Complete Set of 42 plain and 10 colored views.....\$16.00
and view box (book extra).....
Sets will be made up in the above proportion of plain and colored views, unless otherwise ordered.

For less than complete sets, plain views each 25c, colored 50c.

...The Passing of the Indian....

No. 6—Pocahontas and John Smith.

IMPROBABLE as the romance may seem, we want to believe the story of Captain Smith and the lovely, dark-eyed Pocahontas. I would not give a snap of my finger for a man who had not any poetry or romance in his composition. Generations have been thrilled by the doubtful story of Pocahontas, and every Anglo-Saxon feels in his heart that if the story was not true it certainly should have been. The injustice that brought about the first sanguinary war between the white settlers and their Indian neighbors is a matter of history and need not be recalled. To-day there is scarcely a trace of the once powerful people who once called the Great Philip their Sachem.

It is a relief to turn from the New England Puritans and the Virginia Swash Bucklers and their career of extermination and study the different course pursued by William Penn in the province of Pennsylvania. His treaty with the Indians was inviolate during the seventy years that the Quakers controlled the province, and has been a model for statesmen ever since. He paid them for their lands, kept his word in all his agreements and this is almost the only instance of the kind in the early history of America.

No. 20—Sitting Bull. (On Advertising Poster.)

SITTING BULL has usually been considered the leader in the Ouster massacre. This is a error. The real fighting leader at that time was Chief Gall, one of the bravest and most resourceful leaders that the Dakota Nation has produced. During the battle, Sitting Bull, who was a medicine man, was in his tepee making medicine—

225 DEARBORN ST., CHICAGO, ILL.

...The Passing of the Indian....

endeavoring to placate the Great Spirit and thus secure a victory for his people. After the battle Sitting Bull, with the remnant of his tribe, escaped across the line into Canada. A command headed by General Terry met Sitting Bull and his braves near Fort Walsh on the Canadian frontier. Full pardon for all past offences was offered the old chief, and he was told that if he would peacefully return to the United States the Great Father at Washington would make a new treaty with the Sioux, which would be kept inviolate for all time. Sitting Bull had been crouching with the members of his family with his blanket drawn over his head. As General Terry ceased speaking the old chief dropped the blanket and slowly rose to his feet. "Why should I go?" he asked. "Your government never keeps its promises with my people. If you can show me one single treaty ever made by the Great Father that was kept in good faith I and my people will go back with you." and General Terry in speaking of the matter afterwards said that he was compelled to confess with shame that he could not recall one such instance.

No. 13—Indian Mother and Pappoose.

BOOMING impatient at the government's delay in providing for them, the lower agency near Mar'ato, Minnesota, went on the war path. A force of United States troops was sent against them and after some of the Indians had been killed the others surrendered and were taken to Mankato as prisoners. At the subsequent trial thirty-eight were condemned to be hanged. The execution took place at one time and upon a single gallows at Mankato on December 26th, 1862. The punishment was just, even at that time some of the white people failed to demonstrate wherein they were any better than these red marauders. While the Indian captives were being taken to Mankato with their women and children they were attacked and brutally beaten by citizens, and an eye-witness of the scene has said that one frantic white woman snatched the pappoose from the back of its Indian mother and raising it above her head dashed it to the ground so violently that it died in a few minutes.

poose from the back of its Indian mother and raising it above her head dashed it to the ground so violently that it died in a few minutes.

COLOR ADVERTISING BILLS is something which has never been furnished before with Stereopticon views. It is a reduced copy of the posters which are to be used with our "LIFE UNDER A CIRCUS TENT" and "THE PASSING OF THE INDIAN" Stereopticon Sets, the full size of which is 12x4 inches.

"THE PASSING OF THE INDIAN"

225 DEARBORN ST., CHICAGO, ILL.

Life Under a Circus Tent.

...Sets of 52 and 70....
Stereopticon Views with Reading,
and Colored Advertising Posters

The author says "there is nothing in the amusement line that can so thoroughly stir the individual or that can turn a community tony as the circus." There's another side to it as told by one who for twelve years has acted in the capacity of advance agent for the World Renowned Ringling Brothers Circus. The story is exceedingly interesting, is humorous and pathetic and deals in such a masterly way with the inside features of a subject of general interest that it should draw the good patronage wherever advertised.

The full set consists of seventy views, all colored but five, and the set of fifty-two is selected from the seventy.

The Advertising Posters in natural colors are very attractive and lend much to the successful advertising of the entertainments. See facsimile and prices on another page.

CHICAGO PROJECTING CO.,
...Life Under a Circus Tent. ...

Part of the Introduction.

IT IS safe to say that nearly all the world loves a circus and there is nothing in the amusement line that can so thoroughly stir the individual man or that can turn a community topsy-turvy so successfully. Many are inclined, however, to look upon the Circus simply as an amusement—a kind of huge entertainment joke, but it is more than this. An institution that represents a capital of from one to three millions of dollars; employs nearly a thousand men, women and children; with average daily expenses of from three to five thousand dollars; which spends \$150,000.00 annually for advertising; which requires from forty to sixty double length railroad cars to carry it; which has upwards of three hundred high class horses and can comfortably seat from 8,000 to 12,000 persons—such an institution must be more than a mere amusement. It is a great industrial enterprise demanding study, patronage and respect.

No. 70—The Clowns.

THE Clowns are the hardest working people in the show. They are always at it and if it were not for them the Circus would be pretty flat. Nowadays there are no speaking clowns. The tents have grown so large people could not hear them. The clown has to depend on his actions for his work and not infrequently it happens that sev-

CHICAGO PROJECTING CO.,

The Spanish-American and Filipino War.

52 VIEWS—WITH READINGS....
OF ALL the illustrated entertainment sets that have been produced, there probably never has been and may never be another of such universal merit as this one illustrating the Spanish-American and Filipino war. It appeals to the patriotism and the National pride of all, and then nearly every one has a near or distant relative or near friend who was in the service, and they will gladly patronize anything that will freshen their memories and throw more light on the subject.

One of the strong elements in the success of a set of this kind is that the public seems never to tire of listening to war stories, but the great popularity of this set is not, however, merely because it's a war story, for neither an internal rebellion or a war in or between foreign countries would appeal sufficiently to any very large portion of our country, for with the former the seat of trouble is so near home and brings so much devastation and suffering, that it's preferable to forget rather than to resurrect, and with the latter there's not enough personal interest in some other nations' troubles to afford the support that the exhibitor needs.

Not only has this set been our best in the past, but it continues to be in good demand and probably always will be popular. This set has our most earnest endorsement.

225 DEARBORN ST., CHICAGO, ILL.

The Spanish-American...

and Filipino Wars.

ILLUSTRATED with 52 Transparent Photographic Views,
 10 of which are hand painted and show all the colors and tints of nature and 42 are shown in regular photographic tints.

(COLORED)

This view illustrates the unfair methods employed by the Spaniards in their warfare. Instead of fighting as other civilized nations they prefer to conceal themselves, oftentimes making overtures for peace in order to meet their opponents unawares. Spanish Treachery is the subject of the above illustration, which shows how the gallant Cuban General Maceo met his death.

225 DEARBORN ST., CHICAGO, ILL.

The Japanese People, and ... The Russian-Japanese War

Set of Sixty Views, with Reading

Deals with a most interesting subject of the hour, and describes and illustrates one of the greatest of modern wars, which was waged by the weaker nation for the cause of justice. It pictures an interesting story of a brave, patriotic, honest, and extremely progressive people who have made the most rapid strides in the line of reform that stands to the credit of any nation.

This set is especially desirable for entertainments in churches, and in co-operation with missionary societies, as well as for general amusement work, owing to the fact that the awakening of this wonderful little nation is said to be due to the efforts of our foreign missionaries. The nature of this set is such that

IT APPEALS TO ALL CLASSES.

And will make a valuable addition to your outfit.

...The Boer War in South Africa...

.....52 VIEWS—WITH READING.....

THIS set illustrates the recent war between Great Britain and the South African Republic. It was selected with a view to illustrating the most important events and special care was taken to secure such views as would show up well with a stereopticon.

Owing to the sympathy extended to the Boers by our people it is a popular set.

See Prices, Sample View, etc. on Preceding Page.

CHICAGO PROJECTING CO.,

A Barrel of Money for You and a Barrel of Fun

For your patrons is what you may expect if you will equip yourself with an Enterprise Stereopticon Outfit including the

Peck's Bad Boy and His Pa

set of views and reading for same

IT'S BRIMFUL OF HUMOR AND SIDE SPLITTING MERRIMENT from start to finish, and is equally appreciated by both old and young.

A HUMOROUS STEREOPTICON SET of this kind has never before been offered for sale, so it's a **BRAND NEW IDEA**, but it's what the people want, and is **MAKING A BIG HIT**.

This new departure has been the means of putting **Now Life** into this line of business; in fact it has worked a revolution, and exhibitors who are using it are showing to **Crowded Houses** at good prices and are **Making Good Money**. "Peck's Bad Boy" in book form, even though very sparingly illustrated, has been one of the best selling publications ever printed, is known everywhere and by nearly everybody, and when the large advertising posters are put up in conspicuous places, announcing that this funny story is to be **superbly and profusely illustrated with the LIFE SIZE STEREOPTICON VIEWS** representing every scene as natural as life.

THAT WILL BE ENOUGH AND THE HOUSE WILL BE CROWDED

There's a big demand for **Real Entertainment**, especially for something humorous, and in the "Peck's Bad Boy" Set We've Struck a **Head Easer**. It's full of sentiment, has a good moral effect, appeals to both adult and child, and affords them an opportunity to

LAUGH OFF THE BLUES, AND FORGET ALL THEIR TROUBLES.

In fact, it's brim full of fun from start to finish, one continuous round of pleasure. Think of the nearly **Twenty Thousand** small towns and villages in the United States, to say nothing of several times that number of country school houses, churches, etc., where people would come from miles around to see an entertainment of this kind.

THE LARGE SIZE ADVERTISING POSTERS arranged especially for this set, with attractive illustrations and excellent display are an important feature, and a great help to the exhibitor. Furthermore the views are not from drawings, but are made from **Original Negatives Photographed from LIFE MODELS**, and everything is of the **Best Throughout**.

It's What the Public Wants, It's What You Want, It's the Acknowledged Leader, and is **A WHIRLWIND AS A MONEY MAKER.**

- 71 The Bad Boy relates the experience to the grocer.
- 72 The Bad Boy is not a myth.

437

CHICAGO PROJECTING CO.,

Stereopticon Outfit No. 24½

Includes 52 or 72 all Colored
Stereopticon Views for Illustrating

Peck's Bad Boy and His Pa

THE story may be illustrated to very good advantage for the start, with fifty-two views, but where the available means will permit, we advise the use of the full set of seventy-two.

We also recommend the addition of a Motion Picture Machine and Films, making a complete outfit as listed under No. 25½, but the Stereopticon Outfit is the backbone and foundation of the business, and the other features may be added later.

OUTFIT No. 24½

Consists of the following named articles, all of which are fully described in the catalogue.

- 1 Enterprise Stereopticon with Lenses.
- 1 Double Slide Carrier for quick change of views.
- 1 Carrying Case for Stereopticon.
- 1 Improved Acetylene Gas Generator with high power burner.
- 52 Transparent Photographic Stereopticon views, the "Bad Boy" set, all colored.
- 1 Polished Wood case for views.
- 1 Large White Screen, 1 x 12 feet.
- 250 Large Advertising Posters, 2 x 3 feet on tinted paper.
- 2000 Admission Tickets.
- 1 Rubber Type Outfit for filling dates, etc., in Posters.
- 1 Book, "Peck's Bad Boy and His Pa," for description of views.
- 1 Instruction Book and "Business Guide."

Price of Outfit No. 24½, as Listed Above, \$69.00

With 72 views instead of 52, extra.....\$8.50
With Sun Rival instead of Acetylene light, extra.....2.00

OUTFIT No. 25½ COMBINES BOTH Motion Pictures and Stereopticon Views

... FOR ILLUSTRATING ...

Peck's Bad Boy and His Pa

The Motion Picture films listed with this outfit are especially adapted to the "Bad Boy" set, showing incidents that are not included in the stereopticon views and may be used to best advantage between the different chapters. As they are full of action and strictly in keeping with the sentiment of the story, they add much value to the production. We have in our regular list ten of these "Bad Boy" Motion Picture views, all of which would make a delightful diversion between the eleven different chapters, as two between each could be used to advantage.

The Outfit Consists of the Following:

- 1 Enterprise Stereopticon complete with lenses.
- 1 Optigraph No. 4 Motion Picture Machine with lenses and reels.
- 1 Vise Grip Sliding Base.
- 1 Truss and 4 Extension Legs.
- 1 Oak Base Board for Stereopticon and Motion Picture Machine.
- 52 All Colored Stereopticon Views ("Bad Boy" set).
- 2000 Admission Tickets.
- 1 Polished Wood Case for Views.
- 1 Double View Carrier for quick change of views.
- 1 Case of Large Rubber Type for printing dates, etc., on Posters.
- 1 Holder for Type.
- 1 Type Trowels.
- 1 Ink Pad for Type.
- 1 Instruction Book and "Business Guide."
- 1 Book "Bad Boy" to be read or recited while views are shown.
- 1 Carrying Case for Stereopticon and Motion Picture Machine.
- 1 Muslin Picture Screen, 10 x 12 feet.
- 250 Large Advertising Posters, 2 x 3 feet printed on tinted paper.
- 1 Box containing one dozen films.
- 1 New Style Model B, Enterprise Calcium Gas Making Outfit.
- 1 Carrying Case for Gas Making Outfit.
- 1 Box of "Oxylinth" for making oxygen gas.
- 1 Charge of Eater for making hydrogen gas.
- 1 Improved Enterprise Calcium Jet, with keys.

Motion Picture Films as Follows:

- 1 "The Bad Boy Interrupts the Minister's Wedding," 20 feet.
- 1 "An Innocent Victim," 28 feet.
- 1 "A Ringer Joke on His Pa," 47 feet.
- 1 "He Puts A Head on His Pa," 40 feet.
- 1 "The Bad Boy a Good Shot," 28 feet.

For Complete Description of the Films and other Goods see Catalogue.

PRICE OF OUTFIT No. 25½ COMPLETE AS LISTED ABOVE \$173.25

For 73 Colored Stereopticon Views instead of 52, add \$8.50

Additional Films for the "Bad Boy" set may be had at the rate of twelve cents per foot. (See regular list.)

TERMS: Outfits will be shipped C. O. D. to points within the United States subject to examination on receipt of a deposit of \$5.00 with order as a guarantee of good faith. Deposit will be refunded if outfit is not found as represented.

OUR NEW SET OF 42 VIEWS ILLUSTRATING
Alice's Adventures
in Wonderland

Stands prominently AT THE HEAD OF THE LIST for the entertainment of children, and is far above the average for the amusement of the older folks.

A good set for the entertainment of children is always in great demand, owing to the greater numbers available, and also to the greater number that may be secured. Then too anything that will draw the children, brings the parents. Alice's Adventures in Wonderland, is a most delightful fairy story, and has without doubt had the largest sale of any book of the kind ever published. The views are all clear, sharp and comprehensive, while the story is superbly charming.

Complete Set of 22 plain and 20 Colored Views (42 in all) included.

ing our regular View Box\$15.00

Book for Reading, large size, cloth bound, extra..... 1.00

The following is a list of the views. (For fac-simile of poster and further description see preceding page.)

- 1 The White Rabbit said to itself, "Oh, dear! I shall be too late!"
- 2 Alice looking for a means of escape.
- 3 She discovers a bottle containing a magic fluid.
- 4 She finds herself extended like a telescope.
- 5 Alice sadly grieves.
- 6 She swims in a pool of tears.
- 7 O mouse, do you know the way out of this?
- 8 The mouse tells its history.
- 9 "And who is Dinah?" asked the Lory.
- 10 Alice waits for Dinah.
- 11 A crash from broken glass.
- 12 She hears a queer scrambling in the chimney.
- 13 An enormous puppy was looking down at her.
- 14 Alice appeals to the caterpillar for advice.
- 15 Father William, "I fear it might injure your brain."
- 16 "Yet you turned a back somersault in at the door."
- 17 "In my youth," said the father, each case with my wife.
- 18 "I took to the law, and argued the end of your nose," said the Footman.
- 19 "Anything you like," said the Footman.
- 20 "There's certainly too much pepper in that soup."
- 21 "Don't grunt," said Alice, "that's not at all the proper way of expressing yourself."
- 22 "Would you tell me, please, which way I ought to go from here?"
- 23 But a grin without a cat.
- 24 A mad tea-party.
- 25 "Have you guessed the riddle yet?" the Hatter said.
- 26 And they put the Dormouse into the teapot.
- 27 Five and Seven said nothing, but looked at Two.
- 28 Next came the guests, mostly kings and queens.
- 29 The chief difficulty was in managing her flamingo.
- 30 "Off with his head!" said the queen, without even looking around.
- 31 "He's what you would seem to be," said the Duchess.
- 32 They very soon came upon a Gryphon, lying fast asleep in the sun.
- 33 The Mock Turtle's story.
- 34 The Lobster Quadrille.
- 35 "You have baked me too brown, I must sing my hair."
- 36 "Who stole the tarts?"
- 37 And the White Rabbit read:—"The Queen of Hearts, she made some tarts all on a summer day."
- 38 In his confusion the Hatter bit a large piece out of his cup.
- 39 "You may -" said the king, and the Hatter hurriedly left the court.
- 40 Alice has grown to her natural size.
- 41 "Why, there they are!" said the King, triumphantly, pointing to the tarts on the table.
- 42 As the whole pack rose up in the air, Alice awoke, and said to her sister, "Ah, I've had such a curious dream!"

The First American Flag, Colored.....	50
Girl with American Flag, Colored.....	50
Spirit of '76, Colored.....	50

Pose Slides.

These slides are known by the name of Poses Plastique, Costume or Cloak slides. They get their name from the original method of projecting the slides, which was done by having a person pose before a black screen, usually a lady with a white dress and black cloak with a white lining. The cloak is made in the form of a kind of plain mantle, and along the front edges is provided with loops through which the arms are passed and by which the cloak is supported when the arms are spread out, in which position the cloak together with the white dress of the lady, forms a screen on which the picture from the lantern may be projected. The pictures blend with the into or printed on the goods. The cloak should be closed, which will leave everything black, while the slide is being changed. The slides for this purpose having the background blacked out, shows only the picture from the slide.

Portraits of National Characters, Colored, Each 50c. Colored and Blacked Out, Each \$1.00.

1 Bryan	9 Grant	17 Pope Leo XIII
2 Carnegie	10 King Alfonso	18 Pope Pius X
3 Cleveland	11 King Edward	19 Queen Victoria

Slides for Serpentine or Skirt Dances, Colored and Blacked Out,
Each \$1.00

Costume slides are furnished in two ways. Where they are intended to be projected on some one posing, the space in the slide where the head would come is left transparent, so as to project the light on the face of the poser. These slides may be used, however, to advantage without a poser, by ordering them with a face, in which case they may be projected on an ordinary curtain or screen.

1 Angel	5 Bathing Suit	9 Carnation
2 Bat	6 Brownies	10 Cowboy Costume
3 Bathrobe	7 Buccaneer	11 Chinese Costume
4 Ballet Dancer	8 Butterfly	12 Fairy Costume

225 DEARBORN ST., CHICAGO, ILL.

Comic Stereopticon Slides.

A few Comic Slides will add much interest to a Stereopticon Lecture or Motion Picture Exhibition and the popularity and increasing demand for something new in this line has encouraged us to make up an entirely new list of comic slides in which we have combined originality, the best work and the most entertaining subjects.

We would suggest that the selection of comic slides be left to us, as it is impossible to give an accurate idea of slides of this kind from the title and abbreviated description. If the exhibitor will give us the subject of his lecture and what other features he is using in his entertainment, it will enable us to make a more satisfactory selection than probably he could do himself.

PRICES Plain Comic Slides, each.....\$0.25
Colored Comic Slides, each......30

Color adds much to the value of comics and they should always be ordered colored.

Comic Slides in Sets of Two.

(A) Now Snarl Dad, and Show Fight.

CHICAGO PROJECTING CO.,
COMIC SLIDES.—Continued.

(B) Grin and Bear It, Dad, It'll be the Makin' of the Pup.

- (A) **The Chinese Question.** The Rivals—Showing controversy between Chinese Laundryman and an Irish Washerwoman.
- (B) **The Chinese Question.** The Controversy Settled—The woman has the best of the argument and her dog is pulling at the Chinaman's coat.
- (A) **Something Has Got to Come.** Dentist pulling at tooth with much effort but no results.
- (B) **Something Did Come.** Showing stove upset and things generally in a dilapidated condition.
- (A) **I Wonder If It's Loaded.** Boy looking into the muzzle of a large pistol.
- (B) **It Was Loaded.** Pistol discharged. Boy in agony. Cat much scared.
- (A) **A Ghost Adventure.** Drunken man in a graveyard.
- (B) **A Ghost Adventure.** Showing Donkey in queer predicament with a man's shirt.
- (A) **An Approaching Storm.** Husband making love to a lady customer; wife watching.
- (B) **Struck by a Cyclone.** Wife breaks ruler over his head. He falls through a chair.
- (A) **The Mash.** Dude undertakes to make a mash on what seems to be a stylishly dressed lady.
- (B) **The Mash.** Crushed. Finds her to be a darkey girl.
- (A) **Outward Bound.** Showing typical Irishman on the quay at Dublin.
- (B) **Homeward Bound.** The dock at New York. Showing what he considers a great improvement.

225 DEARBORN ST., CHICAGO, ILL.

COMIC SLIDES.—Continued.

- (A) **Finding Moses by Pitman.** Showing Moses as usually pictured.
- (B) **Finding Moses by Mark Twain.** Showing him sitting in a basket dressed in modern clothes, with knife, fork and spoon, and crying because a frog is on his plate.
- (A) **Poor Tommy.** Showing two children and the cat.
- (B) **Poor Tommy.** Children have the cat in a letter press and squeeze him flat.
- (C) **Poor Tommy.** Shows the cat on the floor made into a rug; children much amused.
- (A) **"Tying Back."** Stiff for a brush. Shows four-horse team coming up behind an old horse hitched to a buggy.
- (B) **Hung up with Starch out.** Shows box of buggy stuck on the limit of a tree, one wheel over another limb with the man in the wheel, the horse tangled up with other parts of the buggy and the four-horse team dashing away, apparently uninjured.
- (A) **Dey Say I Can't.** Showing little darkey and big watermelon.
- (B) **But I've Done Gone and Done It.** Showing only rind of watermelon left, darkey much extended and apparently uncomfortable.
- (A) **All the Consequences of Married Life.** Showing woman sewing with pleasant expression, while man gives up his money apparently much distressed.
- (B) **All the Consequences of Bachelor Life.** Man doing his own sewing, with queer bachelor surroundings, but with a pleasant smile and apparently enjoying himself.
- (A) **How Jones Became a Mason.** Showing a weird initiation scene, Jones being tossed in the air by the goat.
- (B) **Jones Returning Home after his Initiation.** Clothing badly torn and such a sight that his wife falls over backwards from the chair, apparently in hysterics. Knitting and other things thrown in the air.
- (A) **Peace.** Showing man in bed, cat on window, dog by bedside, all asleep.
- (B) **War.** Another cat appears, they fight, dog is aroused, man grabs boot, and pandemonium reigns supreme.

Single Comic Views.

- Dot Little German Band.** Showing a comic variety in build, height, dress, etc.
- Pleasure Before Business.** Irish coal shoveler and Biddy kissing through the coal hole in the sidewalk.
- A Division of Labor.** Showing Irishman carrying stove pipe and other small parts while wife carries stove.
- What's a Home Without a Mother-in-law?** Husband undertakes to slip in after after one o'clock. Mother-in-law makes things generally uncomfortable.
- A Coolness Between Friends.** Showing two heavy gentlemen who have broken through the ice.
- A Black Squall.** Showing a comic scene with black weather and black people in a boat.
- Hang Me Closer, George.** Showing lady sitting on log, bear behind log hugging her.
- Two Heads Better than One.** They come together smashing their heads.

CHICAGO PROJECTING CO.,

SINGLE COMIC SLIDES.—Continued.

- Take Back the Heart that thou Gavest Me.** Beef hearts returned to the butcher by Biddy.
- Put My Little Shoes Away.** Showing darkey singing with Banjo, but is the possessor of feet not in keeping with the song.
- 'Twere Vain to Tell Thee All I Feel.** Doctor at bedside of boy who evidently had a whipping.
- Two Souls with but a Single Thought.** Pair of darkies eating from the same piece of watermelon.
- My Pants, Well I Should Remark.** Shows man in distress on this side of the fence. Man much amused on other side with dog who has in his mouth part of the trousers belonging to the first man.
- If these are yours, Boss, you can have 'em.** Showing darkey caught in the act of coming out of chicken coop with chickens.
- Thou art so Near and yet so Far.** Old man having trouble with junior fisherman on the other side of deep stream.
- Too Late for the Train.** Showing fat man running with large packages. Train far ahead.
- That Husband of Mine at 2 A. M.** Showing much disturbed husband in night robe with cross baby, medicine, spoon, etc.
- She Stoops to Conquer.** Showing ridiculous position of old maid killing a spider.
- Stern Parent and Lovers.** Parent appears with candle and disturbs a comfortable and apparently desirable position.
- A Tipperary Boy Going a Courting.** Little dreaming that a Kerry man was there before him.
- Don't you Forget It.** Showing two comical Irishmen in an argument.
- Mary had a Little Lamb.** Showing a very comical version.
- Fatherless.** Showing Thomas-cat partly protruding from a barrel of water while mother-cat and her kittens hurry away.
- Alligator Bait.** Showing alligator smiling while Piccaninny in bathing costume is much scared.
- First Cousins. Ape and Boy.** Striking similarity and very amusing.
- Star of the Evening.** Policeman escorting a drunken Irishman.
- I want to be an Angel.** Boy with gun and knife prepared to do personal injury.
- Hauling off the Bride.** Showing an old fashioned two-wheeled cart with bride sitting on a bunch of hay.
- Donnybrook Fair in the Real Auld Times.** Showing happy fiddler in foreground. Dancers in the rear.
- War Dance. Opening of the Ball.** Bursting shell. Soldier much excited.
- Victor and Vanquished.** Showing one boy smoking comfortably, while the other has discarded his cigar and is much distressed.
- Come Into the Garden, Maud.** Showing Mr. Thomas-cat howling with all his might while Maud seems much tempted.
- Babies on Our Block.** Showing babies of all sizes and descriptions. In every conceivable position.
- Why did he Sup on Pork?** A horrible night-mare pictured.

225 DEARBORN ST., CHICAGO, ILL.

Comic Slides in Sets.

- (A) **Horse and Snow Man.** Building the sledge. Four boys with carpenter tools and lumber, very busy.
- (B) **Horse and Snow Man.** Procuring the motor power but the owner was out. Boys bring an old crowbar from the stable.
- (C) **Horse and Snow Man.** The Start. Peace and Prosperity. Horse hitched to sledge, boys taking a ride.
- (D) **Horse and Snow Man.** A sudden stop. Horse sees snow man, suddenly stops and rears back.
- (E) **Horse and Snow Man.** Crash! Horse passes trees close by, turns in the road, scatters boys and breaks sled.
- (F) **Horse and Snow Man.** Homeward bound. Boys, horse and sled on the road home, in dilapidated condition.
- (G) **Horse and Snow Man.** They following. The boys line up in penitent mood, old man chastises with much severity.
- (A) **Getting the Best of an Artist.** The plot. Artist painting landscape, two rough looking characters scheming in the background.
- (B) **Getting the Best of an Artist.** A rising artist. One character hides behind stone, other gives artist a severe kick.
- (C) **Getting the Best of an Artist.** Masterly tactics. Artist chases character who kicks him, other character comes forward from behind stone.
- (D) **Getting the Best of an Artist.** Finishing touches. Character from behind stone dons artist's cap, takes palette and brush and administers finishing touches to picture, while well dressed couple admire picture from position in rear.
- (E) **Getting the Best of an Artist.** A good sale. Character who poses as artist counts money, well dressed couple carries off picture, while real artist still chases the other character over the hill in the background.
- (F) **Getting the Best of an Artist.** Sold. Artist returns, finds sign "Thanks," on easel. Character is going up hill in background.
- (A) **The Serenade.** "Sirrah Malynes hath a pretty fancy to carol ye fair (Goddess)," a musician with brass horn makes his appearance for serenading.
- (B) **The Serenade.** "Sir Laurence wisheth to do ditto." Musician No. 2 with trombone wishes to join.
- (C) **The Serenade.** "Truly this is Yule Tide when Christian knights fight not, therefore let us carol together." Both musicians play vigorously.
- (D) **The Serenade.** "They waxed exceeding furious, each trying to out carol ye other." Musician No. 2 adds his trombone into bell of instrument of Musician No. 1. Dog falls over in snow, feet upward.
- (E) **The Serenade.** "Nature could not stand ye strain." A great explosion, musicians, horns, music, etc. all in pieces.
- (F) **The Serenade.** "In ye morning ye baron smiled beholding ye remnants and thanked his lucky stars that there were two waits ye less." Only small parts of the musicians and horns appear scattered about on the snow while an astonished crowd looks on.
- (A) **Fooling the Baby Elephant.** Coconut shies. Two monkeys on limb throw coconut at elephant, elephant eating grass.
- (B) **Fooling the Baby Elephant.** Did any one knock? Coconut hits elephant on side of head, elephant doubles up with pain and surprise.
- (C) **Fooling the Baby Elephant.** Try another. Elephant draws water with his trunk, from the stream.
- (D) **Fooling the Baby Elephant.** The Water-shoot. Both monkeys were ready to throw other coconuts, but elephant throws water with great force and knocks them off the limb.

CHICAGO PROJECTING CO.,

COMIC SLIDES IN SETS—Continued.

- (A) **Success or Failure.** An old sailor having invested in a horse which was a little wild, decides to break it in. Horse kicks high in air, sailor holds halter. Astonished wife looks on.
- (B) **Success or Failure.** Harassing the animal to a trap, he fits the anchor to the axle with a stout rope and drives off along the sands. Boy holds horse while sailor with broad smile, places anchor.
- (C) **Success or Failure.** As soon as the animal starts the old salt dropping the reins, yelled "Let go the anchor," and dropped it overboard.
- (D) **Success or Failure.** Horse dashes on until the line gives out, there he pauses so suddenly that the trap smashes and the skipper shoots up into the air. Self explanatory.
- (E) **Success or Failure.** Slowly and sorrowfully he leads the horse now quite docile from fright, but the old skipper's pain caused by the fall was nothing to that rising from the remarks of his acquaintances. The cart very badly broken, sailor's head wrapped in bandages, jeering crowd looks on.
- (A) **Spoiling the Spiller.** "Stop thief!" A negro village showing African huts, little negro running away with box of powder and box of matches.
- (B) **Spoiling the Spiller.** "Stop that nig!" Little nig with box being chased by villagers but is overtaken first by an ostrich.
- (C) **Spoiling the Spiller.** Best blowout I have had for a month. Ostrich eats hearty meal from box that contains powder and villagers look on with amazement.
- (D) **Spoiling the Spiller.** "Down went the matches it—Was!" The powder explodes, the ostrich is in pieces, breaks down coconut tree, hurls the thief.
- (A) **A Triple Meeting.** Bertie meets the fish girl. Bertie a well dressed man with silk hat. Fish girl with basket of fish on head.
- (B) **A Triple Meeting.** Two sailors in background, one with pole on shoulder.
- (C) **A Triple Meeting.** The broken pole meeting the fish basket.
- (D) **A Triple Meeting.** The fish meets Bertie. The fish and basket fall on Bertie.
- (A) **Rather an Expensive Joke.** Joking parent: "I say, Tommy—"
- (B) **Rather an Expensive Joke.** Well dressed gentleman with sor on board walk at seashore.
- (C) **Rather an Expensive Joke.** "I've thrown your hat into the sea!" The parent has Tommy's hat behind him.
- (D) **Rather an Expensive Joke.** "There don't cry, look! I have whistled it back again."
- (A) **Rather an Expensive Joke.** Tommy, (throwing his hat into the sea, "Oh! do that again Papa," From comic life. Parent looks surprised.
- (A) **A Lesson in Air Force.** The calm before— A wail shouts
- (B) **A Lesson in Air Force.** Well dressed man with large cane.
- (A) **A Lesson in Air Force.** The storm.
- (A) **The Whitewasher.** John hears a voice urging him on. It is his employer behind him. A typical old maid is just coming around the corner.
- (B) **The Whitewasher.** And makes his mark. John while looking at his employer makes a swipe with the brush and hits the maiden lady in the eye.
- (A) **The Artist.** A—By jolly up here; cool; quiet; nothing to—
- (B) **The Artist.** Disturb one!! Someone runs a sweeper up the chimney, scolds the artist, he jumps through his picture. His cat laughs.

225 DEARBORN ST., CHICAGO, ILL.

COMIC SLIDES IN SETS—Continued.

- (A) **Fish Seller.** Fish up. Fat fisherman with a large tray of fish on his head.
- (B) **Fish Seller.** A sudden drop; fish down. Woman opens door suddenly, which strikes fish tray and all goes down.
- (A) **The Photographer.** "Look pleasant please!" he says as he makes ready to picture the sphinx and some visitors.
- (B) **The Photographer.** "Shades of Pharaoh!" what's that? The sphinx runs his tongue out, winks one eye places his head on one side and the frightened visitors run away, the photographer's hair stands on end, his hat flies off.
- (A) **Thought it Was a Picture.** Young spendthrift makes ribald remarks about an old portrait.
- (B) **Thought it Was a Picture.** But it was a striking likeness after all, it wasn't a picture but man pulls the youth's ear and strikes him.
- (A) **The Cyclist.** The ineffable Jones starts out for a spin. A well dressed gentleman on a wheel.
- (B) **The Cyclist.** And gets a shower bath instead, he runs into a sprinkling wagon.
- (A) **The Joke Turned.** Don't play tricks on a—Old man carrying a basket, boys pinning sign on his coat tail.
- (B) **The Joke Turned.** Dog-fancier. Dogs stick their heads out of the basket, from his pockets, from his hat etc., boys scared.
- (A) **The Snow Man.** "Come on boys, let's give him beans." Boys throw snow balls at what they thought was a snow man.
- (B) **The Snow Man.** "He he he." Snow man tans on the boys, knocks one over with a snow ball, others run in fright.
- (A) **The Sky Rocket.** Lighting the monster rocket. Boys set a sky rocket up in the fire place, tie it fast to the string and light it.
- (B) **The Sky Rocket.** An unexpected rise in the world. The rocket goes up, takes the house with it and drops out the boys.
- (A) **Dragons.** "Pooh! I don't believe in 'em." A cluster of village peasants discuss ghosts.
- (B) **Dragons.** But his friend did. The ghost appears, they all scatter in confusion.
- (A) **The Tramp.** Willie Weary talking to himself, "Which shall I sleep in?" Meaning which of the barrels.
- (B) **The Tramp.** Chorus "Not this 'un." Seven heads pop out of barrels and boxes in an old shed.
- (A) **Prof. Bunkum's Illusion.** "No deception, ladies and gentlemen," "No paraphernalia" says the professor as he points to the empty hat on the stand.
- (B) **Prof. Bunkum's Illusion.** Er—Er—Ar—Tish—OO!!! Oh! From his pockets appear the heads of rabbits, lizzards and other live animals used in the act.
- (A) **The Snow Slide.** Look at that old buffer! hat hat hat! A cat dressed as young dude pins pinard on back of another.
- (B) **The Snow Slide.** Look at that young rascal! hot hot hot! Snow slides from top of house and covers the joker.
- (A) **The Ghost Story.** Old mouser just finishing a terrible ghost story when—A lot of cats dressed as men, women and children sitting about a fire place.
- (B) **The Ghost Story.** It ends abruptly, a ghost comes in, they all scatter.

CHICAGO PROJECTING CO.,
COMIC SLIDES IN SETS—Continued.

- (A) **A Colored Woman's Dilemma.** "Massy mel where ar dem ornory chillun? A tame penguin tied to string in front of log cabin in door of which stands darkey woman.
- (B) **A Colored Woman's Dilemma.** "Here we is Mammy" one of them cries from the mouth of the penguin in which are the children. Mammy greatly surprised.
- (A) **The Pirate.** "Surrender or die" yelled the pirate captain, when the pirate captain with a bad sword sternly commands the officer of the ship.
- (B) **The Pirate.** A rope broke aloft, and the cabin boy's sudden descent saved the ship. The rope breaks and the cabin boy falls on the pirate.
- (A) **He Blowed Out the Gas.** Beastly smell of gas, must be a big escape somewhere. Man from the country to light a match to look for the escape.
- (B) **He Blowed Out the Gas.** There was—He lights the match which causes an explosion, tears up the carpet, thrown old man and furniture in confusion about the room.
- (A) **An Old Adage.** Two's company. Two frogs sitting on toad stools in a sociated spot behind some grass.
- (B) **An Old Adage.** Three's none. A goose sticks his head through the grass and the frogs make a hasty departure.
- (A) **The Surprise.** "When duty calls"—Three apes dressed as policemen start to investigate the hoot of an owl.
- (B) **The Surprise.** "Look out for squalls." They find the owl, he stares and flaps his wings and the three apes are stampeded.
- (A) **Every Dog Has His Day.** A peasant has one dog under his arm another which he leads by a string, enters a sausage factory.
- The Farmer and Calf.** A series of 12 exceedingly funny slides, illustrating a farmer's troubles with a most suburban calf. He finally devises a scheme for inducing the calf to follow him that works to perfection.

Best Motion Picture Machine on the Market.

EN ROUTE, SAGINAW, MICH., July 30, 1899.
 GENTS:—Have been using your Optigraph Motion Picture Machine for nearly a year and have found it very satisfactory and believe it to be the best Motion Picture Machine now on the market. Have seen many so-called picture machines but none seem to enthrall an audience as the Optigraph, and your new model for 1899, with late improvements, is, in my judgment, the peer of all, and if it can be attached to the one we have been using would prefer to have all the late improvements. Please advise us the cost of same.
 Awaiting your prompt reply, I am, yours very truly,
 J. W. H.

CHICAGO PROJECTING CO.,

Stereopticon Advertising.

A Profitable Business, to which you may devote all your time, or it may be conducted successfully after hours in your own town without interfering with regular daily employment or business.

While it is not generally known, a good income can be made by stereopticon advertising with a stereopticon alone, or in combination with a motion picture machine. Advertisers are ready to patronize the best means of getting their business card, or a list of their bargains, before the public, and this method, we believe, is not surpassed by any, but good as it is, it has been worked very little.

Arrangements can be easily made with from twenty to thirty merchants at a time, to show their advertisement from four to six times during the evening (either a single slide or a series). The advertising slides should be interspersed throughout with a selection from our regular comic list, scenic views, etc., to keep up the interest, and an occasional motion picture view will add much to the value, but is not imperative.

At great expense we have prepared a large list of designs suitable for representing almost any kind of business. Each slide has an attractive design, comic drawing, cartoon or lettering in attractive form, with blank space for name and address. Each slide is colored to make them more natural and interesting. The name and address of the dealer or a list of special bargains may be written or printed in with a pen and India ink.

Price of Advertising Slides colored only, each.....\$0.50

- | | | |

CHICAGO PROJECTING CO.,

Illustrated Song Views

(Colored only)

FOR THE STEREOPTICON.

Illustrated songs have become one of the most popular accessories to motion pictures, both for the motion picture theater and the traveling exhibitor. Song slides are furnished colored only. They are hand painted showing all the colors of nature, and when a slide of good quality is shown with the stereopticon enlarged to life size it is very realistic.

It is of the utmost importance to the purchaser of song slides that he have nothing but originals. Copies are poor in quality, lacking in detail, and the difference in price between copies and originals is not such as to warrant their consideration for a moment. It is our aim to handle slides made from original negatives only, and anyone who has any pride in his work cannot afford to consider anything else. Our prices are as low as is practicable considering quality.

THE TALKING MACHINE affords an economical means of producing songs to accompany stereopticon song illustrations. The song productions of the latest improved machines and records are loud, clear and distinct, and the novelty of the all mechanical entertainment helps to charm the audience. Talking machine records cannot be had for all songs, and as the list of records is constantly changing, it is best to make selections of songs you like and write us to ascertain if they can be furnished at the time of writing.

We have two lists of song slides, for the first of which records may be had at the time of compiling this catalogue. If disc records may be had they are marked following the title "(D)," for cylinder "(C)" and for both disc and cylinder "(D-C)."

Music will be furnished when desired, and with few exceptions the price is 35c per copy. Orchestrations, when desired, should be ordered of the publishers, names of whom will be furnished on application.

PRICE PER SLIDE, Colored, each.....\$0.50

No charge is made for the title slide except where sets contain less than twelve slides.

LIST OF SONG SLIDES FOR WHICH RECORDS MAY BE HAD.

(D for Disc—C for Cylinder)

Abide With Me (Sacred) (D-C) (10)
Absence Makes the Heart Grow Ponder (D-C) (18 and Title)
After They Gather the Hay (D-C) (16 and Title)
Always in the Way (D-C) (15 and Title)
America (D-C) (8)
Bright Eyes Good Bye (D-C) (15 and Title)
Can't You See I'm Lonely? (D-C) (16 and Title)

ILLUSTRATED SONG VIEWS—Continued

SONGS THAT NEVER GROW OLD.

(Title Slides will be charged for extra if desired.)

Killarney. (D.C.)

- 1 By Killarney's Lakes and Fells.
- 2 Mountain Paths and Woodland Dells.
- 3 (Chorus) In that Eden of the West.
- 4 Every Rock that you pass by.
- 5 Bright-Tined Berries Dull the Snows.
- 6 (Chorus) Angels Often Pansure There.

Light of the World.

- 1 I Heard the Bells at midnight pealing.
- 2 I saw the Blessed Mother Kneeling.
- 3 And then I heard the sound of weeping
- 4 I saw an Angel shining clear.
- 5 And still the Ages tell the story
- 6 For us He lives and reigns in Heaven

Star of Bethlehem. (D. C.)

- 1 I sat beside my window.
- 2 There rose one radiant Star.
- 3 On many a garret Bare.
- 4 And many a homeless wanderer
- 5 I rose, as borne on wings.
- 6 And then the gates rolled backward.

The Holy City. (D. C.)

- 1 Last night I lay a sleeping.
- 2 I stood in Old Jerusalem
- 3 Me thought the voice of angels
- 4 The streets no longer rang.
- 5 Upon a lonely hill
- 6 I saw the Holy City.

Old Kentucky Home. (D. C.)

- 1 The sun shines bright in the Old Kentucky Home.
- 2 (Chorus) Weep no more, my lady, Weep no more to-day.
- 3 They sing no more by the glimmer of the moon.
- 4 The time has come when the darkies have to part.
- 5 A few more days and the trouble all will end.
- 6 A few more days till we toddle on the road.

Star Spangled Banner. (D. C.)

- 1 Oh, say can you see by the dawn's early light.
- 2 And the rockets red glare, the bombs bursting in air.
- 3 On the shore dimly seen thro' the mists of the deep.
- 4 And where is that band who so vauntingly swore
- 5 Oh, thus be it ever when freemen shall stand
- 6 And this be our Motto, in God is our trust.

Marching Through Georgia. (D. C.)

- 1 Bring the good old bugle, boys
- 2 How the darkies shouted
- 3 Yes, and there were Union men
- 4 Sherman's dashing Yankee boys
- 5 So we made a thoroughfare
- 6 Hurrah! Hurrah! we bring the jubilee.

225 DEARBORN ST., CHICAGO, ILL.

ILLUSTRATED SONG VIEWS—Continued

Swanee River (D. C.)

- 1 Way down upon the Swanee River far far away;
- 2 Here's where my heart is turning ebbin', Here's where the old folks stay
- 3 All up and down the whole creation sadly I roam
- 4 (Chorus) All the world am sad and dreary everywhere I roam
- 5 All around do little farm I wandered when I was young
- 6 When I was playing wild my boulder happy was I
- 7 One little but among de bushes one that I love
- 8 When will I see de bees a humming all around do comb

America (D. C.)

- 1 Land where my fathers died.
- 2 I love thy rocks and rills
- 3 Let music swell the breeze and bring from all the trees
- 4 Long may our land be bright with freedom's holy light

Home Sweet Home (D. C.)

- 1 Be it ever so humble, there's no place like home
- 2 An xile from home splendor dazzles in vain
- 3 How sweet 'tis to sit beneath a fond father's smile
- 4 To thee I return overladen with care.

Ben Bolt (D. C.).....	16 slides
Oh! Black Joe (D. C.).....	12 slides
Old Oaken Bucket (D. C.).....	15 slides

\$200.00 for Two Evenings.

CALUMET, MICH., February 1st, 1890.

DEAR SIR:—The Optigraph came to hand in good order, and, while I have been somewhat skeptical, I must confess I am quite surprised in the operation of the machine. It works to perfection; have given two public exhibitions to nearly two thousand people and they are simply delighted. Words of compliments reached me on all sides. The machine is all you claim for it and is a little wonder.

Yours truly, FRED. T. W.

Note:—From the above you will see that he says that he had an attendance of nearly 2,000 people at two entertainments. Figuring the average price of admission at 25 cents, his receipts would amount to \$500.00 for the two evenings. Testimonials from most of the more successful exhibitors we cannot get as they advertise the machine under another name, believing it is best to give people the impression that they have something which no one else has, and for this reason they do not wish to make a contradictory statement in a letter. Most of the prominent exhibitors use the "Optigraph" while the audience believe it to be some other machine.

GOOD AMUSEMENT PAYS BIG RETURNS.

With a Stereopticon and Motion Picture Outfit illustrating some interesting subject, your services are always in demand, and when the merit of your entertainment is known, the engagements **WILL COME TO YOU.**

CHICAGO PROJECTING CO.,

Outfits

With a view to assisting the prospective purchaser in the selection of his outfit and figuring cost on the same we submit a number of combinations that are suited to various requirements. They are all complete with the exception of films in the outfits that include Motion Picture Machines and the Gas Making Outfit in equipments for Calcium Gas. It is best to include ten or more Motion Picture Films where the means available will permit, but in cases where it will not, we advise including as many as possible and adding more from the profits of the business.

Outfits Nos. 200 to 2184 inclusive are suited to the requirements of the Traveling Exhibitor. Those from 230 to 233 inclusive are for Motion Picture Theatres, and those from 240 to 245 inclusive are adapted to the requirements of those who wish to do Street Advertising.

Great Successes are the result of things "well done." To do your work well you must have a good outfit. We have only that kind, and can start you right.

On the Side. Mr. M. of Elmhurst, Ill., a travelling salesman, gives about 100 shows per season. Average receipts \$25.00 to \$30.00. Gives one-fourth for use of church or hall. Makes all dates by correspondence.

\$2,500 a Year on the Side. Mr. Campbell, superintendent of a school in this state, says he averages about six entertainments a month with Stereopticon and Motion Pictures, and clears about \$2,500.00 per year besides his school income.

Think of It. The average attendance in this city at the Holmes lectures (Stereopticon and Motion Picture Views) for this season was about 3,500 each evening. Night evenings and five afternoons. Admission averaged about seventy-five cents each.

225 DEARBORN ST., CHICAGO, ILL.

CHICAGO PROJECTING CO.,

Motion Picture Exhibition Tents.

The black canvas tent with black cotton flannel lining, has been designed especially to meet the requirements of motion picture and stereopticon exhibitors, who wish, during the summer time, to be entirely free from the renting of halls, etc., and especially for those who wish to give exhibitions at street fairs, picnics, county and state fairs, summer parks, etc. Being of double thickness and made of black material, it can be used for either day or evening entertainments. The outside of the tent is made of heavy black cotton duck or drill, and will shed the rain.

With a tent of this kind the exhibitor can stop for several days or weeks in the same town with the minimum of expense. He has no rent to pay, the tent always attracts attention, and is cooler than a building. The customary method when using a tent at fairs, etc., is to give short exhibitions of one-half hour each, making the admission appropriate to the locality. All of these tents are made up and roped in the regular showman's style, and nothing but good material and the best workmanship is used.

The banners and flags as shown above are not included at prices quoted on following page. We make to order any style or size of banner that may be desired. Prices on banners and flags will be furnished on application. In writing for prices on banners please state as clearly as possible what is wanted, or that you would like to have our opinion or advice in the matter.

As tents are made only to order, customers must send the full amount of cash. We cannot send them C.O.D., but we guarantee them to be exactly as represented. About a week will be required to fill orders.

The above cut gives a good general idea of the outside of the tent. On the following page will be found the ground plan, sizes and prices.

225 DEARBORN ST., CHICAGO, ILL.

Motion Picture Exhibition Tents—Continued

Solid Black, and Red and Blue Striped.

Size of Tent, feet.	Length of Wall, feet.	Solid Black Unlined Tent.	Red and Blue Striped Unlined Tent.	Lined all Through, Extra.	Poles and Stakes Extra.
20 x 40 with 10 ft. Wall		\$ 96.68	\$ 113.00	\$ 63.15	\$ 13.00

30 x 50 " " " "		133.50	178.63	104.55	19.70
30 x 70 " " " "		175.60	204.20	116.25	21.20

Special Tent 10 ft. side wall in front and 11 ft. side wall in back 22 x 60 " 165.75 195.00 107.10 23.35

The proportions of the "Special" Tent makes it possible to project a larger picture than with those having the ten foot wall all around.

For Solid Blue Tent, add ten per cent. to prices quoted for solid black.

All of the above prices are for tents without "Inside Curtain and Sod Cloth" for which, if desired, add ten per cent. to prices quoted for unlined tent.

For Waterproofing Throughout with paraffine add ten per cent. to prices quoted for solid black tents.

Lower Prices can be quoted on tents of a cheaper and lighter grade of material but we cannot recommend them for Motion Picture work.

Banners for front of Tents such as used for circus side shows but adapted for Motion Picture shows will be painted to order showing any scene desired, providing copy is furnished; made of regulation banner material with webbing on the edges, leathers and rings on the corners for ropes, painted in oil in any shape desired. Banners 5x10 or smaller.....\$11.00 smaller.....\$0.15

Banners larger than 5x10, per square foot.....\$0.15 Terms: Full cash payment is required with orders for tents. We cannot ship them C.O.D. About a week will be required to make tents.

IMPORTANT RE-PRICE: As tents are sold on a very close margin and the cost is subject to change through fluctuations in the prices of labor and material the selling price also varies from time to time. We advise those considering the purchase of a tent to state what size and style they are interested in and write for latest quotation.

We solicit inquiries from any who are interested, and shall be pleased to furnish any information regarding tents, outfits, etc., that may be desired.

...The Talking Machine...

FOR PUBLIC ENTERTAINMENT.

There is no question but that the up to date Talking Machine has a permanent place in the field of Public Entertainment and recent improvements have still further enhanced its value by making it possible to reproduce perfectly the productions of the world's most famous vocalists, to say nothing of its wonderful rendition of Band, Orchestra and Talking selections, which never fail to please the most critical audience.

The talking machine has recently entertained Kings, Queens and Emperors, besides the world's most exclusive society, hence, there is no reason why it should not become a part of every entertainment outfit. Its usefulness is not alone in the general production of Vocal, Band, Orchestra and Talking selections but it is admirably adapted to the production of Illustrated Songs with Stereoscopic Views, a feature that never fails to charm the audience.

While we recommend the talking machine outfit as an auxiliary or addition to our Stereopticon and Motion Picture Outfits, it is possible to do a profitable business with the talking machine outfit alone. Then too, where an outfit is desired principally for home amusement it may very quickly return its cost by giving one or more public entertainments, after which an endless amount of pleasure may be derived from it without cost.

The selection of a Talking Machine for Public Entertainment work is, however, a question of the most vital importance, as nothing but the very best and latest improved machine and records will produce satisfactory results before a large audience and sustain the pride of the exhibitor, without which he is liable to soon become discouraged and give up a golden opportunity.

For Public Entertainment we recommend and urge the use of the Improved Disc Machine and the Improved 10 Inch Disc Records. The productions are very loud, clear, distinct and natural, and can be distinctly heard in the most remote parts of large halls, churches and theaters. The Disc Records are not only far superior to the wax cylinder records in quality and quantity of tone, but they may be carried in very small space—without fear of breakage, and a feature of even greater importance to the exhibitor is that each Disc Record will outwear three wax records.

Talking Machines and Records are being improved from month to month, in fact the chances and improvements are so numerous that its development is a constant evolution, with nothing short of phenomenal results in quality and volume of tone. Jean De Reszke, one of the world's most famous singers says: "It reproduces the human voice to perfection." In fact its productions have often been taken for that of the living performer.

In consideration of the numerous and important improvements, it is of the utmost importance that you place your order where the sales are large, hence the stock always new, fresh and up-to-date.

We make a specialty of Talking Machines for Public Entertainment purposes and handle nothing but the latest improved and very best goods. Our Machines and Records are manufactured especially for us by the largest and best equipped factory in the world and every detail of their construction has been given the most careful attention, thus making them especially adapted to this class of work.

Our line is very complete and includes a number of novel specialties.

If you want the best in this line, as in any other line, you must go to those who make a specialty of the business.

WE FULLY GUARANTEE all machines sold by us and will cheerfully refund money if not found as represented.

509

CHICAGO PROJECTING CO.,

The Disc Record Talking Machine

Is the now acknowledged leader for both public and home amusement. Our line embraces a considerable range in price, and while each one is **Guaranteed to give entire satisfaction**, the higher priced machines possess the added advantage of more elaborate cases, larger springs, run more records, larger horns, etc., and, especially for public amusement, where it can be spared, the additional money for the higher priced machine is well spent.

225 DEARBORN ST., CHICAGO, ILL.

New Process Improved Disc Records.

So much has been said and so many claims made as to the superiority and quality of various forms and types of records that every known adjective of praise has been used over and over again, but,

We want you to know that the development of recent discoveries in the laboratories of the factory has placed our Improved New Process Disc Records far in advance of all other sound records, and that we are selling the FINEST DISC RECORDS ever produced, records that are in a class by themselves.

A trial will convince you that for volume, musical quality and absence of annoying scratch, these records are not approached; and we are constantly adding new selections to our catalogue.

Another most important feature in which our disc records excel all others, is DURABILITY.

Send for one of our Improved Disc Records, compare it with any other style of record, and if you are not convinced of the great superiority of these records, return them to us and get your money back.

All selections listed herein are furnished in BOTH 7-INCH and 10-INCH RECORDS except when otherwise specified. The 10-inch Record is much longer, and has greater volume and roundness of tone.

7-INCH DISC RECORDS, Price Each 35c

10-INCH DISC RECORDS, Price Each 60c

Disc Records will be Sent by Mail at Purchasers' Risk for 15 Cents in Addition to the Price of each Record.

.....HOW TO ORDER.....

Always specify whether 7-inch or 10-inch records are desired. Designate the selections by their numbers only.

State whether you wish us to ship by express or freight. If this is not done we use our judgment as to method of shipping.

The nature of the record-making business is such that it is impossible to avoid occasionally running out of some selections. We recommend customers to make a double list, giving first and second choice, the second choice list to be used for substituting for any of the preferred selections of which we are out.

Unless directly instructed not to do so, we will substitute other records of our own choice for any which may be out of stock, to the extent necessary to send the full quantity of records ordered.

14-Inch Records, each \$2.00

Just on the Market. Not LOUDER than the 10-inch, but LONGER.

IF INTERESTED, SEND FOR LIST.

We can furnish anything in the Talking Machine line. If you don't find what you want listed in this catalogue, write us about it. Our Records can be used on ANY MAKE of Disc Talking Machine.

521

CHICAGO PROJECTING CO.,
OUR No. 32-B.

\$18.50 Public Exhibition \$18.50 **TALKING MACHINE OUTFIT**

This outfit is complete in every detail and is furnished with everything that is necessary to give a Public Entertainment and should in almost any locality pay back its cost from the proceeds of one or two entertainments. The large horn is 26 inches in length, 12 inches in diameter, is made of steel and has japanned finish. This horn will give excellent results but must not be compared with our Mammoth Aluminum Ampliphone, the name of which has been imitated by some other houses.

The Records and other accessories in this outfit are of the very best quality and we most heartily recommend it to those who do not feel able on the start to purchase a more expensive outfit.

This outfit is also very popular for home amusement. When so desired we will furnish it without Advertising Matter, Printing Outfit, etc., for **\$15.75**

We furnish the Complete Outfit, No. 32-B, including everything needed, as follows:

- 1 "Q" Graphophone Musical and Talking Machine.....
- 1 Oak Carrying Case with handle.....
- 1 Extra Loud Reproducer.....
- 1 Small Concert Horn.....
- 1 Large Concert Horn, Japanned (26 inches long).....
- 1 Folding Stand, nickel-plated, for supporting the horn.....
- 24 Musical or Talking Records (your own selection if you desire).....
- 100 Large Illustrated Pink Advertising Posters (1 1/2 x 3 feet).....
- 1000 Admission Tickets.....
- 1 Printing Outfit, complete, with large type for filling in dates, places where exhibitions are to be given, etc.,.....
- 1 Instruction Book and Business Guide, complete with information about operating the outfit, making engagements with churches, societies, etc.,.....

ALL FOR
\$18.50
See Illustrations of outfit on preceding page.

No. 12-B. Complete Talking Machine Outfit.

Same as No. 32-B above, except that it includes the Mammoth Aluminum Ampliphone Horn instead of 26 inch japanned horn. Price.....**\$34.50**

Recorder, if desired for Q. C. Talking Machine used for making special records, extra.....**\$2.50**

THE ABOVE OUTFITS ARE FULLY GUARANTEED.

Carrying Case for 24 Records, heavy nickel-plated, \$1.50

Carrying Case for 24 Records, canvas covered and nickel corners.....**\$4.00**

Our Instruction Book and BUSINESS GUIDE is a new feature in this line, is very complete and will be of value to the exhibitor, not only for properly manipulating the outfit, but it tells how to make the business a financial success.

Naval.....	295 to 296	United States, Alaska scenes in.....	256 to 257

Terms...How to Order, Etc.

Our Guarantee. We Guarantee Every Instrument sold by us to be exactly as represented, to work perfectly and give satisfaction. Should any error occur or any goods not give satisfaction from defective material or workmanship, it will be gladly corrected by us.

Our Very Liberal Terms. We will send any one of our complete Exhibition Outfits, either the Stereopticon Lecture, or Motion Pictures, to any Express Office, C. O. D., and subject to a thorough examination, on receipt of \$5.00 with order as a guarantee of good faith. After the Outfit is examined if it is found exactly as represented, perfectly satisfactory and a wonderful opportunity to make money, the express agent may be paid the balance and the express charges, but if not found as represented by us the outfit can be returned to us at our expense and we will refund the \$5.00 deposited. Where two outfits are desired we will require a deposit of \$6.50. Stereopticons, or Motion Picture Machines will be shipped on receipt of \$1.00 with order, and miscellaneous goods, supplies, etc., will be shipped upon receipt of 10 per cent. of the amount of the order. Orders amounting to less than \$2.00 should be accompanied by cash in full.

We cannot under any circumstances send goods C. O. D. to foreign countries.

The prices listed in this catalogue are strictly net.

Cash with Order. When cash in full accompanies the order the customer saves not only the express company's charges for collection and return of money, but also the trouble of unpacking and examining the machine and outfit at the express office is avoided. The outfit can be thoroughly examined at your own home, and if everything is not found to be exactly as represented and a big money making opportunity, it can be returned to us and your money will be cheerfully refunded.

Our Reliability. As to our reliability, we refer to any bank, any of the express companies, or any old reliable business house in this city. We are well known in the mail order business, and if you have not already had dealings with us, and there is any doubt in your mind as to our reliability, it will be an easy matter for you to learn of our reputation for fair and honorable dealing. If you would like to know more about us, and you have any friends living in or near this city, we would be very glad to have them call on us and report to you the result of their visit.

How to Send Money. Remit by postoffice money order, express money order, bank draft or cash in registered letter. If you send your individual check on a local bank your order will be delayed until we have made collection (except that you have it certified) and the expense of collecting will be deducted. Postage stamps will be accepted to any amount as an accommodation to our customers. We recommend sending an express or post office money order, as they are inexpensive, less trouble and perfectly safe. If they should get lost or miscarried, your loss would be made good. Do not send money or stamps to the amount of more than \$1.00 without registering your letter.
